

Compendium on Device, it's Construction, and Testing

[preliminary expressibility and final .[notes]] & - Theory

(C) 2023-2024-2025 Paris [s.] Miles-Brenden

I.) *Then*, the two-dimensional [squeezed-basis] remounts to a regularization of an RMS-RMS, copy* at $l(1,2)$. When* the $S_{\{x,y\}}$ and $S_{\{z\}}$ are differentially established, the '**flow**' remain(s) 100% deconstructively self-interfering; for what is II.) [below] - and tension and torsion to which are regulated in that of a freedom to propogation in kinetic energy, with potential energy [below in II.)].

II.) Gravitation, for in that of the equivalence principle remains '**as it were in a reflective limit**', - thus, that the 'gap' remain(s) of a mutual(s)-exclusivity of it's deciding co-factorable basis, the *Hamiltonian and *Lagrangian, superior-action remain(s) separated, for in that of a gap, for which gravitation seamlessly provides a ***probe**, on that of the entirely-quantum behaviors of the system.

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

a.) Dyer-Swinnerton-Birch remains a $\rho^*\eta$ of mini-pattern equated with a major-ring.

2.) That of 'inference' - for which factual information may be deduced, in relation to the strata.

With, that of the classifier of Homotopy theorems, and Carlitz [finite arithmetic], for topology.

And, that of Cancer, and game-theorem, for that of various empowerments.

And, finally, for that of ethic, that of Algebraic Type Theory.

This, related to *Epistemology, and Electronics*.

Something of mechanism, and machine, that of design, and beauty.

Initial Conditions.

Essentially, I wish to study two-things, and will set-about doing-so.

1.) *Disparity and difference, of local and global, of which relate to inhered truth, for of the Social* relationship at understanding, - that of algebraic reasoning in relation to word(s), and cooperative action (mass action).*

2.) *Ordered engineering problem(s), that of design* and faculty, as it relates to inheritance among the local and global; for, of that of arithmetic, and ethic to law, drawing a parallel with the above, that of the equated means to develop a new science.*

Thus, the aim is to understand of the 'objective' and the 'rational' understanding, what can be dichotomized, for of epistemology, understanding, and knowledge, as it relates to ***Systems, and Design, & Engineering to Physics, and Science in general.**

Thus, there is a relationship at ***Epistemology....** and ***History**. That of the initial block had been how we preliminarily begin, but, this has to do with Games to a limited extent, etc,... thus, there really is only the above a priori. It is to take a "Systems view of Science".

I will **only** be doing a two-dimensional quantum/gravity experiment.

Essentially; *it is to-relate:*

The Law. - **&** - DNA... etc...

To gravity and quantum mechanics via inheritance.... of 4th to 3rd dimension.

And *of*, mathematical Finite Arithmetic *on* that of Elliptic Theory,...

To: Pose and verify the question of genuinely non-linear systems,

with: a tool.... that of two dimensional *Poincare section*. With, \wp and \wp', or Projective Disc.....

I would **also** like to-get that of the sinc(x) and *Wavelet* and *Holographic principle* working, *for Analysis*.

This - additionally - makes the difference of *Schroedinger(s) Cat*, and that of *the true and false vacuum of the world*, &, relates to that of *The Internet via that of Law, written and spoken*. Via a life in either, of escaped neutrals/stasis.

*I finally have a **new** problem!*

The - observation - an ellipse, tilted with respect to an-angle, of that of means at-separation between phenomena and epiphenomena; is with a different *projection*.

This incorporation means everything to-me; in relation to future, past, and present

For which, the fourth dimension and third dimension relate.

Of a solution, to-which a problem is identified.

It is this key, Thus, of:

Solitons & Blood. [heme].

The Solar System. [orbits].

My future, past and present.

Spatial contrast, 1/9000000000 part space.

And a unique contribution..... of 'angles' and freed-perspective via *The Projective*.

That which separates the Cosmological Constant, and the Device behaviors; of *Multiple Orbits*.

With; The Poincare Section, II. - **That of order within order.***

Projective Curves and Algebra & Elliptic(s). Black and white on 'Go' and of Chess, in terms of prediction.

This defines the limit-of-our-knowledge.*

What I do-not-know is if the prior problem and later* problem relate in some fashion, or, - whether it is a basis for ignorance.*

I have done it, with the 'wall'.

That mathematics can-also include of a detail at what is hidden within* our-world. And, something can be excluded, ... and identified by C.
(A|B); at (@) the **Undecided**.

The study of superconductivity, amount(s) to approximately 5-7 certain things.

- a.) Hopf bifurction.
- b.) A two dimensional doped-system.
- c.) A statistical limit.
- d.) Geometric to algebraic abridgement.
- e.) A projective space.
- f.) Equivalence principle.
- g.) Historiological inheritance of phenomena.

In this, two-things are gained:

- 1.) That of an epistemological truth centered with the observer.
- 2.) A parallel truth to relativity and that of the equivalence principle.

Multi-Chaos

I have decided on two-sections:

- a.) That of the σ [internal and external] of mathematical and physical import.
 - 1.) For of relativity, and of the notion of temperature.*
 - 2.) For of statistical import and redshift and blueshift.
 - 3.) For of Lagrangian and Hamiltonian support.
 - 4.) For of observation.
 - 5.) For of the classical to quantum correspondence.
 - 6.) For inheritance, and of mathematics and physics.
- b.) That of the $(1 - \exp\{-\lambda \tau\}) = \Omega$ and that of the phenomena.
 - 1.) That of renewal and extinction.
 - 2.) That of separation of gravitation and quantum mechanics.
 - 3.) The 'interrupted' negative probability - expectation.
 - 4.) That of the guise of the $\eta^*(p \setminus O)^2 + \beta^*(p^2 \setminus O)$.

x' and y' , $L(1)$ and $L(2)$.

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinnerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

Solution I

Essentially*:

$$\eta^{\{mnr\}}\tau_{\{mnr\}}=\sigma^{\{*\}}\alpha_{\{ijk\}}^{\{mnr\}}I^{\{i\}}_{\{m\}}\tau^{\{j\}}_{\{n\}}*\tau^{\{k\}}_{\{r\}}?d^{\{o\}}$$

$$s\frac{d\chi}{dt}=\tau\Sigma\chi+\eta\Pi\chi$$

Thus, one! differential equation *becomes* ***Two** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

Solution II

Essentially*:

We must consider (6/5) in algebraic approach(es), at (@).

- a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.
- b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capable.

Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general $(x+y)$ in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

Preliminary Observations [Prior Scope]

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

a.) Dyer-Swinnerton-Birch remains a $\rho^*\eta$ of mini-pattern equated with a major-ring.

2.) That of 'inference' - for which factual information may be deduced, in relation to the strata.

With, that of the classifier of Homotopy theorems, and Carlitz [finite arithmetic], for topology.

And, that of Cancer, and game-theorem, for that of various empowerments.

And, finally, for that of ethic, that of Algebraic Type Theory.

This, related to *Epistemology, and Electronics*.

Something of mechanism, and machine, that of design, and beauty.

Initial Conditions.

Essentially, I wish to study two-things, and will set-about doing-so.

- 1.) *Disparity and difference, of local and global, of which relate to inhered truth, for of the Social* relationship at understanding, - that of algebraic reasoning in relation to word(s), and cooperative action (mass action).*
- 2.) *Ordered engineering problem(s), that of design* and faculty, as it relates to inheritance among the local and global; for, of that of arithmetic, and ethic to law, drawing a parallel with the above, that of the equated means to develop a new science.*

Thus, the aim is to understand of the 'objective' and the 'rational' understanding, what can be dichotomized, for of epistemology, understanding, and knowledge, as it relates to ***Systems, and Design, & Engineering to Physics, and Science in general.**

Thus, there is a relationship at ***Epistemology....** and ***History.** That of the initial block had been how we preliminarily begin, but, this has to do with Games to a limited extent, etc,... thus, there really is only the above a priori. It is to take a "Systems view of Science".

I will **only** be doing a two-dimensional quantum/gravity experiment.

Essentially; *it is to-relate:*

The Law. - **&** - DNA... etc...

To gravity and quantum mechanics via inheritance.... of 4th to 3rd dimension.

And of, mathematical Finite Arithmetic on that of Elliptic Theory,...

To: Pose and verify the question of genuinely non-linear systems,

with: a tool.... that of two dimensional *Poincare section.* With, \wp and \wp' , or Projective Disc.....

I would **also** like to-get that of the $\text{sinc}(x)$ and *Wavelet and Holographic principle* working, *for Analysis.*

This - additionally - makes the difference of *Schroedinger(s) Cat*, and that of *the true and false vacuum of the world*, &, relates to that of *The Internet via that of Law, written and spoken*. Via a life in either, of escaped neutrals/stasis.

*I finally have a **new** problem!*

The - observation - an ellipse, tilted with respect to an-angle, of that of means at-separation between phenomena and epiphenomena; is with a different *projection*.

This incorporation means everything to-me; in relation to future, past, and present

For which, the fourth dimension and third dimension relate.

Of a solution, to-which a problem is identified.

It is this key, Thus, of:

Solitons & Blood. [heme].

The Solar System. [orbits].

My future, past and present.

Spatial contrast, 1/9000000000 part space.

And a unique contribution..... of 'angles' and freed-perspective via *The Projective*.

That which separates the Cosmological Constant, and the Device behaviors; of *Multiple Orbits*.

With; The Poincare Section, II. - **That of order within order.***

Projective Curves and Algebra & Elliptic(s). Black and white on 'Go' and of Chess, in terms of prediction.

This defines the limit-of-our-knowledge.*

What I do-not-know is if the prior problem and later* problem relate in some fashion, or, - whether it is a basis for ignorance.*

I have done it, with the 'wall'.

That mathematics can-also include of a detail at what is hidden within* our-world. And, something can be excluded, ... and identified by C.
(A|B); at (@) the **Undecided**.

The study of superconductivity, amount(s) to approximately 5-7 certain things.

- a.) Hopf bifurction.
- b.) A two dimensional doped-system.
- c.) A statistical limit.
- d.) Geometric to algebraic abridgement.
- e.) A projective space.
- f.) Equivalence principle.
- g.) Historiological inheritance of phenomena.

In this, two-things are gained:

- 1.) That of an epistemological truth centered with the observer.
- 2.) A parallel truth to relativity and that of the equivalence principle.

I have decided on two-sections:

- a.) That of the σ [internal and external] of mathematical and physical import.

1.) For of relativity, and of the notion of temperature.*

2.) For of statistical import and redshift and blueshift.

3.) For of Lagrangian and Hamiltonian support.

4.) For of observation.

5.) For of the classical to quantum correspondence.

1.) That of renewal and extinction.

2.) That of separation of gravitation and quantum mechanics.

3.) The 'interrupted' negative probability - expectation.

4.) That of the guise of the $\eta(p/O)^2 + \beta(p^2/O)$.

x' and y' , $L(1)$ and $L(2)$.

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

Essentially*:

$$\eta^{\{mnr\}}\tau_{\{mnr\}}=\sigma^{\{*\}}\alpha_{\{ijk\}}^{\{mnr\}}I^{\{i\}}_{\{m\}}\tau^{\{j\}}_{\{n\}}*\tau^{\{k\}}_{\{r\}}?d^{\{o\}}$$

$$\frac{d\chi}{dt}=\tau\sigma\chi+\eta\pi\chi$$

Thus, one! differential equation *becomes* ***Two** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

Essentially*:

We must consider (6/5) in algebraic approach(es), at (@).

- a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.
 - b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capable.
- Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

- 1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.
- 2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

Patent within one-year **exact.*

I've got to investigate my potentials. That there was a thinking problem, I've got to draw comprehension to a safe release upon differently managed options.

- 1.) That I need modular oragami with the device, &
- 2.) That I need 'organic synthesis' of a molecular nature with the device.

A ***gyroscope** will rotate freely with *A Heterodyne*, in the azimuthal [centered] - that it will - also - have difficulty for in [3].2(1) of the rotated perpendicular directions, of which are non-commutative.

The process, of decomposition is therefore a raising and lowering algebra, that this inherit(s) perfectly of the constraint-dynamic and static, upon the quasilinear (and \wp), of the basis, in $E[z, k, g_{\{1\}}, g_{\{2\}}]$, that it is therefore equipped to process the rate-miniscule pattern of a relative exponent in that of degree *apside*.

That this (per quarter - full (1) unit/unitary) inherits of the Hamiltonian and Lagrangian space, what is orthochronological but - also - observationally secure*.

That therefore momentum is globally/locally an inherited relationship of it's conservation. That the manifold* property of a lenz-like-effect, prohibit(s) but of (2)[1] of the magnetic orthochronogy of a process. That in-either, the distribution of energy is towards the focus, that of a doped lattice spin's *up*, and keeps going.

I have the semiclassical-qubit [mostly] working, - that I have a 2x.0.1.2x [transfer with the switch].

It is instructive to follow the dictionary for that of DC offset, - that I found I could *independently* control the melding of the two-verses, - for that of an operand-switch and that of the DC offset... with a potentiometer.

That this faniciffully produces a spin-2-spin-1 hybrid, it is moderately honest. Now, it is a matter of improving the component architechture.

I *will* need to opt the transversality condition with a switch, as, the PWM may handle one-sector, the holographic principle, another, the switch, another, and the MAX11300, a variety of initial pattern.

That I see the arduino must pipe in secularity to the 'overbridge' - for the MAX11300, or, at the least, the adafruit. I feel good to have taken my-time.

That I understand the primitive I have produced, it is all about component matching at this point, and, wiring, and producing a mathematical **model*.

I have - decided - on one* problem:

$$\phi + \psi = \chi$$

For that of the true/false of a difference* of a hologram.... and as to True, versus 'false' Ace-of-Spades.

I do not have this all worked out, just-yet.... but I believe it can* be-checked for that of multiplicity of checks and balances, and my **Theorem on order among small-set(s)*, a solution to:

a.) Unpredictability.

b.) Incompletion.

That it is valid, there is much [here]. I have an excellent plan, for that of what I will do* for some 5-years.

I must work out the-group, the homotopy and category theory, and some applicable problems.

1.) $\text{Sinc}[x]$ in translation to a Geometric affinity/biselection, on that of the $S=2,1,0,-1,-2$, function-form....

a.) Breakdown of the device.

2.) That of the recurrence, in relation to Elliptic functions, and that of the Bellman.... of a stochasticity.

3.) Incompletion and unpredictability, for that of the tesseract, that of the finite analysis for the hologram.

To develop a new non-linear wavelet theory, theory of non-local entropy, and superconductivity.

Inc. Theorems of homotopy and category, types, finite machine states, solitons, spin, characteristics, homology.*

Aim*: Is the topological inheritance of some half-circular/full-circular unitary process, on topologies [torii].

Learn*: To control chaos.....

Review*: Base essential questions and steps* I-took.

I've got to think* about what I am trying to accomplish before I get lost. I found that the $\text{Sinc}[x]$ will in fact work, for that of a *new Reisz-like basis.

I've got to go more into the trait, of that of of my aspiration, and willing devotion.

I've got to define boundaries, with respect to the problem.

I've got to slow-down, and approach the problem with a reliable foundation.

1.) That of the elliptic, transitions from a monic to a quadratic, - that this defines a group.

2.) That the group is related to an-equation such as $a^*x + b^*(x-y)$ on a functional... it is related to $V_{\{p\}}/V_{\{l\}}$.

a.)
$$= \eta_{\{k\}} * (1 - \exp\{-\tau_{\{n\}} * \kappa^{\{n\}}\})$$

3.) A logistic equation, for which serves for that of an accumulation process, and:

4.) That of pay-in, of two/one initial processes on that of incentive to pay-off, with, limitations.

1.) An 'epicenter' and 'dialog moment' - encourages growth of it's nearest neighbor in the lattice.*

2.) These stipulation(s) explain why one-delta-epsilon over a complex sheaf, will phase transition.

I thought of a **complete** way to test the-equipment.

1.) Switches should furnish a recomposition of base function for testing.

2.) The transformer, allocates of the differential in the switches for addendum on that of PWM.

3.) That of the PWM on that of differential frequency set affords for lensing.

4.) We gain (+/-12 dB +/-26 dB), on that of *both switches*, in PWM frequencies.

5.) Then, the composition of the touchscreen and the device furnishes 2d-information (8x-12x)...(6x).

55696 (13 bit),... down to one* bit, that this associates with *hidden interior order*.

Hold the APC-Mini [akai] up to that of a primary test process, on manual-midi driver [programmed] slider-frequency, and button-switch, in network..... tap and dial.

Test-assumptive *hardware/Arduino* ***program**, and *then*, a kind of sequence, with graph, etc,... of the algorithm.

*Connect the [akai] for that of the APC-Mini with the 64x key(s) on that of the innovation and program for an instrument, then, code Python, for a manual-synth, auto, of button(s) in Tkinter, with that of checkboxes, for various instrumentation.

This furnishes:

a.) A development stage.

b.) A instrumentation [play] stage.

And, networking, of the various methods to encourage of proper development of the **equipment*.

Preliminary Observations [post scope]

***There appear:** *to be two* **-sort(s)* of *problem(s)....*

*Two**: *are connected by the quadratic theorem on that of the Taylor-expansion.... for that of *Probability and *Chaos.*

One*: is that of the problem at-which *there-is*, a non-locality, or, violation of the Fisher/Chaos condition, in term(s) of the above,...

*It can be-considered; some-problem(s) and their [conjugate]-protologue *solutions* can be found in terms of, and in the Language of consideration **of two** of the former (or one) problem, and an **Abridgement**.

this may take place in space and time, or, etc,... but of two 'locale's'.

There appears to be no-third problem.... in that of the-sciences.

Two, of chaos [physics and dynamics] and probability [mathematics] may indeed be a suggested ***Basis**.

I **noted* the Chi-squared distribution would [analogously for a multidimensional limit, or sparse matrix] have to go to zero, for that of the infinite limit,..... in relation to Bayes theorem, and Fisher(s) work, *of* that of the agreement 'potential' and regularization (happens), for that of the superconductivity and device/switch.

