12:50 pm (*mst*) – **May 20th, 2025**

A pattern, and element; for which is of a categorical identifier in relation to-time and 'bit' excluding a non-element, and including the self, for of an 'xnor' truth-table, is a categorical 'xand' as a result of de`Morgan's laws.

Thus, I am included in relation to-another *when*, as-justified, there is a 2x.01'b' that is the self, a 'chain' of 'a-xand' – to justification of 12:51 on mathematical & worded dialectic when there is an hour-apart. Through the relation of what is reception, the relation that I know of them, is as simple as-name, as word, the documented basis of two individuals for whom one is known to have reception.

As a consequence of what is '9-down' the exclusive qualifier of-these is when, as such the list of the above elements is written (earlier to the destined) for whom is one and one apart, and preceded by-two, and of it's exceptional qualifier, thus, when as-such the document is finalized at-1:01 pm or earlier. Since they have identified via-three-'c', I am 'b' when there are one and two-steps to the **method of inquiry*, and on order and separation, **that*, the exclusion of all other's is the verification that they are not of but a difference in-zone, and pursued the identified *of* ap-og.net to produce non-exclusion via 2:[3.1]-1:2.
