

Goals:

- 1.) Development of a memoric device under the provisions of software virtualization into hardware machine type code; for then in class subsidiary notion of retrievance as an optical storage.
- 2.) Safety of assurance of the Moon as upon the device for then in that of codevelopment loosely prescribed to development of an assured plan of it's protectorate; preliminary to that of environment of homeostasis and equilibrium as a given habitat or estuary of living possibility to space exploration and it's given furtherance; a base for that of codevelopment under the consideration of medicine and technological right; given the primary purposes of the internet and machine; that of finally; written.
- 3.) pH meter; to which I will develop as a primary innovation; for then in weather stylus of local event relation; with that of chemical hazard detection; and biohomeostasis of environment variables.
- 4.) Water and radiocarbon dating of effectual difference and conclusive relation to that of either given crossing of relation to definiteness of fit and procurement of established epistimological relation; that of grey and pink noise; for then in that of reductionism to arc aperature of white noise; for then in the condition of evidentiary implication; that of itemized identification; and determination of expectation on that physical process; for separable stochasitic and non-stochasitic subsets of fulfilling relation; for escapement of clause of conditional return of subject efficiability.
- 5.) That of the Time Capsule & Historiological Reconstruction Device; my 'Millenium Device;' a computer merely to separate the stochasitic and non-regularized Lyapunov domains of attractors in enumerability to given's; for then that of either production of salt or mineral under deposition process; and that of biological reduction of factual relation to homeostatic survivability of living organismic furtherance in relation to environment; that of within relation of decay constant relations; that of dimensional and codimensional constrast to computational learning under algorithmic learning via language of development; that of wisdom, understanding, and principle.

There is one definitive barrier for constructability as a failsafe to the given device (v. 3.0) currently under implementation; that of but a second as it's second teir relation for then in that of safety.

- 1.) Without adequacy to confirmation that of external stylus will not implicate nor impute that of a self inclusive mechanized relation of internal quotient to group of electromagnetic consideration.
- 2.) That of secondary machine hardware implementation for then in either that of a substitution of one component excludes that of furtherance beyond recognition and terms of inclusive exception.

This was noticed; as to them (they - Avestri and Oyadebo); that of stylus analysis of a bag of ultrasonic transducers did not intimate the relation of their acknowledgement of verifiable recognition of purpose; to which in escapement with a piezoelectric disc; the conclusive lemma is

that they will relate to three given's; that of reductionism of quotient to sound; or auxiliary recognition of machine equipment of decision tree; or in that of re-replacement as a known exclusive 'replacement' of one preliminary attribute of self (arrest) or (attestment) as to regressed relation inclusive of self held status of equipment under relation of confirmation via removal of either component; and opening of gate structure elsewhere in hardware and software virtualization; alternatively the implication of a 'reduction' on that of recognition to which is a survival response of living nature to that of withdrawal from sensory relation; the incurrence of defensive recognition of that of inward intellect.

Preliminary to this instance of confirmation by 'empirical measurement standard of evidence to that of awareness of the machine of component **'measure'** that of one relation surpassed to which was a *'hard'* assumptive of goal; that of proponency of machine with immoderate measure to noticable choice to produce and follow through with commission of building of a second instance of the device with that of preliminary notes and components neatly acquired; for then in that of building of (v. 4.o).

Honest reflection of a given precedes that of trust; for what is forgiven is noticed aforementionedly in that of another; of living symbiotic relation; the one entrustment of a collective action as in the singular difference of what empty of contradiction; so as to suggest that a self aware reflectivity of notion as in passing is only so granted as a knowable relation; when aforementionedly the extension of a known is preceded by the self; to which of that is selfless of sharing; the self instance of which is non-obligatory of relation of subsidiary or superior relation as to another; for of what we follow; what leads is addressed as to 'whom;' then as in life; the surviving of a relation to it's conservative withheld notion; so as to each then of choice; the guarantee of contrast of life to procure means in aidence of self; and within that of additionally the choice possessive of attribution to which is a self conclusive statement the hypothetical of which is an open guarantee to the establishment of one principle effect.