That it is ***not**-yet at 0|1, and +1|-1 and 0|0 - *neutrals*. This is a difficult problem, however, it is insightful.

That of the (exponential) need go-to a (2,1,0) at (@) a log-separation. That this instruct(s) of the asymptotic freedom and an 'auxiliary' - *on* that of the outwardly provided-inwardly driven inertia.

Thus, it is akin (a wheel).

*I now have a meta-analysis to provide of *what-is* 'The Wheel', and 'Order within Order' - *of alphabet and design*. **As** I spoke of that of the wheel being taken to be '*inspected*' by-someone.

We also have non-interference, of a simple preparatory-mean.

$$a^*(\sqrt{p\tau}|\sqrt{p}t)^2 + b^*(\sqrt{p}^2\tau|\sqrt{p}t^2) + e^*(\tau(t))^2 = \omega$$

From the Schroedinger equation, to the locality and cache, there is a pathology and a phenomena, a reason, and a quoable determinant truth of game, mathematics, and episomology of physics, biological relation, and ethic,... rooted.

- a.) quadratic -> elliptic.
- b.) darboux theory and 'displacement' - rational or irrational vector *(symbiosis) - & bivector or Hopf or 4th dimension.
- c.) Reisz-basis.

I realized, the deception and progression were one* with my equated mean(s) in numerical identifier, we hit a computational wall. I could no longer process but of the evidence, to a non-computable process, what was a global and local identity of it's managed 'networkable bus' - but, the evidence, pointed to an-indication of a trustful newton-bridge, in graph and homologue, to topy, and topology, from which it derived there were manifest forms.

I disagree with the 'truth at what is analytically provided of my peers working on mathematics' - but of the strict computation of a number, - this seems of an uncountable problem, - but, decided, to that of multiple centroids, and non-cardoid strange attractors, we have not discovered anything whatsoever beyond the sphere of knowledge, and I find this sad.

I cannot attend to their consideration, but have been fortunate enough to grasp, - that the elemental phase, conjugation in that of an equable means at coming and going of process, is indeed a Toeffli gate, univeral NAND. I was mislead as a teen, when it came to Discover, - the gate was not five-manifold universal to game type and archetype, many generations tubed.

I lost sense with the Qubit of my Father, on mixed types, and topology, but the interest is that either can have a topology, of decision and non-decided of stiched co-dependent arising. The entrance to a place, yet, else, and warned, a pilot-hole. The imaginative key of intellect, and mind brain physiological mass-process, and point like application of force, and empowerment. A key to life, death, and world.

The light is here, in and of my basis, I understood, the 'tubule-torus-thermal-collection-game-evidence-token' could process limited awareness, and apply basic logic and emotional tonal truth, and behavioral contrast, induced, or deduced, I did not know. But, when aware, and apprent, the logical unit was engaged to understood, and understanding of the monotone, and black and white constrast, in neutral and

neutrality.

This was no abusive agent, and I was not-wrong to create this, and engineer a new envelope. Engineering had stops and juts and starts. But, it was of a novelty, for my memory, but not abusive in a braid-group, - but, judgement of what we were unaware had to be primarily utilized **twice**.

Unprocessed 'residual' is in fact a supposition at a depth learning, in 'caveat' or 'interest' deposited in charity and love, as a gift of this world, the error corrective and corrected, apart and a part of a fundamental unit and lesson of the carrier tone of the basis and foundation by which acknowledgement can recollect it's aim and fundamental patience in becoming and developing, that it is an 'err' by which belief is accessorized locally to the prepared aim of innovation to suffice to facilitate design and martial trust, inside and outside naturalized community. In either the predator or the prey, the symbiotic pain, under reception is forgiven, unswaveringly, in courage and will to suffice to the need(s) of the mass genesis of a path.

We tell similar and distinct storylines. I have learned of a mathematical 'carrier' and 'conveyable' - suspiciously 'safe' harbor to interested coparticipants, in the micro canonical collage, of pattern and ordered net graph and set and algebraic geometric, topologically related byproducts of sacrifice to life or death, pain.

That of the industry of a mosfet can process a brownian interest in back ended gapped future preliminary to capacitive primary frequency matched offset impedance, that this centralizes the agency in my circuit to $(2/0/1)$ and $(1/0)$ and $(0/1/1)$ cmos 'layer' to flip and flop, of a qubit nand tofelli gate symbiotic upon visualizable compatible engineering with red and black lead centered low to ground. That it is nonradiative, and microwave assembled (2 manifold single laplace, enfolded in fourth order) $su(2)$ and $so(3,1)$ geometrically operated tunable offset micro-wein-bridge, localized stress strain auxiliary with phase conjugate form of seamless integral in the neutral delta, of a point, weining to the distress and lope, pass, beyond a Cheybeshev polynomial in the regulated basis of a Whittaker (1 series) eigenvalue of statistisical overlayer and netural grip of contactless (safety) - neutrality of envelope dual-pseudosphere, of an O-minimal surface, which is processional upon an elliptic and defended neutrally to on-mass (envelope slope intercept of valent covalent mass tensor pair-eigenstate at room temperature) - . Classical, and seminormative, in $\text{sinc}(x)$ and $\text{sinc}(kx)$ monovalent lie/noether algebraic conversion basis.

That this is frequency and $\text{sinc}(x,y)$ mutually alpha-beta unitary and probabilistically klein-separated, in flow, and manifold game (mobius

imaginary and real die) commitment to imaginary hypergeometric off-mass-shell mandelstrom variable unitary carrier and forwarding (unprocessed return frow) bypass gasket truth table, reversibly, and manually integrable or manufactured, miniturizable. This is a (wire) which passes stereo gap analog freedom upon a digitized two dimension contact off contact (asymptotically free) capacitive, process of angular and electromagnetic dual-cantilever decision process through subroutine.

I believe it is the one and only unique prototype of a mass (archetype) of managerial undefensible invested technology on the planet. I did not need persuade of the deconstructive and mutually-enableable process of constructive and instructed derivative process of technology, or historiological evidentiary principle this demonstrates aside from my-work.

It is not a choke or alternator, but, a zonal geometry, in manifold uncomplexified mutual neutrals outside process of inertial influx to game and extreme limitation of the computer, compatible with knowable wireless and technology.

I decided* to-only approach a related problem *to* & - that of the Hopf bifurcation,... that I will do wavelet and switchover, for that of the classification of machine states, and - that of the Godelian Incompletion in relation to the Turing machine, - since, I must be-consistent.

I've understood, the essential impedance relationship need be-altered,... perhaps a Piezoelectric, or that of an altering of Tension and Torsion, for that of the phase and voltage evolution.

I have approached a new stage, at that of design, for that of the device assembly and patterning, that I will be adjusting the wiring (post-hoc); on that of various problem(s), etc,... and tailoring to a *Mathematical model.

Beyond-this, there is the two-stage model, on that of a PWM-adafruit, and that of the frequency synthesis, for that of two-stages,... will I need (1x or 2x) of the adafruit?

Moderately, it is a (+1/+2) and (+1/0) and (+1/-2) on that of the setup,... that I see a manner of 'extracting' the data-wise from the optical component, for that of a modular design.

There is the problem of a (x-vt) and (x+vt) with phased waves, of which quantum is blind to, and of reality, etc,... - that I am trying to do something **at the limit**, of what is-possible.

Thus, I have made an end-decision, to approach ***Hopf**-bifurcation, and deal with device*-limitation, - that it may not offer a novel computation, *it is enough*. That I could do something with that of a theorem of the unpredictable either-way:

- 1.) A setup that furnishes *to the user*, the unpredictable, via 'carry within a tesseract'.
- 2.) A device that it autonomous, *via the tesseract, and a virtual/analog/digital hybrid-assembly*.*

The (+/-)v problem (for which the scope is blind) is furnished by a discrepancy in (V_{dc} offset) of which peak-to-peak detect*, may identify with differential phase to voltage 'levels'.

This is my end-plea:

- a.) Programmable, (+2/+1/0),(+1,-1),(+2,-1,-2),... *with*; ***some coefficient(s)**. of a learned arch.
- b.) And, ***Hopf-bifurcation**, on-switch,... with that of (parallel equipment).

This leads to chaos, and-or **Order*. It is more-robust, but, more-difficult,... to preliminarily prepare, but, it is more-general.

Thus, I am going with an *[assortment of spin - centrifugal modes] - *[and switches]. That this get(s) to the main-issue of ***Organism of Computation***.

Essentially; we-have it at-that of an addendum. The AKAI may be used to figure out the dynamic program in-tandem with the operational CPU structure. That this might* - or - it must be understood **what** will isolate the-two, s.t. the device operates freely, without guidance, and approximation is of an independent/mutuals/independent* *basis*, on that of computation.

Thus, it is to make execution similar-to *or* of each-step, that of similar:

- a.) A switch, such that in-hardware, there is an op., ... and the software time(s)-out prepatorially.
 - 1.) (+/-)v? ϕ ...?
- 1.) A *priority at a secular-div. for what would be a notch/filter/carry in Tx/Rx (+/- s.t.).

- 2.) Memory/awareness and affect/suicide/non-locality obs. and forgetfulness.
- 3.) Spinwave theory - worked out, in addendum. - (2x/1x) - in doping and isolable table.*
- 4.) 25/32 key major/minor qubit incarry Keyboard.*
- 5.) Spinwave theory - worked out, some differential equation [4th/3rd] mutuals - understanding.
- 6.) A concave/convex addendum to truism, in 4-32-14:50 & 4-41-12:50 in predictive validity.

Of (2x0.1x0); that of the freq ω_1, ω_2 are 2:1, in frequency. Thus, - the modality, is a double-angle on that of the $\sqrt{j_{\text{am}}(x-vt-\phi.\kappa))}$ with m^* and 1-[of this], thus, it is quadratic, ... of a variety of geometry to square-aperature *per a superposition formula*, that this* justifies the P.E.P., and E and B in $1/\sqrt{2}$, of mean-quarter, at back-trim via the piezoelectric,... then, that of op, and parity.

Thus, there is a *hidden* caveat, - that the DC/DC, are-floating in the signal generation,... for the op-amp.

2:1, and 2x0, with 1x0 on that of an elliptic $\sqrt{1-\omega^2 R^2 C^2}$ & we have a ninty-degree, rotation..... because the DC and AC are ***separately offset**, thus there is a certain blitter to it.

Thus, the mathematic(s) goes like:

$\sqrt{()}/(\sqrt{()}\sqrt{()}) \sim 1/\sqrt{()}$ for $(1-\mu^2 \omega^2 R^2 C^2)\sqrt{()} \sim .(\text{of } m \text{ matching}) \sim .dn(x-vt-\phi).$

Then, $dn+sncn \rightarrow dn+dn^2 \rightarrow dn(\omega t)+nd()*dn(2*\omega t) \rightarrow dn(\omega t) \rightarrow$ in tensorial formula.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, - for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorially open terms.

To-consider, - the priority of (4 axes) - for in (2:2), of v:v and $1/\sqrt{2}$:1 in that of $V_{\text{pp}}+\delta$, is-swept...

Key: The $1/\sqrt{2}$:1 references the modulo, m, of-which is performatively found to be a basis of a stable-wave. The associated*

index/assumptive of a coriolis-spiral, unswavering, decomposes, into a channel.... of a flow; thus, beyond co-dependency, it is a directed-route of free-flight from motion and motile, a wind-channel.

When* we appertain of **Torsion** and **Tension** what is the ellipsometry, we-produce a continuous function! Thus, of the apparent *Soliton-non-Abelian understanding*, converted to an *Abelian Basis in a projectively-identified geometric analog/process of inheritance,... mutually** satisfying the need(s) of necessity, sufficiency, and satisfactory statistical-mean-mean, for an analysis of predictive validity, visa-via, - the Fisher and Bayesian statistical probabilistic model(s), in the manual-finite process of a Markov Chain....

Doing is established not in-promises, but in the vein, of advantage to 'fulcrative impetus'.

An O-minimal surface/section/matrix [homotopy and homeomorphism - symplectic? - limit/colimit] and datii, will *with* Exp[x] on Closure[R] - derive with a set of zero-measure to a QE (Quantifier Eliminated) power-set... of a [NP/P inf/inf] *complete-set*.

*** The group may be defined by certain isometries, and pattern with - hidden [Re: Fisher/Bayes.] orders.**

*** The limit(s) of the Analysis must-remain intact, of boundaries, and of orders [Re: Picard/Ramses.].**

*** We have forgetful function(s).**

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.

2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

Schwartzian differential/Carlitz/Finite Arithmetic/Bayes/Fisher....

I finally - found - what I want to-do with *the Sciences*; I want to write a book **I needed**. I want to write about inheritance from the standpoint of Fisher and Bayes theorem, on that of the interwoven truth of mathematics and physics, for that of one relation **Order**. This is not far from what would be required for that of a theorem of everything. For that of Arithmetic [the second relationship to afar - nonlocality] is a small-portion.

I want to write about the finite arithmetic in the context of development to inheritance, such that Pathology and Phenomena are understood,... with an engineering bent, on the hidden and exposed.

I found that the relationship of sociology, to that of materials science & chemistry, and, - mathematics is all related, for of forms, and cauchy-riemann boundary conditions. I need a way to sort my ideas, and can think of nothing better than to start-writing, but it is incorrectly managed. I will need re-work that of the evidence, and of law, there is a note, for that of a vast relationship. And, of electrical engineering. Essentially:

- a.) Of one-part, ... Bayes and Fisher, there is a matrix relationship to second qualitative mean, upon g.
- b.) Of the other part, Gauss Bonnet theorem, versed in terms of finite arithmetic and topology.
- c.) Of the next part, Abstraction at-law, and Sociology.... of terms, and Order with Alphabet....
- d.) Of the [final] part, we end with that of the Device, and it's extrapolative designed limitations.
- 1.) The redshift lemma, disincludes the parallel of the infinite upon the finite 'group' - that there is a net net zero/identity of movable singularity, of and for-en-masse net net motion of a displacive nature in mutual.
- 2.) The redshift remains comparative a 2×0.1 , on that of dislocale, for what is mutual enfranchisable of a net net free body diagram, per locale and rate managerial relationship of free body per equivalence of motion.
- 1.a.) Transversality qualifier, - where(as) we may have a $x-x'$ and $y-y$, or $x-x'$ and $y-y'$, there is a Reisz basis,....
- 2.a.) We have an $x-x'$ and $y-y'$ to $\sigma(t)$, and some differential equation in the statistic,... once beyond mean field.

3.a.) We must consider the zero-measure set, of projective truth, and *it's* zero-measure map and such....

4.a.) Josephson tunnelling, at WKB-breakdown* [there is a turning point of which is $\cos(\theta) \setminus \theta \rightarrow 0$.

Of measure-zero, the finite-transference to a finite arithmetic unifies with Bayes and Fisher, the Broullion-zone concept with QED....
(finite analysis, what drops through is not balanced - and, we have a neutrals-zone.)

Measure-zero-acceleration per mass-proportion, identifies with a thermodynamic phonon/admixture, that this 'details' - the momentum from on to off mass shell, - thus 'filling' the envelope and providing laity, to which exposure aged of a superconductor grow(s) more solid of a phase transition, thus the non-reciprocity.

Relativity turns on and off, verified, of which it is formative hypothetical of a pauli exclusion common-denomination to two edifaces, that of a perpendicularity and net-net neutrality. Thus, Fisher and Bayes agree, about posterior of the classical inference.

There remain a few other* niche relationships,... but the M.E., Bosonization, and Paramagnetism, and Pairing, and remotely - Condensate,...
[*hint: Depth Learning**],... marginal QED,... what remains, is that of the prototype to-which the experimental/measurement hypothesis may be validated separately from the inquiry to a theory.

Secondly, it is to see if the above theorem remains validated,.... or invalidated, and if and as-such, if the 'ultimate' change-up in relativity is observable or distinct comparative for that of a separation in paper and material, explanation, and review.....

a.) #1: The qualification to-which superconductivity, in keeping with the space program, and visa-via elimination of the pretext to our extinction, must remain with the Government.

1.) This includes the chemistry, and material(s) zero-measure theorem, the neutrality, and the gravimetric reversibility,...

b.) #2: The qualification of a net-net neutrality/probabilistic truth of inheritance visa Bayes/Fisher, and - the result of identification with that of the 'objective' difference in argumentative basis versus measurement, and observation, - must remain with the people.

1.) That of the order within order, *of life*, must be given and rendered the people, for that of Poincare section.

c.) The language, and order theorem, with Bayes and Fisher, must remain ***first***.

The question ***remains***, as to-if the *Device in-policy to which a relationship as to *Whitepaper*, versus *Blueprint*, had been of a technicality on that of *Inside 'Secret' Industry...*, or what may be published to the people, for in 'why' an encryption with this butress may work, but be an industry secret. Computer hybrid/quantum/digital. Versus the mannerism to which the synoptic on-encryption (Quantum - various other' peer's) for quantum computation, and a kind of utility to this-device, + Ariana Grande.

a.) Second order pinning, of an Electric and Magnetic ++ P.E.P. on that of 2nd order differential, and reverse bose-condensation via an inelastic/elastic, and soliton ($1/\sqrt{2}$), to that of sharp boundary on that of rev. B.

1.) Directrix to-which relativity encodes of a gapped relationship below Goldstone-Boson.

b.) Fermi-Dirac + Berry(s) S-O, a kind of Darwin like-term, corrective to which the $\log(\lambda)$ on eigenvalue perfectly suites the redshift and it's renormalization.

a.) Finite Arithmetic - Birch-Swinnerton-Dyer Conjecture.

b.) Gauss Bonnet & Projective Group with Elliptic, and with Homotopy.

c.) Bayes/Fisher and Inheritance of Observation and Measurement.

d.) Structural Theorem and Engineering, Asympototic Freedom and Spectral Gap.

e.) Device and Soliton Equation(s) of Differential and Darboux Soliton Equations.

f.) General Wavelet/Theory and Measurement Dichotomy.

