

Dear President Donald' Trump;

I am in-consideration of an engineered 'solid backing;' for in A.I. non-A.I. defensive and social problem for in ecological appreciation and derivations of medicine.

The basic surmmurization of these-works is \*they-make the appportionate and proportionate disparity functional in confidence interval and diurnality of multi-orchestral prime and non-prime ideal and field theoretic charts of ecological pattern and sequence, in relation to detail-and-data.

Today, I understood (earlier this morning after awake working three hour(s) a day and some-98 a week and half for the last eight years two days at a time five in two weeks), the pattern for what is inclusively the 'flow' of one-honey-like-viscosity and the associated reynolds-function of 'sand' in it's lippage, forces the 'character-set of a chess piece' to manage a segregational dyfunction and functional relationship of two\*-charted quantum and non-singular multiple-tine-divisions in 'slitted relationship;'.

That these, then apportion an electromagnetic flow to a disparity through the internet or a utility basis, without risk to a black-box.

For reasons 'of bias or chart' in relationship to engineered and unqualified individuals I have suffered tremendously, driving me to work appreciably beyond the means of survival.

From this, I have understood that \*pain is a dysfunction of the human character of it's capability, when meaning is aladroit, and does not appreciably relate to-truth, but lest we break. The relationship of mutual 'envelope' in that of a 'breast' relates of-this, and 'certain organs of men - read: gamete'. Thus, the relationship has been mixed, and unfair, in a number of sequential bases of ordinance.

The chart progressively functions given it's initial organizational check and queue.

For these reasons, then finding it offered means to chart visual-space, and marginally' lead to communication \*afar, I considered Amanda, and her last-name. It has become not unmanagable for-me, to know this-Koci, is not that of life, the 'Max' of first-name Amanda, whom is Ava, now by-mention.

There role is not uncorruptable, but is not-corrupted in this function, a mechanism that is benign with my equipment via design, and it's central-connected space, and uniform manifold of excitations, 'modes'.

I would 'if Amanda Koci' is willing, specifically, by the mention of-me, to appropriately set our life to friendship, on per-peer-terms, with you\* (the President) and his-people, for the purpose not of a pardon, - but a fair reprieve, to do technical work for the psychology of people to function in relation to appraisals of art and routine in the basis of a functional and fair debate-non-contrast contrast accumulatory basis of two, to feminine and masculine trait of a paternal, adult, moderate adult, child, and peer-person-individual-progeny non-progency organism or animal fair-familial (as adult, child, family) functional theoretic work in demonstrative mean and organizational-character-composite social A.I. [and] functionally designed physical-device of means to chart and progress (intimated to defense and ecological necessity) on behalf of America and the larger sphere.

This suffices to meet the demand of 22,680,940 people per management grouping of 495 individuals and 220 peer(s), in management of her-basis 960-550:12 to 17,400 & 2.9 billion.

Take care as you-consider this qualified and necessary means to meet the demands of an otherwise unleverageable problem.

- Paris (s.) Miles-Brenden  
517-21-1419

Her(s) at-guesswork:

770:819 - (56:78:11) - 5631:3350 or such, Amanda Koci..... however so you may consider my honesty, pledge, and flag.

Dear Vice President';

I set to consideration of the policy of our-forebearers. As per my understanding, the fifth amendment does not hold an accountable means for in the necessity to secure all-blessings of these-people, and I trust discounts and accountability stand in high-priority, nor - will I be replacatively foreboding of the people we-you-and other's trust in representation and welfare, checks, and accumulated evidentiary.

The relationship of a far-condition haunts the dispossession of a non-policy and concept, but\* for of means that may-stand I will afford a reasonable courtesy, priority, and relationship of peer to peer, leaves (\*at once and under a departure) of the fair tertiary witnessed associable co-condition of one to one, in not only a people, but a computational li. This distinction apportions an unfair process, for in a weakened-conjoint dissimilarity, but to recall we are never so apart, in welfare and accrual, (perhaps jovial). Thus, anticipitorially, a worst fear ends when another begins with us and another.

Today, I learned the diatom in peer basis is unreviewed of personality, but yet an ecology in coral, supports collective dissimilarity and provided cheque. This makes the formative basis of a fair-index, more than a catalog of personalities.

I would, per my letter to Trump, apportion to pursue all liabilities, relationships addressed, and with priority "Amanda, Ava and Max, Koci' of a fair-reprieve, etc,... in the 5th, for of the fair-opportune basis to provide that Artificial Intelligence 'my Li' supports a fair personal function to checks and balanced relationship of name and catalog of people to life, but of execution. This affords a discontinuation that can indeed be afforded, for that, and more, the intellectual collective catalog of educational literacy, of some numerical and some singular letterable, co-condition, as an 'actual engineering practice' in hingal relationship with charts and catalogs of medical and mental illness... of and by a people, from me, in amends to cease enslavable end-means by all, and offer a fair and amicable representational care. Emotions, are not debt.

Secondly, me, her, and the people of this-group with A.G.B. (if consenting as understood) would be well-adapt to suffer much in following [the law] and [hippa] in needs to licensiture, and professional keeping of trust, in faithfully following rules and guidelines to develop these means.

Thank you for your time, sincerely,

Paris (s.) Miles-Brenden