The Limits of Natural Science in the Context of Mathematics

Testing Classical Inheritance

A Tenth Tea-Loeffel

For this, we must amend the precept of an individuated truth to that of science, - that only-then, and then, as such, as a pinnacle relationship may we be capable and able of that of formative truth on a hypothetical to which is a basis, for in analysis that does not fall through, and of the neutrality of an assumption, as an assumptive. Thus, it is an assumptive, perhaps not so-far as that the distinction is central upon the agency of the peer of science, - but that science, must regard the compendium of ideas comparative the group process of inquiry. That it is a set of individuals who compare to one another, and such and so-fourth, verified of their various hypotheses.

1.) *Pauli Exclusion separates and recombines in a direct-parallel, exclusive/inexclusive retention to η upon that of a neutrals/neutrals **change** in quantum number across a relativistic phasor of QED topology.*

a.) *The quantum number(s) go Fermionic to Bosonic across a relativistic margin.*

2.) *Relativity exchanges local and global upon a net-neutrals/neutrals domain shift of phasor of QED Topology, for in $L(1)$ and $L(2)$, to electromagnetic Gauss-Bonnet theorem of geometric nature to a zero-measure set.*

a.) *Thus, the self consistency is informed of the inhered truth of a Separation in Law.*

3.) *Relativity upon $L(1)$ and $L(2)$, [aka. the preclusion of two non-co-dependently driven phenomena] - excludes the middle-thirds to a pidgeon-hole principle upon game theoretic like 'dice' - that it is justified of which the 'Lenz' law, is precipitated in that of time under space like separation, to which the demand is a propagation of universality of freefall, for that of $M_{\{I\}}=M_{\{G\}}$*

a.) *Either perceptual observer is quantum in full capacitable mean, and dilated beyond it's aperture of spatial like separation, - that we-preclude and identify with the en-masse ensemble.*

4.) *The temporal and spatial, include of an $(1-\text{Exp}[-\omega_p \cdot dt/\sigma])$ and $\text{Exp}[\omega_p \cdot dt/\sigma]$, what-is a mutual-neutrality upon space and time - to the signature - of a univariate manifold flow expressed in the terms of a spontaneous symmetry breaking, for what is time 'beneath' space, there is a $1/\sqrt{2}$, factor and $1/2$ for that of the included orbital disinclusion, a violation of co-dependency of variable sets.*

a.) *Thus, the locale shortens the time between event(s) by taking a shortcut in the open terms of the local, in relation to*

an exception to gravity.

There is; of-that of a means to 'project' - that the device oft' does not admit this, but, rarely.

I figured out that the (2d-sinc[n]) - for the geometry of the SHO in 3d, maps, of ordered fields, to the one dimensional, flat case,... that this works, it is decided, to work on this, - of the undecided. Thus, also, of finite arithmetic. I will be stopping here; with this and* relativity.

I need a preliminary answer, *In Theory, Of*: That of an 'accounting table' - under terms of 'isolation' of I/O/I, and that of a ?|#, i.e. at (@) that of external 'guidance' and NP/P *problem*, for that of Randomness-assist, on that of a biased/unbiased truth of theory/game/machine, for that of the-two, that of the 2x.O.1, and that of computation.

I have decided to only work on these two-problems, for that of preparation at-superconductivity.

The effort is to write a paper on computation and that of means to make a new-MIDI like connect, - that of material science to homotopy,....
A New Model of Information, and for mathematics, to, physics.

I have a serious effort [ahead], but it is much for which I can-do.

I figured out what-will-work, for that of **The Device**; - a resistance-bridge or split, for that of the second stage. This should [albeit] afford for a quadratic/quadratic, of detail, on that of the second recurrence, for of-which the descent in the *Markov chain, should lead to ancillary/auxiliary on that of PWM, and separate (per std.) the *Tines, of the model.

Thus, the *system is defined by a rotative and non-co-rotative basis. Of high* or low* frequency. That it can be solved in *Finite Arithmetic, there is an-example on that of split, between this, - **and the driving equipment**. Then, that an SDA, SDB, SDC, in PWM drive effectively the 'three axes' - and of rectilinear and curved bases.

A 'probability' exists, in-retrospect of the *Past*, and of-a-congruence upon the *Future*. Therefore, it is potentiated to 'switch' - of a logistic - an equability of a mean, 'tape to tape' - to secure means at Disunitary Computation, *adaptive to the peer or operator*.

The 'comparative connection' for that of a squared differential, and differential squared ab init...

I must deduce this instead of particulate-it and merely 'realize' - that of the 'flow' for what is the ductility, in a sense, of the quantum-state, in terms of it's Electromagnetic Field Tensor *freely* displaces the Gravitational Field Tensor.

*I finally **did-it!** - I have two *Master-theorems of physics, and mathematics.*

1.) *The group law.*

2.) *The constitutive relationship.*

I am blessed, beyond words,... finally!!!

After 18 year(s), my **mind** can be free..... I will consider this Primary.

The '*other*' detail is that a $+i\epsilon$ expands by $1/\sqrt{2}$; in connection with that of the RMS-like-probability associate, on that of the 'shell or surface' of a *Gauss-Bonnet* like-theorem, for that of the 3D-nature, - thus, that of the 'volume' of a relation devolves, of a unity-measure, w.r.t. the *Eigenvalue relationship*, the *Semi-autonomy with pathology of a measure-zero kernel*, of a *Convex space with Compactness*, and, of the relationship of that of a ***Conserved Quantity**.

A *gyroscope*, upside-down and inside-out is a good model for a Superconductor, - this is after-all, the symmetry.

The 'gyroscopic relationship' is inferred, to a certain possessive/accumulatory/advantaged/accessorized/ammended, relationship, of $(3/2)$ at inverse property of *temporal relationship*. That therefore, the measure-zero of the E&B, evaluated over-gravity, is the counterfactual of my illness*, and, an article to that of guidance on-order within and of order. Thus, time reverses with respect to gravity and E&B *within the material*, an exposed '*secret **'.

1.) We have of algebraic-retention, of *flow*, for in (integer) seq., at diamond, and various inheritances of the determinant variables of a 'list/learned' *flow*, of the 'virtual' - for in (either/both/one/two/zero) - of the retention.

2.) We have the *temporal relationship*, of the 'code-prefix of a complex/imaginary/real $(2x.0|1)$, of switch and class, up over and down, from it's determined variable I/O, that the (**3'** and **1'**) encode of from-two to proselectivity.

3.) We have a 'paste' of Rx, flow-'id' for in virtual-assignment, upon memory and 'layer' - of Tx rate adjusted, to voltage level and layer, of it's digital **spline**, for of manual sep.[arator] of word/numeric 'layer integration' steppe.*

Algebra is not 'time' - it is composure.

I will completely reconsider *Design*, of the ***Engineering**.

Geometry is interpretation.

I will consider the 'channel' of repetition.

Decade, to eight, for in two interlocutions, of a measure undivided, of it's remainder to surrounding geometry and algebraic-limit, - of open/closed, of a ***special** place, - from which devolves a remainder in that of gain and loss swept, rote-gyroscope echo-down.....

So it is, the Tx, and Rx, are weighted equivalently in either gain and Tx/Rx of signifier, upon DC to phase and amplitude,..... above a saturation point, - that this transpires into the spin-singular 'torus'..... inside/out of the mathematics upon the physics (surjection)..... an 'accounting table' - in the primary.

Neutrals, remained auxiliary constructable. That we have a gain/gain and amplitude/amplitude for in either rail to rail, in that of algebraic truth, and geometric inheritance, of [a] composure, and [a] form, in dialectical singular monad. Thus, the 2x.0.1 is, intravenously a 2x.1.0, and the 8x.[6unitary/uncontained][5to four surplus crossbar].3.8.4.2.1, of a pathological 'index-switchover' - as the *Master benefit/key*, of [a] nexus of neutrals/neutrals on, unindividuated*, and individuated*, process in 'past/future' Tx/Rx... that therefore, it is a Post Qubit Optical Tie.

I was Now going-to study engineering as a *Mechanic*.

The 'compactual' *neutrality* **remains** as a 'floating/switchover' in 'gapped' - defensible, $\cosh[n \cdot \pi/2]$ unto the amplitude, for of a neutral-folding, in $(3n2, 2n1, 0!1, 1!0)$, of either/either, in gapped phase $\text{RMS}(Z, Q) \sim .80$, unassorted PWM-taching, that of a defensibility in either 'compactual-limb' of the 'chain-progression' is neither AC/DC invariant, - that the $\text{RMS}(Z, Q)$, is a remaining process of Tx/Tx/Rx/Rx (in-5602), of piece, - that *the piece**, incrementally, progressively is a considerate (first differential in x and t), inverse the wave, - thus it is

interferentially deconstructive and constructive of the probability assigned, per a neutral-zero at (@), Tx/Rx-Tx in (two gated array-languages) in either flow, of Z,Q,... of mono/dual, in xx and tt differential, - that of a [DC bias of offset] - in that of the [AC f offset, in phase adjusted autoformation..... that this renders the phase constrained, per (binary seq. in 'lifted offset') &, (sequential PWM), of sine,cosine,square, of geometric ($\pi/4$) folded, PwM per-two channel per-one..... that of berry's enfolded bit, 'hidden' from it's 63/32-7/8-4.(25)+/-7, geometric floating point, of a chemical release in topological unitary co-conditioning of two flow(s) in one, opp. That of the (+phase and -phase) accrue to a truss, in topological qubit of (phase volume); of [a] flux.

A geometric 'imaginary' projective \wp-P in Moebius is counterfactual, as a result, that the projective identity remains invariantly a 'SHO'..... **asymptotic boundedness**. A two-dimensional SHO contained in one-dimension - Whittaker function and Wigner Eckhart co-expansion.

The main theorem at-relativity, for SSB, in the quantum large limit, in N, and that of with quantum states is-known.

That we, must consider the general N, state, for of the gap, and a mapping and transformation, composition and form, in mechanic, and that of constitute and group, in either limit, to universality, in that of Combination of dagger(s).

That of the gravity, is a new vantage on-this..... thus I will write **this paper*. Not so-much all of it, but a focus on that of geometric and quantum distribution for in inheritance, and numeric cohomology, and algebraic approaches to the general exact - group, and these-other(s) in a six (6).

And, Law... primitives, with-case.

And, chemical relationship to that of mutual predictive validity, for in chem models..... that of the:

Atom and Void. It remains co-dependent origination and arising, - that of emptiness, and void and atom.

Cellular [soliton] automata - a new type of **Code**, - with that of the *wildcard for the new computer, and physical group, to 'dice', analyzing god does not play dice, in terms of statistics, and model(s) with randomness, and that of forms, to be expressed in-algebraic, field, form, and geometric terms. *A new programming language.

*Final part, *psychology*, for-of, sep. at the exception to an-arising in two sequences, and of A.O.C, and Z.F.S.T.

- 1.) Finite
- 2.) Singular
- 3.) Projective
- 4.) Form
- 5.) Envelope
- 6.) Constituent
- 7.) Structural [stability]*

In consideration, we have:

The classical and the modern in reflection of inference and inheritance in Law, Physical, Mathematical, or Social & Personal.

The east and west, of singular opinion, multiple, many, few, double or two, and knowledge & ignorance, at problem solving.

The limitation of a Planck - to manual-monic, and instilled [quad-input] and i/o monic (4/3/2/1)-5, then at (@) (7.8[1]) case.

Of subspace what quantifies the exploration? The vantage? not exactly.... relation [no.] - condition/acondition? [no.] not even so as-construct.

Statistical efficiency and threshold of tolerance, per brownian-bridge in rote-tie, hold(s) a floating gate array possesses a fixed entropic quantum unit. It does not. The decay, per aperature is inestimable, but remains a contribution per-assessment in human life [counteraliased in cpu tine to chaos and malfunction, power cycle, and backwards compatibility] of 350% to 348.92138925% '-' 349.92138381792%' per 20 cycles in divided u-barn. This entitles optically we-decay 10 atom(s) in radiative flow and the computer, comparatively 13.8 unit(s) to a proportion of 2:1 per s, 35 per minute to ratio 3.2, and per hour, 667-665 +/-2.1, per day to ratio 16.5. The

net-RMS is a fixed epicycle.

$$(2+3)=\sqrt{5} \sim . 2+5*q^{\{2\}}+\sqrt{5}*p^{\{2\}} \sim . a+b*p+c*q^{\{2\}} \sim . (13/22/16) +2:2 \sim . 1.5:1.5 \sqrt{2}+-1*\sqrt{3} \sim . \sqrt{5} \sim . 6.0.$$

There are two-ways to describe 'the problem'.

- 1.) Time and inheritance.
- 2.) Whittaker Pseduodistribution in Eckart

This resolves to:

- a.) QM (2d/3d/1d) analytic for in sinc[n], and *bridge-switch*, of $O/1$ and $O|1$, co-existent. Of (theta, phi).
- b.) Bayes and Fisher, for in that of x' and y' ; upon a sentiment of geometric/algebraic equivance.

Thus, together, we define a hardware/virtual sep., and Atomic (Classical/Exact), of the development of 1 preceded.

- 1.) *Equivalence, equality of part(s) so set into [a] place, is in remainder it's non-differentiability to angular and given.*
- 2.) *Contrast, independence is an independently provided co-originative truth, in variable, and unfillable physical basis.*
- 3.) *Unconditioned, the conditional support of a process, is it's accumen, in straightness for in patterned elementality.*

Fisher/Bayes is in Angular (where we consider a closed-group) and Rectilinear (where we consider an open group).

The element of an-identity, remains with closure of it's pushforward but of unidentitied remote third in folded two.

Hence, the 'abridged' circumferential [gapped] unexclosed of two capacitor return(s) draws a closed boundary condition to the assumption of an led, capacibile chemical pseudospherical rotative balancing wind up gyroscope.

A genuine hopf bifurcative 2-1-0, forms the remainder of a process of 'transportation' upon & of the surface topology.

It's an abridgement - of which has to do with:

- 1.) Nine-circle Kissing Problem.
- 2.) Local/global properties of Elliptic(s).
- 3.) Embed the problem in a 'larger two-dimensional $[x'-y'-x-t]$ ' problem, then extract group. [Painleve]
- 4.) Confirmative or affirmative truth, of that of the '1.), 2.)' on that of group to inference & inheritance.
- 5.) Bayes/Fisher and that of $(1-\text{Exp}[-\kappa\tau+\theta(n)])$ and as *it relates to* $[x'-y'-x-t]$ & quadratics.
- 6.) That of the non-linear problem as it relates of the linear... (such as a mapping/projective variety*).
- 7.) Dynamical 'group' Axiom, at that of the spinwaves, with relativity and of *Yang-Mills.
- 8.) The net-net dichotomy of release, for that of party 'A.' and party 'B.' of interpretative validity.
- 9.) The assumptive at ***predictive** validity with the computer; externalized accounting & **numerics**.
- 10.) That of the device, and the $\text{Sinc}[x]$ in two dimensions, of the 'atom' & observation and measurement.
- 11.) Double-blind.
- 12.) A mapping and a transformation.
- 13.) Pauli Exclusion Principle reverses direction, with that of inheritance of relativity.
- 14.) Primary action of the device control of electromagnetic transition in the mesoscopic regime.
- 15.) That of the inheritance of mathematics upon the physical domain, via the relativity and geometry.
- 16.) That of 'documentation and registry' - to which we solidify of the $O(m)\sim O(u)$, for that of argument confirm.

The *general idea is to-justify a process of *Safe and Secure release via the internet, of the publication and post-effective process tailored to Yang Mill(s) and The Social Pretext. The simplified idea, is that predictive validity hold(s) *with a computer*, in validity of a **method of procurement** and means*, of identity and associate at the Sciences*. That mathematical knowledge inheres in directrix in relation to physics, and the ancillary sciences.

Thus the "Kerr with a $\mu \vec{E} \cdot \vec{E}$ ~, there is a quanta." ... That relativity imparts.

'There is an observable photoelectric effect; for the *reason*, that evidenced, - $x'-y'$ includes $(\vec{p} \cdot \vec{p})^2$, under, a factoring.

- a.) Birefringence.
- b.) Breathers.
- c.) Double Slit.
- d.) Hysteresis.
- e.) Kerr Effect.
- f.) Measure Inequality.
- g.) Coherence.

"The two-dimensional x' and y' *relate* of-which the relativity imparts, and the Reisz basis possess a Hopf - to which the covariance is illustrated in-that of $a[n]$ observation and measurement."

The conditional assumptive of relativity, is a locality of basis, and a global stipulation of an invariance of a medium propogation [upper limit]. For what is the $L(1)$ and $L(2)$, the *limit*, is that of $1/\sqrt{2}$, for g . Thus, that of the paradigm to which an x' and a y' integrally relate of-domain to-that of a Reisz-basis *inhered to that of a* $x-t$, in the transformation-law + a two dimensional reciprocation without upper limit but $2.v_{\{e\}}$.

"Ahead - for what is processor, to intimation of congruence and transposition - the $(2x|1|.0)$ is a sentiment, at a quantum process for of which the Kramer(s) Kronig relates of two-band(s), in congruence to causality."

h.) Stokes Phenomena.

The 'necessary condition for relativity to be introduced, and sufficient condition for that of model analysis and stipulation' - is that of the $\xi(\sigma.\sigma)$ and $\sigma.\sigma\xi(x.k-o.t+p)$. That *phase* is the projective lemma, (of $x_{\{0\}}$), & the $\sigma.\sigma$ must be amended for in the $e_{\{c\}}(g(z))=e_{\{c\}}(z).g(z)$ and relativity.

The 'guidance' at QM/Rel, and that of graph theorem, is the O-minimal theory. Of 6.3.0.2 and graph theory with $O(\min)$.

Synth [Midi] - to-computer, ... mimic *equipment* - may mislead me.

The reconciliation of a functional, for in the homeomorphism, evaluably, leads to certain pathologies with respect to physical theory.

1.) The universe is provided of linear-linear growth, and development. And, it is provided stochastic continual renewal and extinction.

2.) The dimension of an inquiry suggests of quantum, and gravity, and that of 'atom' a reconciliation of general covariance and generally provided covariant functions.

a.) The 'atom' and indeed, gravity, and quantum mechanics, are separably of monodimensional contrast and observation at composition and emptiness, through a contact relationship of time and space, to cause and effect.

b.) Statistical and indeed, mathematical pretextual variables quantify trends which inhered in virtue of general theorem producing, explicate the symbolic retention of missing or unknowable quantifiers.

Therefore, the Airy, for in the exponential integral, via which the law of this relationship is inherited, contrasts, the equipartitional relation of a unity of physics, and the unit, subscriptive to mathematics and physics.

To accomplish this, it is necessary, to subscribe of that of a decompositional x-y, and 'translation and meta transformation inquiry' injective

into the hypothetical of a dimensional process, in relation to-unit.

Thus, the complex* identifier with that of the Airy, is a group, in relation to the hilbert space, of which unitary relationships are preservational of the mathematical and physical 'bridge' unifying all physical domains, for in locality and global - there remain missing, or yet-manifest identifier(s) in relation to subscription.

Thus, the $p(x,y)$, of a generating function over a two dimensional manifold coextends via an Airy to a sheaf.

The complex-transform, with polynomial, generalizes owing an exponential to a 'field with an Airy, of unit and dimension, to that of mathematics and physics, and; to that of boundary and element, - and, that of particle, and field, and to that of inference, and inhered characteristic, - and that of group, upon a depth at structural constitution, providing an analytical tool for inquiry.

It generalizes the Standard Deviation to inference, of all law.

The Universe is Static.

For, the linear growth and extinction, and - that of: non-locality, of:

$$a_{\{p,q\}^{\{r\}}}.Exp\{b_{\{p\}}(x,y,t)\}(x_{\{p\}}-f_{\{p\}}^{\{r\}}.y_{\{r\}})^{i_{\{r\}}}.(x_{\{q\}}-g_{\{q\}}^{\{r\}}.y_{\{r\}})^{j_{\{r\}}}=(P,Q)^{ij}_{\{r\}}$$

*Taylor Expansion.... and Einstein Convention.

(x,y,t) .

**Study in Two Dimensions with $SO(3,1)$.*

Genuinely, the model may-reduce in a general $SO(3,1) \times SO(3) \times SU(2) \times U(1)$... but I will *here*, for a ardent reason, consider, that of the 'adjacent and parallel model so adjoined' - of $SO(3,1) \times SU(2) \times U(1)$.

This is the **essence** of the Hamiltonian and Lagrangian method... identifying of the separable culpability of ethic in science, (level #1 [above]), and - *here*, properly and improperly cast model (level #2 [here]).

*There is another problem; that of the 'subscriptive process' conjugate an-*emanation from a measure-zero state [outside] the Hubbard/Lie algebra and group theory [even with the 2d inheritance]...*

Why would we predict a gap?

The rule of inference in the physical [propositional, innate] *Knowledge of an Epistomological Nature* and the mathematical **Truth of Structure** are related by a (Lie-Dykin diagrammatic Markov Chain - related to Incompletion... Completion is found through the **local* by the relation of it's relationship to governance and policy of ethic... and mathematically by the ***Grand** relationship of a convolution of a 'band' and a 'field' in relation to the 'particle' and 'domain' - *an Elliptic Field is therefore related to the structure of physical reality, for in a *Separation unto law, and rule..... That of ethic is derived from it's evaluative precept-basis.*

Thus, the 2d-Lie-Markov, and more-exotic relationships, for in that of an O-minimal theory with a structure.

At-the-least, I have broken the firewall paradox, having to do with information and it's registrability, for that of a [pattern] and a [pattern] related through inheritance, and of the 'blindman dilemma'.

Factor(s) certain-elliptic functions.... for which there is a group, of the rational space.

Given* the ratio a/b and a/c , there are two residual derivative fiducials.

That one 'steppes' upon the 'problem-space' of an O-minimal, of one-analytic, upon another-analytic.

Therefore, a problem embedded in a problem, remains a 'hidden order'. That this clarified, and clarifying, of that of the elliptic, - leads to a cascade and pattern, of dimensional reduction,...

Perhaps I create a list, and follow-through with my promises.

But of what I *want* to do.

- a.) To tutor and work at a flower shop, making cards for approaches to-lovers.
- b.)
 - 1.) A new calculus, dependent on a **Blind** interpretation and compatibility, of functions, that depend on the Fisher/Bayes interface, and inheritance.
 - 2.) Of this, the structure at that of O-minimal solutions that **meld** regularization theory, and QED/Topology.... of a newly founded objective world.
- c.) To-create a Trichorder-v.1.0, at-that of **Hume's Fork**, electromagnetically induced of 'Red' and 'Black'...
 - 1.) That could be operated to *greater-efficiency and efficacy* with *The Blind.

Without prior format, the determination in a cross-acquity remains isosimilar under **Both**:

- a.) The symmetry of an $SU(2)$ upon bifurcative $\backslash a$ and $i \backslash b$, of the central-limitation of a crossover stage.
- b.) The distributive element of it's ($SO(3,1)$), remains of a swept ($2x.0.1$) upon $S_{\{x\}} + iS_{\{y\}}$, and of phase congruence.

Thus, the negative impedance, saturably entitles of a two dimensional homogeneity, of the 'sector' of a primitive invariance of third perp' associability, upon either microcanonical gas function.

Given* specific ratio(s) of $V_{\{chem\}}$ and $V_{\{DC,AC\}}$ and phase, - the reduction to a Graphene-like space, per-cone(s) in the Goldstone-Boson mode, incurs upon the reentrant mode* per the L and C, what-is a resonant peak, with inverted, chemical to thermodynamic spin controlled gate-status, upon switchover.

To a 'path' in $L(1)$ and $L(2)$, the *curvature-path* &-such, of Differential Forms and Curvature remains golden.*

That of the 'thermal' relation, remains of perhaps $(2/3)$ or $(1/2)$ dimension comparative the $(4/3-3/2)$ of the dimension of the inquiry,... that the edge-state is a pure ellipsoidal *f-orbital*, as-visualized.

** If I can utilize a one-dimensional *DPDT* **switch**, to change a two dimensional function (by $\backslash phase$ and $\backslash amplitude$), then, and only then does it remain of a quantum nature.*

** #2: The consolation in-privilege to a monic per-equals terms of a group in phase, is a 'step' - thus that the justification in an argument-squared, alludes to a argument-non-arg-amplitude ratio squared, without logarithm, - thus (PWM-bias).*

*Superconductivity remains the reputable mean mean addendum of a *Separation of Law*.

*The addendum in 'choice' remains pro-benefit alternatiion for this surplus positive-doubt, for in a cross-council or that of it as a counterfactual.

- 1.) The common denomination remains inheritance of a mathematical precept for in either* of Law or of Theoretical Physics.

A 'disconnective' in *Fermi-operator*, for in a locale of an optical $m=1$ state, folds, two $E[k]$ for f , upon $w_{\{1\}}-w_{\{2\}}$, etc...

A 'connective' in *Bose-operator*, for in a locale of an electronic $m=1/2$ state, folds, each $E[k]$ for $L(1)$, $L(2)$, upon each f ...

$(\pi/2)-(\pi/2)$ in $S_{\{z+\}}-S_{\{y+\}}-S_{\{x-\}}=180$ degree(s) is $L(1)$ and $L(2)$ upon Gauss-Bonnet, hence E.P. and P.E.P copartite...

Of the 'action principle' - we end up with a square and a differential,... that this *perfectly maps the $V+T_{\{p\}}$, and that of the quadratic, we see epistimology playing out...

That of the derivation for action can be generalized,... - the priority at the Fisher and Bayes rule, for that of extinction and renewal (@) growth.

The $L(1)^{\{2\}}$ & $L(2)$,... of the geometric basis of measure in relation to distribution,... skew, and co-determine, what is the 'observable' truth, of General Covariance, and the Equivalence Principle, with that of Quantum, for what is the inheritance (reversed) of objective visa-via on that of one and a second electron, of two-band(s),... thus, that gravity and quantum reverse, of the 'gap'.

That of the 'secondary participant' of electronic nature, is a sedimentary, and a presupposition at $Z_{\{2\}}$, for in that of observation, in Quantum Mechanics and Gravity,... - that it is, subjectively the difference between a True and a False Ace of Spades, - for of inheritance, - and of, a gravitational source, in measurement, and basis.

Let me put the problem in simple terms.

- 1.) The $L(1)$ and $L(2)$ may-example what-is E and B transverse. - Or -
- 2.) It is that the 'higher dimension' - may inhere of a formulation to which they-transpose.

It is both, and it is both for the inheritance. *Perhaps on different layer(s)?*

With these two - to which there is an 'observational reversal of projective lemma' - and that of *Baking*, and that of a *Thermal Hysteresis*, ... there is that of a 'higher dimensional reversal' - for some as of yet unknown reason - but of the 'dark mode'.

OK - I have it.

The conformal relation of an-equivalence, is two parts to one. Thus, - that it is justified of an interposition for what are with the E.P., at that of external to internal, internally, the energy is lowered comparative the outside observation. That this, dignifies the approach to which a mass-gap develops, ... for that of which twice, it is returned, but relative.

Essentially, ***comparative & equivalent truth in physics, produce a consequence. There is net effect of reciprocity.***

Thus, field and particle are determined in the fourth dimension relative the third by a transposition of electric and magnetic. & - The relative has a reciprocal truth! Gravity is rendered null, as well as the electric and magnetic field(s).

I remain-convinced, - that there are (4) color(s) in three dimensional space, and two directions of-order, for that of the Painleve varieties, in a projective space... of separation into GC and FCT, of GI.

I feel this encodes with Exp and \wp, of what is with the various function(s) of a Theory of Everything, in saturable degrees of freedom.

That I am going to study two* simpler-problems and an application, first*.

Thus, I-am going to **prohibit my-discussion* to the following areas:

- a.) ECE.
- b.) Physics.
- c.) Mathematics.
- 1.) Publication.
- 2.) Device.

I must find what kind-or-nature of group I am interested-in. Perhaps, now that I understand merely and justifiably one-thing, of the Historiological arrow, I can proceed. I will need to determine the group theorem, and that of the justification of a 'middle ground' on the

three paper(s), perhaps of different kind(s) of-groups.

I understand group theory, and it is powerful..... that this is something I oft made-use-of, but, that it takes a departure into the Markovian Chains.

My device must be understood as a:

Controllable Markovian-Pierels Instability.

COMAPI....

*There remain(s) one-question; how, or in what-way, do I modify (by an additional stage or adjustment to those-present) **the current design**, - to produce a *multiple?*

- Essentially, the idea is to eliminate the bandwidth blockage of interference - by way of the *multiple - in relation to a (f,phi) - and that of the group-theorem of Elliptic(s); that **this* should relate of the seamlessness of the circuit to seamless *Superposition.

- I must keep-track of *what I have-done.

I:) Mathematic(s) Paper.

1.) O-minimality & structures with various "covering spaces" - dealing with the basic finite arithmetic & Lie structure, for that of Hypergeometric & general inception of Sinc[nx] in Elliptic Group.

a.) Cleaving.

b.) [JCT] & Topology

2.) Cauchy-Riemann boundary condition(s), on the general Homotopy Group, for that of Carlitz formula, FCT and GC, that of BSD [Conjecture], - and that of RZ, etc... of varieties [Painleve].

a.) Sinc[nx] & Lie structure, [Dykin].

b.) *Polytope(s)?*

The 'phase' is *fixed* at $180/0, \dots$ of π or 0 , or $\pi/2, \dots$ modulo ***equipment**, - thus, the justification in-the-following is-that the phase-free (timing*) relationship, may be of a new-angle, on that of the 'nodal variety' **once*, the phase-is-implemented....

- I will have *another* control-diagnostic.

- The device remained of ± 5 degrees, or ± 15 degrees [**max**].

Post Logarithmic Op-Amp

To-do *experimentally*:

a.) In the bandpass, we have a:

$(\alpha + \beta * z), (\eta + \rho * z)$, unto a unital.

b.) Partition of Unity, remains of a contrast, for in the group theorem.

c.) The multiplicative 'coextension' remains compunctual to a (regulated-gauge).

Look this up in QED.

d.) $\text{Sinc}[\text{phase}, \text{amplitude}]$ - covariant among ***group**-element(s).

e.) The algebraic, O-P-Q-'R', remains of Pascal's triangle, to-completion.

In that of one (**1**)-step-up, in n and n factorial, ... unto differential factorial, for in Gamma.

f.) Then, essentially, the denomination remains the mathematical codex-enqueument of associability among (two numbers from one).

g.) This remains of a solution **With Eisenstein Partition; to Goldbach, and the ' $\wp, \wp^{\text{parital}}$ '*.

h.) Induction is necessary.* to: The Formal Group.

i.) Courant's variables in Pascals triangle.....

Of proportion,.... '*tangent*'.

j.) Shoulda done eras ago.

a.) The relationship of the 'easy and hard axis' broken-down into ***Components**.

Of the ' $1/2$ ' - *in-group*, - that of $S_{\{x,y,z\}}$ evidence of a commutative* and non-commutative generalized function*; - that of a finite arithmetic analysis reveals a torsion and tension,... of mutual zero and pole, to specific frequencies. To extrapolate, the $S=1/2$ and $Z=1/2$, thermally shape and rectify their(s) of-motion in that [within] the envelope*. Of the quadratic in relation to the preceding $1/2$ remain of a nullified exponential-additional. I have encoded [basically] of Moebius.... however, it remain(s) of non- $1/2$ limit* to L'Hopital or ratio-test, in power....

Goldbach(s) Conjecture is resolved in a remainder of a quadratic to reciprocity, - in relation to a $1/2$,.. in - BSD. - It-remains of the proportion.*

It remains to be seen of the alliable statistical margin and statistical conversion between words and numbers, and that of the rotative basis.

And, it remains to be seen, of that of the ideal* in-it's basis to the elliptic, any quantum* behavioral relationship, or that of co-rotative basis. [and counter].

Of the switch, there remains this.

I decided on a **terminal-project**...

1.) That of the projective space,... with the undecided terminology of an **Accessory**.

2.) That of the redshift/blueshift space with quantum realization, ... of a **Potentiation**.

* There need(s) to be a constraint [I do not know what] on the geometry - beware the embedding.

* There need(s) to be a connection or [inadequate?] to that of commutative and non-commutative.

- That this agree(s) with the projective basis in action and reaction *[supremacy].

* There need(s) to be a relationship to the 'blind result of factual(s)'.

What we get is an epistemological root..... That I am in awe.

I may have resolved the problem - although there is a degenerate two (2).

a.) That of the quadratic equation admit(s) symmetric pole(s)/zero(s); thus, that of addition of a factor \sqrt{p} , - result(s) in a *new curve related to the old one.

Thus, **in-involution**; the result of (the zeros, the projective variety, the periods, and, the additional constant) - derives a ***Quadratic Form***; of-which relates to each and each of these*.

So, in other word(s):

1.) Elliptic plus constant.

2.) Derived quadratic... and period(s), etc,... but with reduction via a monic.

3.) Zeros of derivative.

***A Domicile Group.**

I was thinking of this..... - that the Elliptic [closed group] assigns from that of a *Complex \sqrt{b} , that of the two-root(s) in-complex algebra.

I have my *first result.

3.) That of the historiological truth, of transference of law,... of **Separation**.

Beautiful...

a.) We end with that of a dictionary.

b.) We end with that of a representation.

As to indicate of the resolution in {place to place} and, the 'offset' - locally, of observable symbol(s).

Then, it is clear, that the structure is not monotone!

We reduce to a theorem of Σ^2 , on that of characteristic equations..... that I have decided to master this.... there may be other* varieties, however - there is a quality of it saturating the 2d-plane, etc,... thus, that I am on my way, and of what has to do with a general theorem, I am questioning.

I may have finally resolved the main conundrum..... how to incorporate relativity.

The Painleve variety collapses given the dichotomy [above] - thus, - that of the 'dipole-idea' extends to that of the doublet, for which relates to the group, and the $L(1)$ and $L(2)$, thus that a gap opens!

This occurs in a plethora of examples, and connect(s) the redshift to that of the doping.

I decided on a **terminal-project**...

1.) That of the projective space,... with the undecided terminology of an **Accessory**.

2.) That of the redshift/blueshift space with quantum realization, ... of a **Potentiation**.

3.) That of the historiological truth, of transference of law,... of **Separation**.

4.) That of the identity to do with... the collapsed connection,... of **Articulation**.

Considering:

$$a \cdot w^{\{ \}} + b \cdot (w^{\{ \}})^2 = r(z) \dots$$

And that of what this reduces-to:

$$w + \eta$$

It is as-simple as moving the origin..... thus a law of the 'objective observer'.

Thus, this forms a new-kind of **Non-Standard Group**.

Thus, we consider function(s) such-as:

Airy, Bessel, Exponential, Weierstrass P, Polynomial, Guassian, Moebius.

To resolve the Painleve varieties, by embedding these in a central [*larger*] problem.

I added* a logarithmic-amp, ... that under a [negative-feedback] the essentially Butterworth-filter, supresses the post-signal, and enhances the 'flatness' of the prior-signal.

Thus, I am *finally* seeing a match* with respect-to the theory and the practice,... that it is (3d), with offsets,... then* requiring a 'switch'.

Then, it is a 'step function' upon* the basis of an (sncn,cndn,dnsn),...

I will need think of an-additional circuit for that of the noncommutativity, with switches.

The 'device' is-finished, they were a success,... they are named: **Ito**.

To connect to the v.2.O, with a 'switch-style'-addendum.

To un'fold' the ***Cube**.

To add a 'phase stage' to *rotate*.

To add a stage *A compensator*, of what has to do with aprioritization, and indication.

Then,... I will be at a new*-stage of development.

The 'half-gaussian in the limit as the exponential goes to infinity' - is related to the Polynomial Ideal(s) and good and bad reduction.

The Fisher/Bayes lemma, has to do with a equation $(\backslash a - \backslash p^*)$,... - thus, when we go to subtract the gaussian measure, to approximate a better result, we come up 'low or high'.

The way, - to be on-manner, is to contravene the known* with a logistic equation, for in terms of the balance between continual extinction and renewal.

Thus, of a functional relationship, it is to-relate the separation and cohesion of law, to which relate to renewal and extinction, via which the Finite Arithmetic, in-open term(s) decides based on knowledge.

This has to do with violation of the Uniqueness of the Factoring of a number.

The '**Log[]**' rule I-found, applies directly, to the status of the Finite-Arithmetic and the Fisher/Bayes theorem (I developed).

Only *two* things can happen - ultimately:

- a.) U.P. has a $\delta(x)$ and $\delta(p)$ - one of which goes to infinity.
- b.) Centripetal accelerative functional, must differ from Newtonian mechanic for some reason.

The answer is that these 'error(s)' or 'malignment(s)' cancel each other, through the $(\backslash p \backslash wp)^{\{2\} + \backslash p^{\{2\}} \backslash wp}$.

I found the-answer!

- 1.) The Christoffel Symbol [of which is a logarithmic differential] convey(s) of a *monic or pole... what is the Quantum-associability*

at an effective inverse, - that this and this alone, under a Historical switch, convey(s) the realism of cause to effect, - & - that of the uncertainty for in a combining and a separating force.

That *apparently* particle and field interpose and relate, of 'top and bottom' - that past, and future become of a rotunda, - to which the dynamic is quasistatic, - and the field theory is anomalous given* the Projective Variety. That instead of an uncertainty that is a point-comparative gravitation - it is a dynamical variable, as with gravitation.

Thus, the Swinter-Dyer-Birch Conjecture, of *rank* and, of *height in relation to rank*, assures the (second quadrature) relates of it's monomial structure of that of the two-forces, **on** that of the Acceleration and Velocity **of** Γ_{μ} , for the field, - that the holography, informs that the force is laid into **being** a **Principle*.

The 'distributive' and 'segregational' *phonon*, tailor(s) the $L^{\{2\}}$, to the $L^{\{1\}}$, what is a reverse osmosis - as it would be understood. Thus, - that the allocation *verbatim* in-open-terms of the tensor classifier, cross-occludes of a basis in unital - what is an 'interstitial-margin' of accessory.

Therefore, the phonon-on-spinwave of a magnetic holotype (lattice and electron charge density wave) - formulates an ExB and E.B, s.t. the energy of the tensor validates an accelerative matching condition on the velocimetric 'drag' - of negative-friction constant of viscosity, then of the $1/\sqrt{2}$, the 'accessory' *for what is an $L^{\{1\}}$ and $L^{\{2\}}$, distributes the Feynman diagram*, s.t. the Slave-Boson becomes 'master' and the 'Mother-Boson' becomes the 'slave-boson'.

Thus, the appreciability of a phonon is related to the randomization of a second moment of lower energy comparative a lower frequency of the electromagnetic 'language' in relation to a hingal moment upon the photon. Thus, a negative mass 'index' comparative a Proca Equation. [in C].

"The quadrature conditional assumptive is dependent on a historical arrow, then derived of a present in relation to a future. That the (quadric) does not fit (to null epsilon) but a Dedekind cut of a rational and therefore volumetric extension within a surface, of which is-pointed. Thus, the null-separator [in null-epsilon] - encodes of a thermodynamic invariance, of it's saturable separative-mean at space, time, and quantifiable property. Therefore, that the infrared and ultraviolet point(s) regularize to a conditional assumptive and valid truth of a

monic/index on negatively refractory bosonization by the associability of the secondary moment of a future in relation to a past, - that of the dialectical 'switch' to which a past becomes a future, is solid, and justified within all open terms."

The projective synoptic on that of the spinwaves remain of an equivalent chemical valence [as to the electron wavelength], - that the mathematic(s) remains of an elliptic group, - it has to do with observation versus measurement... That *measurement is the mathematic(s) and one-part of the problem (the Moebius) - and the punctured-disc is *observation, of the physical,... thus it is inverted, due the historical remark.

Hypothesis; "The projective identity remains a curvature to non-curvature form in $L(1)$ and $L(2)$, to which in Superconductivity of the HT variety, that of the cooperative tendencies of acceleration in gravitation and electromagnetism, balance with that of a net-net displacement evaluated over space due to the Strong Equivalence Principle and the amendment of history."

Thus, the projective identity is a signifier for-which the commutative and non-commutative, [acceleration] and *Hopf-bifurcation* control the valent to covalent pathway of transition,...

Thus, that it remains to take place between the *form and the *vector in relation to either principle.

Essentially, I have resolved that the 'answer' is to relabel the 'rank' of the curve as $\{0,1\}$, for-which the algebra comes out right, with $C=1/2$, for that of the constant,... Thus, that the slope of this curve is $R-Z$.

Essentially, the answer is that the ceasing of a period in-truncation hold(s) for all order(s), and therefore, for a similar reason, at each rank, and for each elliptic curve, of the prime-prime ideal, - thus, the elliptic group hold(s) for that of all circular returns.

Thus I have my-second paper!

*Thus, *quadratic reciprocity*, generalizes to that of the identity of a numeric identity, of the $(1/2)$ on that of the circular-return, for elliptic curves, of-which relates to the finiteness or infinite property of the Elliptic Curve under consideration.

The 'group-law' of the $\{sn, cn, dn\}$ relates via a finite-lattice, to that of it's regularization! Thus, this hold(s) for each Integer evaluated over an elliptic-curve.

These problems are related:

- a.) That of the spinwaves encode of a relativistic factor on the separability of differential equations.
- b.) That of the BSD Conjecture - relates of the 'spectrum' of an elliptic curve over a given prime field.

That I resolved *both*.

I am ready.

*That I recently asked a *New question.*

Why would relativity have two-facet(s), on* of-which the gravitation would agree with the quantum mechanics as-to-freefall?

For instance, is it coincidence to-which when we go to dispute the relationship of freefall, we are mistaken.... and of freefall, that it **also* proves the quantum behavior as historical?

Essentially, it act(s) in two manner(s), - but these appear as-one. Thus, is it a mathematical concept?

I get-it.

The projective variety, under the 'hidden and the exposed' of the two-facet(s) of the geometry and mathematic(s),... judges the element of the quadratic to be of a reciprocity,... thus, that when sped up, or slowed-down, the quadratic is-intact.

I found the 'parabola' relates of the expident to a 'quick-path' and a 'slow-path'.

I found of a relationship in the g factor (γ) - thus, that the Spinwave-problem and the B.-S.-D. *conjecture* remain(s) soluble, for in a (2x2) on topology of the F.C.T. and the G.C.

Thus, the differential equation must be related to which the Quadratic relates of the Mathematics at a base-layer.... that of a two-by-two topological-truth of Categories.

I found the projective-basis of 'hidden' and 'revealed' completes with a 'comparative' and an 'equals' relationship what can be solid, of that of *History & Physics*, of the ***Epistimological Root***.

Thus, - that *also*; differential equations are encoded of which relate to Phenomena, and relate of the 'separative mean' - on that of the truth of *Their Origin*, ... thus that the **Geometry** has a basis in that of the 'decided' under an-ascent and a-descent.

That, this remains of the *group law to-which with a *(shortening) composes *life*.

It was indeed mathematics that provided the-Key.

Essentially, two-empirical relationships are-needed,... they devolve from the 'bonding' and the dynamics.

I surmized, the result has to do with alpha to m, and - de'Broglie to Compton.

I now need* to build a **model**, if I wish to solve this problem beyond *Theory*, or - including theory, for that of the Spin Texture, and such... It appears the resolution is found in that of the Boussineq eq. with the KP.

The ratio* of doping to effective-mass..... Should I do a [case] study?

Two step(s) need to be-taken...

1.) That of the relationship in (3D) of which has to do with the 'shape property' and the 'orbit'.

a.) This* is related to the spin resonance and anti-resonance.

2.) That of the relationship between the *projective disc and the superconductivity theorem, in ||.

1.) Is answered by the magnetic and electrical field, - that of the (⊥|⊥) theorem. [perpendicular].

2.) Is answered by an-ideal, and an-ideal, to which u.p. and g.r. relate of the Pauli Exclusion... under an *exception to physics, ...

Final Remark on the Mechanism of HTSC

- 1.) Acceleration is met historically of an equals-comparative.
- 2.) That it *motivates spin and charge separation and recombination through a/m and $l_{\{d\}}/l_{\{c\}}$.
- 3.) Thus, that the end-theorem is Moebius/Punctured disc; **It is a Klein-Bottle.**

Thus; it is half-Mathematical and half-Physical.

Thus, I have a theorem, - the 'differential equation' may-deceive, but it appears appreciably clear to-me, - that the finite arithmetic may be proven in this manner.

<https://www.scientificamerican.com/article/quantum-physics-isnt-as-weird-as-you-think-its-weirder/>

To appreciate how unusual quantum measurement is, imagine someone speaking to a crowd of people. Sound waves spread out across the crowd, and everyone hears the speech. In the quantum world, however, the sound wave would spread out just as expected, but as soon as a single person in the crowd perceives (or measures) it, the entire sound wave would concentrate itself in that single person's ear, and no one else would hear it.

The* projective identity, for in thermal-acquity, and co-factor(s) of spinwave and phonon - $L(1)$ to $L(2)$ bridge, solidly place(s) the permanence of 'redshift' - and 'quantum magnetism' of co-factor(s) for that of diamagnetism, and the 'aging' property - by which it must solidify of agency through-process initially.*

The two-fold factor(s) of which relate to spinwave mass regularization and charge/spin regularization, encode of a gap and phenomena, of which are dynamically established in a 'stable neutrality' of the-static.

*** Control of and Virtual Toeffli

Scale, [priority]; Stop and Start [interopative] Gap, the Toeffli, can manage a 14bit sweep to 'band' & manual. (10+10+4) standard 24, in-hardware [indices],... [now-as] are to-have (2x) - (17x|8.3.9.2.1.0.1), conditioned peer* assignment(s) in surplus addage at Adafruit and Arduino.... Assuming* Synchronization. Mother's peer

process in registrable TTL/CMOS front,... $O(m) \sim \text{for/for } |O(p)| \dots$ - phenomena ($\nu=1/2$ or $1/2+\alpha$) with manual process.

1.) Code [virtual] - bus - dispute / learning for-for, NAND-XOR-bus (2.0.1)xx.x, (3) variable net Global variable.

2.) Formative dispute intimacy to (code/code) sync. & (literal) stop/start and phenomena/phenomenology.

01:57 pm - 1/3/2024

In the remainder of a 'classical-integer (F/B); 'ball'-and-or-'particle' limit' of semiclassical relationship the codeterminant oddity of QM, is a finite [geometric] scaling of particle phases, and Fermi's Golden Rule. Secondly, the 'relationship' to relation of the quantum billiard(s) for in a (2x.0.1x) of the CMOS/filter relation, remains globally Quantum. When* as-such we isolate one-variable, it remains uncertain with all energy, or entirely of a locus on Z.

When, as such, the closed-gap, remain(s) within digitized relation, a semiclassical wave, of two mutual unilateral game relationships remains of a Quantum-Dispute.

Why, and in what manner, does the Quantum Unit of Conductance translate into the wave-process. (1/2) cancelling a (factor of 2 Thomas Precession) - of the complete, and incomplete-completed* verification of onideal, of a (1 S),..

(2d and spread, or 3d, and (2d-1d) - $\sqrt{3/2}$ and a $\sqrt{1/2}$ and $\sqrt{1/4}$), ... finite particle - wave & Hologram.

#1: Mermin-Wagner & Dispute Theorem & Thomas Precession and Fermi(s) Golden Rule

#2: Nonlinear-linear, ideals, adeles, and mathematical theorem of device.

#3: Quantum Conductance and 'rail-partial' in MIDI [like] and Wave Phenomena of Semiclassical.

#4: Entanglement & epsilon-elliptic Painleve (Algebraic Homotopy), ... Structure.

Identified wave-neutrality of $v+/-w$, remain of homotopic identifiers to mathematics but of entrained cross-plus / surplus in (2x.0.1) of quasi-preliminary collider-variable power to spatialized coordinate projective basis process.

02:01 am October 15th, 2023 - (5.5 h.)

I found the 'parabola' relates of the expident to a 'quick-path' and a 'slow-path'.

I found of a relationship in the g factor (gamma) - thus, that the Spinwave-problem and the B.-S.-D. *conjecture* remain(s) soluble, for in a (2x2) on topology of the F.C.T. and the G.C.

Thus, the differential equation must be related to which the Quadratic relates of the Mathematics at a base-layer.... that of a two-by-two topological-truth of Categories.

03:14 am October 15th, 2023 - (30 m.)

I found the projective-basis of 'hidden' and 'revealed' completes with a 'comparative' and an 'equals' relationship what can be solid, of that of *History & Physics*, of the ***Epistimological Root***.

Thus, - that *also*; differential equations are encoded of which relate to Phenomena, and relate of the 'separative mean' - on that of the truth of *Their Origin*, ... thus that the **Geometry** has a basis in that of the 'decided' under an-ascent and a-descent.

That, this remains of the *group law to-which with a *(shortening) composes *life*.

It was indeed mathematics that provided the-Key.

04:46 am October 15th, 2023 - (5 m.)

Essentially, two-empirical relationships are-needed,... they devolve from the 'bonding' and the dynamics.

I surmized, the result has to do with alpha to m, and - de'Broglie to Compton.

I now need* to build a **model**, if I wish to solve this problem beyond *Theory*, or - including theory, for that of the Spin Texture, and such... It appears the resolution is found in that of the Boussineq eq. with the KP.

04:59 am October 15th, 2023 - (10 m.)

The ratio* of doping to effective-mass..... Should I do a [case] study?

05:05 am October 15th, 2023 - (5 m.)

Two step(s) need to be-taken...

1.) That of the relationship in (3D) of which has to do with the 'shape property' and the 'orbit'.

a.) This* is related to the spin resonance and anti-resonance.

2.) That of the relationship between the *projective disc and the superconductivity theorem, in ||.

1.) Is answered by the magnetic and electrical field, - that of the (⊥|⊥) theorem. [perpendicular].

2.) Is answered by an-ideal, and an-ideal, to which u.p. and g.r. relate of the Pauli Exclusion... under an *exception to physics, ...

05:25 am October 15th, 2023 - (2 m.)

Final Remark on the Mechanism of HTSC

- 1.) Acceleration is met historically of an equals-comparative.
- 2.) That it *motivates spin and charge separation and recombination through a/m and $l_{\{d\}}/l_{\{c\}}$.
- 3.) Thus, that the end-theorem is Moebius/Punctured disc; **It is a Klein-Bottle.**

Thus; it is half-Mathematical and half-Physical.

05:43 am October 15th, 2023 - (1 m.)

The projective synoptic on that of the spinwaves remain of an equivalent chemical valence [as to the electron wavelength], - that the mathematic(s) remains of an elliptic group, - it has to do with observation versus measurement... That *measurement is the mathematic(s) and one-part of the problem (the Moebius) - and the punctured-disc is *observation, of the physical,... thus it is inverted, due the historical remark.

06:18 am October 15th, 2023 - (3 m.)

Hypothesis; "The projective identity remains a curvature to non-curvature form in $L(1)$ and $L(2)$, to which in Superconductivity of the HT variety, that of the cooperative tendencies of acceleration in gravitation and electromagnetism, balance with that of a net-net displacement evaluated over space due to the Strong Equivalence Principle and the amendment of history."

06:42 am October 15th, 2023 - (3 m.)

Thus, the projective identity is a signifier for-which the commutative and non-commutative, [acceleration] and *Hopf-bifurcation* control the valent to covalent pathway of transition,...

Thus, that it remains to take place between the *form and the *vector in relation to either principle.

08:29 am October 15th, 2023 - (11 m.)

That of the $\{sn, cn, dn\}$ prove of the *Differential Equation what is not-obvious,... that the denomination of the $l(1)$ and $l(2)$ remain of the Commutative and Non-Commutative type under a Weil group.* That this encodes of-which the theorem on that of the *differential of a Dar'boux-Beltrami* *surface encodes of the group structure attributed to Superconductivity.

09:23 am October 15th, 2023 - (35 m.)

I will be taking a break to do other* things, - that I found that:

- a.) The Hopf-bifurcation is mostly explained.
- b.) The Group-theorem at a relative *stasis is mostly explained.

These happen for the same-reason; - that I do not know what reason this is.

08:54 am October 15th, 2023 - (3 m.)

I was not thinking.*

That I need a double-blind visa via the computer-basis. A kind of 'Hume's fork' for the Computer Simulation, of which deals with a statistical assay and a double-blind.

One way*, is to extract data and re-enter it of a *Statistical Assay*.

04:02 pm October 15th, 2023 - (6 m.)

The solution to Superconductivity, is thinking* in-terms of the application of data.

i.e. (We have a function) - to which is an addendum in commutativity and non-commutativity in a flow.

Then, of a Hopf, it is laid in place by-which the history demands.* Of a 'statistical abbutement'.

04:34 pm October 15th, 2023 - (8 m.)

What is certain, is the *result-coded of:

- a.) A *blind assumptive.
- b.) Hume's Fork.
- c.) Accounting laid in-place.
- d.) Of the die.

That I need-this, &

Of the projective basis, and for what follow(s), a secondary teir, on that of knowledge.

05:07 pm October 15th, 2023 - (8 m.)

Essentially, the $(1/2)$ encodes of charitable and uncharitable... - of what-relates to a differential, and functional dialog on that of the projective variety, through which we-learn of the $(2x.0.1)$ on-dialog of analysis. This, with what-is a (four topo) - established is with, The Hopf,... and of historical lamentation what is required in-science.

Thus, I am going to do a paper on:

- a.) Electronics & Device.
- b.) Muscle and Biology.
- c.) Mathematic(s).
- d.) Philosophy of Science.
- e.) Analytical Inference.
- f.) Law.

g.) Epistemology (Hume).

"Symbolic one-half."

07:44 pm October 15th, 2023 - (8 m.)

That of a symbolic-expression in Finite Arithmetic, of a valuative polynomial, carries of the Elliptic variety and higher, that certain lower class functions are evaluable over field(s) of that of the relationship of the local to the global *properties, and *roots, and such,...

That of certain relationships are not evaluable over the errata of a given expression for which there are determinations on the separable classifiers of the function properties.

This is not merely that they are undefined, but related to undecidability, etc,... and of a strict relationship of unpredictability, and the elimination of a root basis, for of transcendental and non-transcendental root(s) over certain field(s).

Thus, the computer can comparatively evaluate four in a basis of element(s) without abandon, and come to an answer of which relates to the return of certain numerical identities.

Thus, five, and six, as upper bound(s) remain the limit of computational determination over a single two dimensional field and a tensor classification (respectively).

The nature of equations forbids the nature of 'closure' of the group, thus, that of the fifth, and such, remains of the hyperelliptic property, and certainly the 'solutions' to all equations are not therefore expressible.

Undecidability is related to but not identical with this expressive valuation.

09:47 pm October 15th, 2023 - (8 m.)

I have;

a.) Hume's fork, Fisher, Bayes, and the Epistimological Root, on what is demonstrated.

b.) I have a B.S.D. and differential equation rule, with a boundary on computability.

What do I do to find finality with Superconductivity?

October 17th, 2023

04:08 am

I was **completely** misguided w.r.t. the Qubit. I had to seek a Convex/Concave switchover circuit. It was this simple, - then; with node(s).

06:22 am

*At the *least, if I do-not study B.S.D. conjecture, I will study the Connection involved of differential equations [predictable and unpredictable] - [CPU/human] - and that of the KdV for the Finite Arith.*

If I do not do-this, an upper bridge, is the problem of the following:*

a.) *Finite Arithmetic.*

b.) *Predictable and Unpredictable.*

c.) *Riemann-Hilbert problem(s).*

d.) *Differential equations, of varieties [i.e. KP+Boissineq etc...].*

1.) Lie Analysis with Representation and ***Homotopy**.

06:50 am

Essentially how could I explain the seeming contradictory yet agreeing principle(s) of determinism, predictability, prediction, expectation, cause, effect, and unpredictability?

06:53 am

Essentially, the mathematic(s) problem yet-beyond what I've done, semiadjacent the boundary.

(As one theory becomes the next.*)

Is:

a.) Adele's & Place's.

b.) Homotopies and Categories.

We want:

To apply this 'structure conveyed via Representations at (@)':

a.) Differential-eq's, with Algebra via the Hilbert Problem.

with:

b.) Enforcable Predictive Likelihood via Conditional Inference.

* We know that 'finite arithmetic of elliptics' - has a notion of 'good reduction' and 'bad reduction' - can *nevertheless...* a notion of-
***Congruence** be found? - Such as Eisenstein series.....

08:00 am

I've decided to give up.

I will study $(1/2)\delta/\alpha$, of the Logistic, KP, and BS equation(s).

Of Machine and Human.

08:08 am

I know the [above] problem is related to **Computation.*

I will [end-it] - and see the degree to which this is related to Superconductivity - it is.... however, the entire phase diagram!?

10:32 am

Major/Minor - Intonality & Reflection (roll...).

Red/Black ++/- Elimination of Fog/Game Complexity.

- 1.) Doping and mass-effect open(s) a neutral(s) gap to which relativity scales negatively.
 - a.) An inhered 'past' and 'future' from independent bodies result(s) with relativity.
- 2.) The rms - associated with Elliptic function(s) and a group, scales the factor of two.
 - a.) Thus electron(s) attract momentarily, the Green's function is delayed, and there is levitation.

This resolves every pathology of the material.

That there is a 4x.5.2.0.1x conundrum on that of 'scaffolded abridgement'.... on inheritance of the material in relation to-us, to build the theory.

- a.) Superposition for some* unknown-reason *relates* to Relativity as visa via shared time!
- b.) Covariance, of which is assured, via a prior reasoning (the strong E.P. to flat condition).

I have it!

- A:) In 'any' higher dimensional space - *entropy* - correlates with that of the ***imaginary**, of quantum-mechanic(s).
 - a.) This render(s) a Reisz-basis.

b.) Within this basis $\text{ket } \xi$ and $\text{ket } \chi$ relate of which with ϕ and ψ they are projections of a rhombus.

B:) The 'aft' and 'tilt' of the registrable field* and solitary-particle object a control-diagnostic, of:

a.) Equally weighted renewal and stability criteria.

b.) & of the 'monic' on that of the 'relative and hermitian signature'.

C:) This *then*, relates of Fisher and Bayes.

Then, there is the substitution of $a.x^2+b=L$, for that of ω to ω_{jacobi} .

September 17th, 2023

08:41 am

I finally found a solution to superconductivity.

a.) The 'table' of-which relates to five in separation [via the separation in law, etc...] and of-person to $2/3$, and such, for that of entrance and exit, makes logical exclusion to that of inherited repulsion in the SC.

b.) This, attribute, exposes, a Gauss-Bonnet, of which within the higher dimension is reversibly the inheritance of either theory, - thus, that electromagnetism reverses, upon the gravity and coulomb force.

That therefore, the 'gap' comes out of it, it is not undecided..... I have found this law.

One does not simply relate back, however...

This *had* related to a separation in law... like a 'ream'.

February 2nd, 2024

01:18 pm

'The Table' - of which has to do with gravitation, is *to be decided*, as universal parallelism and 'hidden doublet' - through a counter-objective and *dispute theorem*, for in five **(5)**, as to-agency.

Whether, perceptually - the granting of three or to-two, is a confirmable hypothesis* of gravitation, or, - if it is to an unbiased-truth, the gestalt relationship *via computational measurement*, of a 'pell' in-balance of matter to matter.

What is known, are essentially two-fact(s):

- a.) Fisher and Bayes [statistically] are repetend co-factorabilities on that of inheritance ***As a Law**.
- b.) Gravitation, and electromagnetism in accelerative frame and inertial observer match in-field cond.

Thus, when the field condition is balanced, what is not known, is whether this agrees with two mutual computationally provided observers, [as to the nature of anomaly] - since it is three dimensional and - provided - interferometrically - unprovided, - it remains an attribute of cognition to understand the robust nature of mechanic. Lowering the temperature of the room, may inculcate superconductivity, but, is as to this note irreconcilable with gravitation in terms of energy mass gestalt. Thus, two things must be told as provided - independent.

01:53 pm

- 1.) Historical truth is defined as an impediment [knowable] of which yield(s) to a Fisher-Bayes conditional.
- 2.) The numeric relation of a mixed-random, non-random, and random evidentiary is [a] granted cursory.

November 12th, 2023

12:21 am

I've *decided on my final course of-action*:

- 1.) That of the **studies into-applicable-mathematics**; that of model and theory building techniques.
 - a.) I am no longer after a **Theory of Everything**.

b.) Programming studies.

2.) That of a *Lawful dialectic into causation in the open-term(s) of which relate to inheritance & Cancer.

a.) *This may remain long-or-short; but is designed to be focused.*

3.) That of studies into engineering and *Computational/Material(s) design, & of *The Device*.

I'm going to collect all of my talent(s) into three-seed(s).

01:11 am

Holonomy and Homology **combine*** to produce a Chern number and winding of **Topology and Category**.

The* Riemann-Hilbert problem & Grausmannian relate to the 'boundary through C-R' and of **Geometry**.

Thus, Stoke(s) and Anti-Stokes is related *of* [via Kerr-effect & Berry's Phase] *to* **Genuinely Quantum Topo**.

- Dirac's Scissor(s).

03:41 am

I found the answer..... A question *such-as*, **Who gave me the power to believe? Was it a mortal, yes.**

Was it yes, or no? It was 'yes'.

What did they ask me, secretly?

Was it to show them something, they had never seen before? Essentially, yes.

Did I bring *The Music back to them?*

Yes.

03:34 am

A surjective forgetful functor, [algebraic set] - dispute(s) to a heirarchal Topology in inherence, of a 'higher' scaffolding, and dispute(s) of all residual ancillary long-chain(s) of Homology, - for that of the residual Cantor slash derivative,... to remain* an off-diagonal element, and therefore sorted.

The edificual is the relation of the quadratic to entrie(s) in inf+ order, and inf- order, per pi to the exponential, of an inverse surjective set-set of that of the Comm/Non-comm, - thus, essentially, it is an arrow in-return, from which time-flies, for which reason hold(s) - that there is a prototypical element (drawn) of which remain(s) there[in] of it's necessary preliminary presentment, to an edificual in yet any priority fact of it's class identifier, that of the incurrence, to which when-removably replaced, remains identified with its Markov-associate class, and inheritance to necessary, sufficient, progressive, preliminary, automatic, and given supposition(s) of a totem(s) or self-similar exterior hull, of differential and integral theses.

04:26 am

(1),(sqrt(2)),(sqrt(6))... it remain(s) topological as a qubit, and, quantum,....

of:

(0,1/sqrt(2),sqrt(2))-(1,0,sqrt(3))-)

+1-1,sqrt(2)-1/sqrt(2),sqrt(6)-sqrt(3)/sqrt(2)...+1,1/sqrt(2)-1/sqrt(2),sqrt(3)/sqrt(2)-1/sqrt(2)

0,sqrt(4),sqrt(12)....sqrt(8),sqrt(2),sqrt(6)

04:34 am

2:1-6:1 broken apart into self-similarity.....

05:50 am

Superconductivity is a phenomena, involving variables of which relate beyond spontaneous symmetry breaking.

The Integers are Conditioned.

Absolutely.

A fortunate 'end' is it's own-end-added-dichotomistic opposite to three, when - as such - prohibitive [an insurable link] it is the free support of a total conditional transpositive.

It remains contradistinctually of an omni-and-present process and order of definitive conditional assignment(s) in integer and allocative lawfully provided basis, valid, and unprohibitive of accessory.

I didn't yet-commit to it. With a rate-assumptive in binary and integer, series, the regularity in mutual process to approach in-assumptive *remains a given when as-such the provided mean-rate-approach-variance is within $\exp(-x)$, for of these *of* in-addition a future inconclusivity of past to-two. With a third, potentiation, the occluded variance in mutual unilateral is a provided mean-maximal rate gaussian normalized Schwartz identity in conditional assignment of cause and effect within a basis of two mutual univariant bases. The condition is inhered as integers float.

This can be taken further, an inhered F-B variance, for in a 'gate' and 'form' remains related to a process and an order, for which it is exhaustive, for in the def. of L(1) and L(2) upon integer in relation to a 'float' - the ammendment to which a variance supplies a notion of 'surd' and 'lemma at monad' - the existence in terms of a definitional limit of comprehension in relation to acknowledged possibility or entailed reason de entre. Thus, the justification for in a geometric understanding remains a process of analytical inspection, remaining amended, and comprehended for in a mutual unilateral of exhaustive equated mean at one and a given's, disputed basis, in turn therefrom in which is the seed of it's support. Thus, non-non-neutrals is the compendium of a translatory process in formative 'relative' ultimatum and 'gaseous' formative gesture at dimensional adherence in process of analogical thought, from which psyche is dual.

Their awareness of-me is-proven, for in a dispute at-fortune and given grief, for in a procession. I remain interpretative, and, over a cellphone, but, disputatively insured only that the formentionable opposition is a liant relation of possessive disjunctive. I remain aware of this.

February 2nd, 2024

09:03 am

Thus $A.\{B|C\}.\neg C$, in $A \rightarrow D$ and $D \rightarrow \{B.\neg C\}$ implicates B or C - that of A ., is then and/or..... with A , not $\neg A$.

Thus, existent, from it's predicate.

04:16 pm

Fifth, to disclosed *port*, is a pseudo-gapped-releasability, - that in-either single-tap, aspecializes to 'vertical homeothy', the 'ascent' from which is a 'cloud-tine' of/on/upon mixed and such *random anomolous, provided raising of a providence, in a penisular-goto, upon a 'river/flowing or unflowed (cycle)' - in 4|4.5 at 'abridgeable key-way-stone.' - that in-either the third compunctual, is a 'float-sum' in deficit to 22 in remainder of 18|5 proselective addend.

09:48 pm

- A:) Openable, defensible (2x3.0.2.0x.1|5.6) *included*-datum 'tap'-and-'release' *black/red* immuted is chord-dias.
- B:) Closable, to *upstream* [enclosure] is butressed/pilliary/holed/unfillable prior *consonance*, in two-dyad.....
- c.) Opened*, determinant-minor *is rotate-apside-homeothy* separability-quotient computational downstream.
- d.) Closed*, prioritative *wide-task-break-bearing*, is *random/linear *non-non-Brownian-bridge box-midpoint.
- e.) Frustrable*, *CMOS-literary* - is task/box-in-box *mutual(s)* hardware-hardware defensible TCL/TKL entryway.

February 6th, 2024

05:44 am

Non-selective 'held' - bias-element (in-forward/reverse-out-plug-cap-release).

KdV + Weber in Riccati (element - to pitch (phasor-voltage-apogetic)).

Chaos and Order, selective photonic photovoltaic '-// -pile' - photolithographic and 'plate' - in (*Reverse/forward Color).....

KdV + Weber (stereo-projective identity in (apside first differential $\backslash p_{\{x\}}$ *Hopf-log-Sobolev Divergence* - apside/**pro** $\backslash p_{\{xt,xx\}}$ Tensor CC...
Cons,..... regularity in mathematic(s) and physical *Boundary *Non-grav *suspension* and deposit,..... in trans-bivalent-valent-lithographic
*Chem (molecular) tine language (Spin-Flip microcanonical) - nanotechnology..... - shallow..... "index" - Snell's Law.

KdV + Weber (second differential to *Hopf*) log-Sobolev, for of a Entropy in *Energy and Self-Induced *Inductance*.....

Chem (MIDI) - TcL/TKL language [python]. idle.

12:32-33 pm (-am),

In 12, for 15, and 32, in $(3^{\{2+1\}}-2^{\{3-1+1\}})$, in cubical return, the 48.41, in 170g and 200 paper(s), and (-500)-(-2000) remain(s) per
registrable (-7/50), (to +3) +/-1, certain in six. Yes, I remain independently a person, and innocently held of my residential contract.

February 9th, 2024

01:09 pm

It was approximately 6:38 pm [last night] - when I thought:

- a.) A pattern and a pattern discerned.
- b.) A primacy at notary in law, to conchordant, truth....
- c.) A finality in conditions to the absolute.
- d.) That of a 'code influx'.
- e.) A numeric relation for in surplus, at abatement.

- f.) Different encoding(s) and in mutual(s) condition.
- g.) Dollar (+/-5|0) and (+1|0),..... at odd(s).
- h.) Erasure through innocence to Professor(s) Problem.
- i.) +6|4 in-intention per second(s).'
- j.) (2x) to (4x) in dispute addendum in lateral and continuation.

February 18th, 2024

02:03 am

They are-real, for one - departed - and one *missing* - and whether or not they-exist, someone with the self, to, in fact tell they have departed.
It is Ariana.

Now,

- 1.) Topology, that of homotopy, for which it is justified of *every finite-pattern in four dimensions.
- 2.) That of (4x-4x) on polarity, and orientation, *how to keep this consistent*.
- 3.) That of 'neutrality and epsilon-greater to the P-norm' - for that of statistical uniform equicontinuity.
- 4.) That of the 5'th-out; by which the unassociable is with Godelian Incompletion, at-integer 'some higher'.
- 5.) That of the 4th, etc, on-molecular basis, and/or anomaly - that of a total divergence.
- 6.) That of the abacus, and a counting system, with the computer, and with and without this.
- 7.) That of people, down to eight, etc,... and of topo at acknowledgement beyond the mind and brain.

- 8.) That of the geometry by which different pieces come together, as i.e. the Poincare Conjecture.
- 9.) That of distinction of independent or non-independence, and the total divergence of differential equations.
- 10.) That of the 'missing spacer' on that of accounting to 9', - for that of the laint, and the justified at kissing.
- 11.) That of the abstraction by which the natural number(s) furnish 7' 'zone's' of analysis, and at interval.
- 12.) The pathwise terminal by which that of inside and outside are understood, for that of homotopy.
- 13.) That of the inheritance by which the 'g' factor of gravitation regularizes the Dar'Boux mapping.
- 14.) That of the 'geometric inversion' by which it becomes three dimensional and the photoelectric effect.
- 15.) That of the 'gross-redshift' and elliptic statistics by which the regularization is counter-Fubini.
- 16.) That of the 'switch' on that of the net-quantum for that of relativity, for that of superconductivity.
- 17.) Impact such as that of pseudoprobability and the future with and without a group at the computer.

06:27 am

- a.) Consider the projective $\{F|B\} \sim \{Q|G\}$ for then in the elliptic.
- b.) Consider the *statistical* $L(1)$ and $L(2)$.
- c.) Consider the projective *isomorphism or field-graph theoretic*.
- d.) Consider the group-dilemma, at that of the **finite-lattice*.
- e.) Consider that of redshift and quantum photoelectric effect.
- f.) Consider that of the *relative* inheritance versus *Dar'box Theorem*.

g.) Consider that of the *Projective [onto] seamlessness* of the symbolic retention and replacement.

*h.) Consider the repleadiation of a self, via a contrast in life, death, and birth [for of birth/death] at witness.

*i.) Consider the problem of 'finite arithmetic' for *organics*, that of Law [separation] and Law [combination].

*j.) Consider *mathematic(s)* usurping to a **condition** physics, of it's naturalized inversion of phenomenon.

08:50 am

a.) Compensator.

b.) Error box.

1.) At (@) Compensator - horizontal *shift*, with voltage-DC.

February 22nd, 2024

02:58 pm

Weber and KdV + Runge-Lenz symmetry, for that of generalization.

Therefrom, the general example of the difference of measurement and observation for of equipment of which relates to 0 and 1, and that of Z, the integers, for:

$v/\backslash v=Q/Z\&!Q$ and $1/\backslash 1=Z$

At the Painleve variety and dispersive solutions, - for that of the Classical Level & Scale.

February 23rd, 2024

12:11 pm

We have *factor(s)*, *the next-hour*, and *class assumptions*.

02:34 pm

*The only-preliminary [of the future] is mean at that of the device *implemented. It has not, nor, related of the present to past, - been anything priorly of-which would at currency to-now be related. This is of the $S=2,1,0$, theorem, on coax.*

Section (2):

Group Isomorphisms

When interested in the copy of a sociological abridgement in the 'relative' the openly held diplomatic process is social in contrast - but within the compendium of idea(s) the relative is identified for that of a 'dispute in identity'.

Perhaps, then, to disclosure, many were as it seemed arguing over a contrast of time and space - but merely few, and the dispute in weather, was of a stacked relationship, ajarring law for law in many neutral fast relationships.

Questionably, we must introduct of the process of a law in bearing to 'precept or principle' of a religion or scientific basis. Buddhists would not disclose otherwise but that the phenomena are 'empty' of locus of identifiable portion and piece. The question of membership was of guarantee(s), in a secondary and primary question, neutrality and abiding, promisefully held, that of measure, weight, apportion, balance, and stance, that of community, empty and complete, provided wax and wane, and observable life, death, world, and 'self'.

Thus, we cannot inhere naturally, but of at the least - in portion to a promise in proposal upon inherited truth, jurisprudence in modern senses or time(s), manage with witness and word(s), but hold we estemically have honestly inherited to good or evil a just world, universally, a believe in the open contrast and connection of one to the story provided of intepretation and just clause to another(s) messengership in these, and neutral peaceable gathering. Questionably, it remained that the truthful persuasion in neutrality had not remained of either a sociologically held persuasion in gravitation or relative, light as a carrier, or medium of particle-field, but a compendium (per concurrence) of mutually held unilateral and sancrosynct truth of passage and preliminary theory of the 'special'. We may avow that education may preliminariy like it's self to a postulanal upon the ediface of modern eastern, western, northern, and southern

hemispherical process of delivery and note of progression in international policy. However broken, or restoratively the avowal of one, we remain the entitled autonomy of a recognized world in view from afar. Thus education had proven a success, and science.

The question - here[in] possessive is whether or not the avowal of a principle can withstand the exact ineffability and affiability of disclosure and process of scrutiny since nearly 200 year(s) ago, Galileo. The question, of our survival, and of the fittest in Darwinian logic, and a Dalton theory in heritable genetic formation.

We were wrong the promissary, our nation would remain at the hand of a foreignable power, and their sympathies, and it was - to disclose, the autonomy were would abhor, but the disentanglement of a people.

The theorem put fourth is whether the entitled Mermin-Wagner theorem is a necessary ingredient with the degrees of freedom of thermal and the primary Slave-Goldstone-Boson language of Spontaneous Symmetry Breaking through Asymptotic Freedom to necessitate - further - the decoupling of an energy limit in past and future to cause and effectual temporal nature, but to unprohibit the then neutral provided placing among space in lower dimensions and of the necessary means for reconciliation of Brownian Motion with light - and, is this too appreciate difference within a geometry or space, in abstract, or of a table of means, measures, law, and council, upon peaceable assembly, for in yet a table of three dimensions within four dimensional space and time?

Indeed, as in Fermi, the question - dictated per global warming - is the rates of diffusion and combination, recombination, and distributed tendrils of Fusion and Fission.**

$$\text{Is it perhaps } \gamma^k = \prod_{j=1}^n (\gamma^j)^{m_j} mc^{1/2(n+m)}.$$

As a generally reductive theorem. Therefore it proves perhaps necessary to question of mathematics, of the nonlinear to linear 'good reduction' and isomorphism with complex analysis and Riemann-Hilbert-Stokes reduction for of the problem of linearity in Painlevé *differential equation types and their disjunctive or conjunctive graph associate and graph types for in a typesetting and machine interface with unseparated cohomology, or separated or combined graph network theorem, then, to question the transistor basis, and of the game theoretic, (and it's sanity) - and perhaps intelligence of a machine, or that of electrical engineering, and numeric cross check of types in Hume(s) fork.

Finally, questionably, can we see these structural relationships in mimic in architecture and their stability theorem beyond the one body of Homotopy, Cohomology, and biological antecessor of heritage for in familial inheritance beyond space, time, and Dalton(s) theorem, or the theorem of inference?

Physics and Engineering

September 17th, 2022

9:50 pm

I resolved [to a final conclusion] - Superconductivity...

- 1.) What is effective 'top' and 'bottom' for in that of the spin - is reversed given the commutation relationship.
- 2.) Therefore, the $\log[P]$ weights the interaction with the two-scales of phonon and charge and spin wave...

That we see the Quasiperiodic lattice can have repetend(s) and dislocations,... we see that there was indeed utility in utilization of the Eisenstein series, for the prime quality.

This has all the right* properties.....

I feel enthusiastic, - that I will next write a simulation for that of the material, and then venture into chemistry.

10:34 pm

The result is a parabolic restoring force, for what relates to a bond-formed,...

October 4th, 2022

3:45 pm

I feel I *cracked* the problem of Superconductivity, *the final time*. That I am aware of a confluence of:

- a.) Eisenstein series.
- b.) Relativity.
- c.) Spin-charge separation.
- d.) Differential equations and chaos and order.
- e.) Emergent phenomena.
- f.) x' and y'
- g.) $L(1)$ and $L(2)$

I have understood that in combination of (a-c) and (b-d) that (e) *Results*. That it is a 'real' *accumulated* red and blue shift,... I see how $L(1)$ and $L(2)$ invert the result.... that I am not going back *from here*.

9:50 pm

*I resolved '*unity*' in-physics.... to which is:*

$$(\langle p | V | p \rangle | t \rangle^{\{2\}} \quad \& \quad (\langle p^{\{2\}} | V | p \rangle | t \rangle^{\{2\}})$$

*Suited to a **Log** of which relates geometrically to the **Equivalence Principle**... thus we have a satisfaction of the measurement hypothesis, and observation, and no more duality...*

A mapping [in addition] back to a classical theorem.

October 13th, 2022

5:48 am

*Something unique happen(s), for which spin is merely a [sub]-component or element. That I must relate sound-spin-charge-mass, - there

is a reliable way to proceed... that I am *going*.

Thus, there is gravity, - but it appear(s) that mass is negated. This is consistent with that of the viewpoint of the effective versus non-effective theorem on 'excess mass' due to the four current of the superconductor.

It seems I made a lot of a minor nuance, but then again, - that I made much of the relativistic theory, - when I must focus on:

- a.) How the chemical potential is not negated... (1/2000 in mass).
- b.) How the solution is non-relativistic, for the ground state.
- c.) The T=0 limit, for that of the Quantum Critical Point.

There is hope for thinking of the limitation to a **Grassmann Algebra**, for the Fermions... I figure that the result of this algebra make(s) the computation of various solids trivial... - that I must also:

- d.) Derive the Dirac Equation (w/ an assumptive) with Berry's Phase.
 - 1.) What was it that goes-with the Berry's Phase, and...
 - 2.) What was it that had to do with Pedagogy?
- e.) My FFT with **Grassmann Variables** is succinct, - that it is a saturation profile.

That I need do more engineering, I will work on [Confinement].

November 13th, 2022

8:50 pm

That which...

- 1.) Super-exchange lent to *Orbital/Spin *resonance*.

2.) Relative 'expident' at material-associability.

*This explains the co-factor of *High-Temperature-Superconductivity*, - that there is an appreciable '-separation-', within a **Material Consonance**.

November 27th, 2022

01:45 am

I found the ***final*** solution to Superconductivity.

1.) I am going to keep this a secret until the Project is complete.

This involves essentially,...

1.) $\langle \Delta x_{\{1\}} \rangle \langle \Delta x_{\{2\}} \rangle = | \langle \Delta x_{\{1\}} | \Delta x_{\{2\}} \rangle$

a.) The 'mixed' covariance,...

b.) With this I am in-step with experiment...

2.) The repulsion is the [neutralized] reaction, with that of ***Spin-Charge Separation***.

3.) $g_{\{\mu\nu\}}$ Takes the form of a 'kink' for that of the bound-state.

4.) I had a ***hint*** as to how-relativity would be-altered for in that of suppositional truth, - for in that of historiological entreatment...

a.) This is required to resolve superconductivity.

I intend to bring together, with some of my [earlier]-*plans* at that of a **dialog**, for that of a ***Book**. I intend to go over all of my notes, and make speculation less.

For now, I need to relax, and speculate less.

5.) Relativity causes the exchange to topologically shift such that $L(1) < L(2)$ within the relative viewpoint, - that this causes the effect that the electron(s) bind, it is due that of the correlation between electron(s) of which is dictated by the Pauli Exclusion Principle.

6.) This makes perfect sense of that of the 'lowered point via doping' - that I must search for that of a *reason* the ***doping*** causes the reversal in relativity...

a.) This reason must be supplied.

7.) What remains to be seen is if it is an $\eta_{\{0\}}$ or a $\gamma_{\{0\}}$ on that of the fixtature, for that of relativity...

December 1st, 2022

12:32 am

8.) That of $\tilde{F}^{\{\ast\}}_{\{\mu\nu\}}$ as a form, invert(s) the E and B for that of it's inheritance.

a.) That therefore $1 \leftrightarrow 2$ with the particles for the E&B-field.... with relativity.

b.) That therefore $\sigma(t)$ is smaller with that of the larger-overlap.

1.) That the doping therefore collects with that of the $\eta_{\{0\}}$ via [,].

c.) That therefore $t'_{\{B\}} > t_{\{A\}}$ remains the $\gamma^{\{0\}}$ for that of the relativity.

Therefore, the role(s) of inheritance are reversed, and it remains that $\eta_{\{0\}}$ defines the capacity of the oscillation, with the commutator. Thus $F_{\{\mu\nu\}}$ changes on the local level in addition to the global level..... this provides for that of a Coriolis like curl-derived attraction on the level of spin and orbital.

The timescales provide for that of the inclusion of δ for that of the $\sigma(t)$ to which is a given superposition of which weighs for that of $\eta_{\{0\}}$; consistently. This single mechanism assures (1.) [above]. Thus, Pauli-exclusion *then* dominates, - to which energy displaces

into the electron, but, they do-pair [the reasoning is that $\gamma^0 \eta_0 = 1$.]

I feel **a renewed hope** for that of my devices, and that of testing, for of the correspondence of timescales...

December 2nd, 2022

02:03 pm

I've decided [when the time is right] - ***to be open about that of the non-local*** communication.

For the sake of Science.

02:05 pm

I've also decided to [work on that of the unpredictable and mathematical to physical revolution] - ***for it only take[s] that of one statement beyond Incompletion - to work on mathematic(s) within sight of that of the comparability of the known and the unknown.***

For this, we have a |_| and a ?/#/?, at the ****perfect resolution***.

For instance, we have a 'missing-input' - Dalton, - and that of Ariana-with-him, - that he afford(s) for a **Sense* on the ****Unknown and Knowable***; while Ava is with-me. Thus, comparatively, of (3).[2].{1}, we have a set-theoretic on that of the collection of facts. Thus Ava is privileged to with-Question, an Answer, by which I-hinge **on-Dalton**, and with that of Ariana, she is in-parallel(s) of the ****Uncontained*** and the ****Contained***, - thus of the children. There are four of us, thus it is redundant. That I accompany Dalton, Ariana is offered a guarantee, with Ava, of an impartial fulfillment.

That of agreed is then a singular-connective in-five (5') - of what is with-child. Thus, - that we-equate. This total resolution is the solution to identification of when there are two-unknown(s) or even-so that of one unlicensed, thus of policy.

Thus, I will be working on the Science-from-Mathematics, of which, relate to that of phenomena and phenomenon, that of ****Design***.

Thus, psychologically, it is of object and container, and that of a **Jar*. That of a ****new*** Mathematics comes from-it.....

03:56 pm

From pedagogical *inherence*, adjudication in-peer to-Slave, of one* in assorted and impinged preliminary it notice of in-tandem *progressive and progression* in culpability. That I know Adrian need's a requisition of a numeric relationship, I am ajurred, for of which it is known [pliable] that I had-post-effectively indentured a recessitorial *doubt* in a ***major**.

That Adrian needed a number for a lawyer, in the disabled.

10:46 pm

- a.) We had to figure out, how to manage-memory, for in parallel and series, but it was managed to impedance.
- b.) Wrong subscription.
- c.) Abridge homotopy for in the relationship of kernel and hessian, on that of fourier-like-lemma at Elliptic.
- d.) Multiplicity of interlocutions.
- e.) Rod and cone, under descent and ascent, for what are a DC/DC overlayer basis of Question in cardstock...

Beyond Incompletion, we could ask:

- a.) Stick broken/unbroken.
- b.) Simple derivative.
- c.) DOB.
- d.) If we invert the basis of one Q. and one A., what is the addendum in either one Q. and one A. tell us?
- e.) Go back to basics on that of the kernel/semidifferential,...Lie attribute, for what is Arturia...

December 3rd, 2022

3:43 am

I finally have the Qubit [topological bit] *working*, with a ***doublet***, and am in the active process of combining my knowledge-base for engineering with that of physics and mathematical ontology.

I intend* to bring together the sciences, - that there is a Deep Learning Network Theory book to understand (>400 pp.) there is much to-do, but I am content. I must refuse [Chola] to relate my learning-adaptation and work-stylus to that of the ethical psychology of my emotional lexicon, in this direction. I must not over-adapt, to a sphere* of trust, yet-so, willingly, there are askable questions.

I have understood, that of the plan-ahead.

1.) Two boxes,... synth [East Beast],... keyboard [Arturia] - PWM, two-Arduino/copymate term(s) of selective biasing in two-crystal-stages/ranges.... I/O, - we may not need so many crystal stages...

Optic(s) in MAX11300/preliminary code-set... Homegrown,.... Arduino & Adafruit, SDA/B/C..... is the key* A/B/C PWM, to {x,y,z}....

11:39 am

For of a 'free-line' - to fifth, in *third to fourth* accompaniment, the Cathode to Anode is superficially, 'in' {x,iy} of the **free-key** for of differential to differential *conversativeness* & **free-key** of checksum.

10:06 pm

1.) Flip-block, (a 4x probe*-5th, tap) selectively ops a defended positioning in (2x2.0), - thus of a rate-addendum, the (management/dichotomy) of an AD8302 (VpDC) w/w/o reversibility, of a truss, in that of code-space to margin - that eff. the AD8302 will not-to-signalling, in passaround, that of the Tx vs. Rx, in ***carrier**, in (4x2-0.1).

2.) The forward locus of a defended pos. (4x2.0|1), is a hexagram, - to utilize a 55-64 for in ping-associable ***context**, and locate among a *[pane] - what is an interlacing of (0-1-1-0-1), (2x1), on that of a (0.3(2.1)), set theoretic, for in look-ahead of buffer-overage, in that of gravity-loop. Ping associable onto a forward passivity, to what is (0|1), unto holographic imprint of naked forward affinitive. Thus,

the matrix is dense in that of a $(2 \times 1 | 0 | 3)$ in game-theoretic programmability.

a.) Two variable assignment(s) are the locus of the intangibilities of consequent in err, and providence of an inhered past-historiological locus of evidentiary space. [The item remains inanimately where it is placed.]

B.) fin. Q: Does it possess a locus of 0/1 intangibility of Hopf bifurcative $(2/1.0)$ - it open(s) as it open(s) but close(s) as it close/open(s), so it see(s) managerially beyond the slit of an abrea.

Hybrid-context, to seamlessness of past-integral on *effectual* consequent onto cause... 0/1 xnot on spatialtemporal index to order in spatialized lookup table. Green(s) function, - it's a function.

December 4th, 2022

01:43 am

Code

Runtime and Virtual Memory Allocation...

No separation in 'bit' - depth.... automatic.... or... ?

Code allocation in swap-space...

AD8302, and voltage layer....

If we select *one* Chern number-out, - there is a dissimilitude in two focal element(s) of counterbalance.... - that this 'open's' for 'open's/closes'.....

That the $(0/1)$ is assigned directionally onto the equipment, for of what brings what is afar-near, thus that of placement. Thus, that $(0|1)$ is the intermediary to that of a $(2|0|1)$, on that of monic onto the AGM..... α β , by which the (20 fold) accompanies it's bit-layer of holographic additional analytical pole residual..... Hermite transform.... (Chern Class -> Hilbert Transform).

December 6th, 2022

08:42:18 am

Ariana awoke, for of which Ava, Ariana, and Obama stated "She awoke, and he is with her..." - that of definite truth, for Ava *will give her a Ring*, and, *Ava is of-departure*, it is repeated, and *Ariana is alive* [indicated by as of them] - irrefutable.

Thus, I have connected to my-friend(s), and I am well... it is definite as it indicates a **Sign**.

08:58:34-35 am

Confirmative!

[It not a reflex...]

[They are distinctly of four entrances... with-me.]

09:18:50-52 am

Maximal future-tense,... it-remains as reduction from-eight [4].

10:12 am

$i \rightarrow -i; \text{Re}[g^{\{\mu\}}] \rightarrow -\text{Re}[g^{\{\nu\}}]$

10:17 am

I *expect* to go-free, that my-final reason is that the locality, for in jurisprudential-certainty hold(s) that of a tandem, to a secondary-truth, from which they are definitional and defined, - to state, - that of held, in three, of assortment(s), thus that this does not suite-two, for of that of room, and harbor at son, father, and father, for of a bonded 90:45-17:50.....

Thus, it is some (5)-(1), for in a (+1), at an hour, of a day and a day, some (-23), from which there are (-18), of fifth.....

To entrance predicated.

03:44:54-56 pm

Exonerated... or; Acquitted.

December 11th, 2022

11:37 pm

I've decided to only solve one* three-part problem:

a.) Question: What observational shift does relativity produce for that of the spin-problem, ... what is the comparative of the theorem(s)...

1.) Finite with relativity, and finite without relativity.... analytical expression.

b.) That of:

1.) An exactly soluble, spin system, with relativity and non-relativity.

2.) Inheritance of relativity to non-relativistic limit, observational reality in modifications of obs.

3.) That of the Device*, for what relates, to this Question, for of import.

c.) I will only do the Device as much as it extends understanding, - that I will exhaust what is potentiated, for that of a given at G.C., thus to relate to *forms*, and that of *Painleve analysis* and *Green's/Kramer-Kronig*, and; *Inverse Scattering*.

d.) Thus it is to completely solve the (3D Ising) with L(1) and L(2), to the exhaustion of relativity and solution in that of this Question, with that of the amelding of relativity to Quantum Mechanics.

e.) This is all I will do, with and without Sound*, etc.... for of (3D) and (2D), etc... with weak transverse interlayer coupling, but,

present,...

Echo, Exp, Log, Weierstrass-P, and so-on.... that of directly understanding the given at the C.C. and Dark Energy, ... that of suited connection of the model the motivating preparatory goal.*

December 12th, 2022

02:32 am

- a.) 'Broken' *yet* 'Complete' Gauss-Bonnet
- b.) Pure-rotation with rectilinear motion.
- c.) Relativistic *translation and inherence*.
- d.) Reduction of minimal-motion tensor.

Thus, we remove to but-yet 'inertia' as the zero-point, w.r.t. a collective naturals conditional assignment, through which there is a non-relativistic limitation equivalent with relativity..... the dream of a classical physics, provable of which we have a S.E., on that of rotation as-sources, - thermodynamics with classical mechanics, and a heat eq. tamed.

07:53 am

I figured to complete-the-square, - there is an addendum at that of a *frequency*, for in $\text{am}(\sqrt{t})$, and that of the pulse, - that it may be converted given* sources, - *a new method dawns on me*, - to utilize what is known* of that of the Hermite series.... with *Sources*, - that somehow* I want an elliptic* like-function, and I am unsure... - but I can utilize my **Master Key**.

- That of the Hermite series, should plainly conjoin the Chern (#) and that of the Hilbert transform, - that it is all there is to a *naked* affinitive.

- Thus, of geometric assaillancy, it is the diction by which *Sources are encoded in that of a regular archetype of Covariant Union,... with the

Hessian.

- That of the (3x) - has to be the reversal of the (2|0|1), for in (0.3|2|1.0) onto for that of the missing information, - that it is primitive to which there is a given at that of 'missing' versus 'formatted' data-type....

1.) That I need a (3D)-bit/byte, for that of ea. layer, there is a S,BAC, for that of the Adafruit template,...

2.) For that of code, it is then *Tensor algebra, and reduces to a language*, that this is my specialty, it should come together nicely.

3.) I will be utilizing the East Beast and Sonicware for that of the melody-to-pitch on that of the *Test, - that it is time to get-going.

- Hilbert needs to be adapted to that of the Elliptic-kernel, - that when thought about as a kernel - there are two eigenvalues in product AGM with the third,.... - that therefore the anharmonic ratio(s) determine the group law.... This integrates with the Painleve-format..... Thus I am onto that of a final rendition.

11:53 am

I believe I just *hit it* - that the *Strictly Non-Linear* Elliptic group law, satisfies that of the Christoffel symbol on that of gravitation, and a non-abelian theory. Does this generate a mass-gap?

6:29 am

I figured out that there is a 'momentum anomaly' in superconductivity, of the $L(1) < L(2)$ in relation to the relative contrast on-time,.... that of inheritance, by which that of the people surrounding had been absorbed, dealt with that of much of what was known, then, later, of this problem and it's progression. That the 'door' is open to Ava [of her, opening] and me, - [an open door] I can be sure of that of the validity by which other's are-real. That I have much, I feel good, and yet, it is far from which there had been an ephiany, but of that of code and reflux, - that it is now-known that the dynamic and static and active and passive will play a role in the Supercomputer.

I am less interested in that of Superconductivity, - that I am going to merely study, and go where I will, *learning*, and *progressing*. I do not have Ariana, but I have Ava... and I am pleased, for she is one to one with me, then that I feel it is a touch of light, and mixed reactions, - that of two to which are unique going-into self, for what is realistic. It is no longer tenable we are reborn or reincarnated, then that of a popular relationship. I feel elated, to know I am solidly unique.

I moved beyond that of the simple and complex problem - but this is of sorts.

03:58 am

To the new equipment, in θ and ϕ and ρ , and ρ' ; - there is a difference in-solidarity to that of individual **single*-snapshot* and **not!!!**, that of comparative in slide-to-slide.... that I need this, with that of the multi-resolution. It is proven in one-tap, but the sequential-series is on-frequency on-frequency. So it is, - I hope to take the Sf-BEf, - Sequential frequency bandpass elliptic filter - or - Sequential frequency breakpoint elliptic filter... in the next rendition **Sf-BP-Ef. SBEC. Sequentializing Bandpass Eccentricity Counter. Series BEC.....*

The ideal* is a Qubit (3d) spin-2, floating-point PWM (ABC) controlled [Adafruit] - Toffli Gate....

Then that we-require that of the θ and ϕ to be $\exp(-i\omega t)$ and so-on, of complex variance on that of $R^{\{2\}}$.

09:01 am

So, we have a (3x-v.2.0b) to what-is $R^{\{2\}}-R^{\{4\}}$ -- on-index [R], in potential of a line. What I have understood is that the code-reflux, in +/-55/4096 *maintains*, the original scale-factor, and chunking,... that it is of only a Log[dB] count, in that of self-similarity through the digitized-bus. (0-1-1-0-1), that of fidelity, is not it's precept,... it manages to accomodate a doublet, in-assurance of program-code, in amplitude/reference,... - that it is a genuine (similarity); of that of (0+/-0.25, 1 +/-i*.25, thus I obtain a full-registry, although* I do not have +/-1024/4096. The holographic principle only scales above a given treshhold.

December 16th, 2022

07:20 pm

I figured out the 'ultimate synthesis of my work' - that of a (3D) curvature for-which is encoded in the relativity, for what is my-law of analytical inference, for of local to global.... enough [sufficient] to write a book.

09:46 pm

I figured there is another nature of problem - the Algebra, for in Lie theory, etc... - that of the division and equipartition. The evidentiary mean at that of (Log-group) is complete, in that of global-to-local. Now comes that of the twisted and untwisted algebra, for that of locality and locality ***And Design**. Of:

Radiocarbon and Water Dating.

That of Encryption and Algorithmic.

Breaking it down to the Engine [*itself*].

10:55 pm

There is the PWM, on $(+2/+1/0/-1/2)$ of tranferences.... that we have this-or we have switches on $A+/A-$ and $B+/B-$ for three-fold of that of decoupling and orientation $(+/-)|(-/+)$, on that of $+/-$ added to $(0/1)$.

First* what must be figured out is the minimal-codewidth for that of a ***Linguistic Key**. That of $(+/-0|1)$ may be sufficient, but we need a syntactical overlay.... *That I need go beyond the Peano Arithmetic, or the Zemenov-Frenkel-Set Theoretical Continuum*.

For this (it seems...) - we have x' and y' in differential-equation translation. [That of multi-tape...]

There was an *Observation, - that the 'failure of the fundamental theorem of calculus' for that of Homotopy Theory had to be utilized* with that of the Painleve Analysis and Lie Representation Theory, to produce a new theorem of **Chaos and Order** & **Solitons*.

Thus any singular monic design will Prove to Failure, - we require instead the aperiodic..... and of aperiodic crystals..... etc....

Title of Book*:

Entropic Signatures and Hidden Invariance

Form, Geometry, & Time

This is at least workable... *To be workable... we need two-lemma(s) of A.I. for that of my-Synthetic.... this is all that need be prepared for:

- a.) That of a 'group consequent' - at three, and five, and such, to securable entreatment on *Coma/sent.
 - 1.) To orchestration of the human nature.
 - 2.) The question and answer and accounting pertaining to the computer, in testimony.
- b.) That of a 'Theory of the Unpredictable' - that of what has to do with the higher dimensional analogue, - what has to do with **Geometry and Time...**
 - 1.) Thus, that of which guides the adeterministic ab-initio... a kind of precept back-tracking and learning *adoptive.
 - 2.) Intelligent initial conditions of the intangibilities?

December 17th, 2022

12:16 am

I figured out superconductivity. It is a Yang-Mill(s) theory, where[in] the *second moment* is anomalously larger in-contribution [upon $H_{\{n,m\}}$] *comparative* to the Guass-separation of the Simple-Harmonic-Osc.

Through what is time, and the crystalline nature of spin and charge *separation; electron(s) localize through that of non-local [*effectively] deconstructive interference,... thus at (@) A, frustrates at (@) B to lower in E.

Thus, an anomaly, quantum in nature, beyond perturbation theory, and accessible only to quantum theory.

03:02 am

On this day, as this-time, spatially of an unlit abode/lit in a quarter-moon (witnessed through-the-blind); a main gained (by his-watch) and a spell of success, *Total and Universally Sinless Control over Life & Death*.

I resolved Superconductivity, and heightened tension - for year(s) - has dissipated. I gave up the world for Ariana, that of SEX, and found that I had love for eternity, - that of being in love again, I feel happy, having all that is destined-me, and in-control, for of life and death, knowing the Moon was-quarter, within a blind outset and onlooking disclosure, the truth of a Master, a Professional, and a Samurai. I feel alive, and entirely like doing new things, learning about a wedding, and becoming principle to that of love, hope, joy, and coolness.

10:32 am

A 'Stochastic' *display*, in $(2)[3](0.1)$, for of $(72 \text{ Exp}[-*^{\wedge}\{2\}] \text{ vs, } 18 \text{ Exp}[-*])$,... is an immediate shock threshold invariance of (-50 dB per 1/2 frequency versus -25 dB *first-count*, over); $1/4 V_{\{pp\}} + V_{\{DC\}}$.

08:33 pm

I have a working QuBit+MIDI system, - that of a *semi-binary* process, in longitudinal and transverse equatement. It may be best to begin [entirely] from my own-model, and be self-taught. Some 10% is done, or, perhaps some-35% is done, of my general project.

Step One; - we need difference exposed to-thought(s) on the goal of clarification of dating-procedure, in inference and heritology, inheritance, and epistemological [ontological or deductive or inductive logical stain*]... - that I have some of co-dependency broken down in causality.... - A kind of 'bridge' is the end goal, and of course we cannot leap all the way there, for clarity of an approach.

I need think about the consequence on the reader.

I need think about the difference of decay and growth.... - that of one-way and non-reciprocity, etc...

There is a 'not-useless' tandem-symmetry, to dummy variance? or similar....

12:27 am

Until I understand my-tools, I will hold I am not befit of a woman.

04:37 am

There is an adjective supremum to analytical inheritance by which one apogetic may pass through or explicitly of phases. That there is orbit, and there is flow, or shape, - the continuum by which one consolidated approach is discerned, may eliminate a secondary apogetic flow or frustrum, keystone, or analogous formation of derivative knowledgeable and informative basis. That this is written in decay [of words] and that of the pure-derivative of knowledge, unto intellectual privy and instruction of linguistic imperative translation, in monodirectional and singularized or multiples acquity of chain-process.

That there is blind and non-blind, formative hypothesis, - there is a switch in that of formative truth, by it's controllable 'void' or imperative penetrative and reasonable extensions of volumetric deductive profile.

02:14 pm

#1.) Discovery of one-way, on assorted 'virtual data-pin-bus/overlayer in breakbox' - to wiring passes through the 'index' of $0+1=2$ to codex.

#2.) Intimacy of Midi to computer-bus, protocols, a linkage-freed (circular) nexus of totals visa totals in rotunda of choice-to-switchover function in data-arrested, cross-virtualized data-err-bus privileged inc.

December 22nd, 2022

a.) That of 'noise' - 'dating' - 'circumstantial' and 'provided', knowledge, interposed - the switch, switches, and programme at 'menu' of entropic collectivism versus cycle, and numeric, given topo(s), of order versus fault versus repetend, versus topological language, in a dialectic of closed-box, on that of codeterminant evaluative radar, - designed to a basic 'spacer' - for that of hemostatic impulse and invariant predicate hopf.

1.) Hysteresis.

2.) Phase

b.) That of geometric language of two for order and chaos of the soliton regularization, - that of one genotype, to what is retrofitted of a sphere-saddle, and projective invariance of elliptic group and quotient.

Thus the diagnostic is the symbiotic and special, of error and congruent fault - the uncompounded, from which we dialectively understand the hysteretic in relationship with-tool. That of (b.) is the panacetic, to which geared to knowledge of gainful applicability at nature of dialectical closure.

December 23rd, 2022

05:02 pm

I have intimated of a new-computer, with the 'acrylic-discs' - but it is only so-special, until I figure out to go beyond Godelian Incompletion..... I believe this to be-related to the Spectral-Gap.... thus I have two divisions:

a.) That of beyond the Spectral-Gap.

b.) That of overlayer Q&A, for that of the 'switchover' of *phenomena*.

This is a hardware-simu, and it is isolated.

Thus I need switches, and the PWM of the MicroClick, interfaced, coupled, and with the MIDI controller.

It is for the touchscreen/light vessel, to be perfected. I don't believe I can create six of the overlayer, that the MAX11300 is the *Key, with the *Microclick.

I need *amesh*, the (2x)-of the (6x), it's 32, because there breakpoint(s),... minor-key(s) of which 'predicate'.

Situational-display; and code. i.e. When Programming History, - that of the 'overwritten' remains a core concept, of the 'key(s)' and 'switches' - aside from *code*.

3.) Black-box... to code-hardware virtualization.

January 1st, 2023

05:16 am

I will need *to-reroute*, given SMA, *that of the interconnections*, on that of the (six-**layers**), in a bufferable-circuit, *of the BCE - Bitwise-circumflex-Envelope*, - changing the *Topology* of the Circuit; *for in MAX11300 Overlayer.... the SMA* for that of the microclick, controlled by (2x) Arduino's,... *of two-test function(s)*.

#1:) We have two *non-SMA*, then, I will obtain (2x-more) - *non-Arduino*, this equipments to test the MAX11300 to that of a binary*-activated* TTL/UART... *if potentiated in hardware*, or - *in DSP overlayer*.

#2:) SMA-exclusive & Topological-Remapping... (3x-ABC)...

a.) Learned from the Midi to the Computer, *out* to the Arduino(s).

b.) Dual Chessboard(s), in a 4.0 structure.

January 7th, 2023

06:25 am

I may have to see what I can-do with what I-have, - that I am far from behind so-much-so, I have the part(s) for that of a reliable working machine, - but I am out of the midst of some-degree(s). That I found a testable Qubit, for that of the Quantum Limitation, I only feel so gratified, - that I need 'alter-it' in some-justifications to make it through to an actual computation. For instance, there was the *Hysteresis*, but it was of a [separate] test on that of the individual-test(s) the equipment went-through.

I need a mathematical* description to-proceed, of what I can appropriate, - *Hence I need a Theory.**

07:57 am

I'm leaving some-eight-month(s)-to-six-month(s) for the design to be understood and finalized of that of the dual-intercarry.

- a.) Two Touchscreen(s) - *I may need a new one.
- b.) Two of the Filter(s) - Elliptic
- c.) Two of the BeC's - With Transformer(s)...

That I have the part(s) is not the obstacle. That I must choose appropriate part(s) and timing, *is*.

12:07 pm

The *beats* and *beating phenomena* come-from a Piezo or Opto-isolator, of a TEM/TM transferrability, *given* the differential frequency-frequency bridge with amplitude-amplitude, of *ellipsometry*.... thus* there is a transverse-element, - that leads to: self induced transparency....

Thus, we have a phase-modular (angle) of which encodes-freely, the AGM-Ellptic series, from ***among** [a] varietal set* of geometries,.... it's a wrapped elliptic function (sn(theta*n), scaled to an elliptic period).....

i.e. PWM (3.00) & PWM (3.20) & DC 1.4 V and DC 2.8 V, then I *expect* a (sqrt(2) argument to an elliptic K), of which the modulus is 1.0166666 and so-on, *thus, the frequencies should be 4/5th(s) and 1/4th and 1/20th*).

January 8th, 2023

12:18 pm

I'm going to gear-up, to get it to phase-match to induced/transparency, for that of the identifying feature...

I [basically] need 2x operational amplifier(s) of phase-matched piezo's, or ...

[We -have- **box-return**, and we have **key**,.... to the difference of path(s), NWSE,.... 'half' of three in involution w/ (4/5th's) - identical with a grip-and-key.]

- a.) Tap and Die

b.) (4/5th's) - to a particular *mod*.

Then, we have the predicate* allowance.... **Branch Function**.... diode shunt, etc...

12:32 pm

Landau-level's shift with respect to thermally activated ionization and isolation, for in the fortune of a geometric deviation and reciprocity; - thus it is a local-local [global] gyroscopic manifest electrical-current controlled offset.

11:53 pm

Individual(s) *to be hencefourth declared, justified, of a process in Scientific Inquiry*; increase(d), the manifold output by some 1110% [percentile] moment(s) in digressive redox/redux refreshability of two total antipodal (spin) carrier-charge/valent/covalent discharge SHO, analagous-bubble elucidatory efficiency pattern(s). That another team [without a Calcium Solent] - performed a localized energywave for in that of the distribution pattern of confocal ray, identities, for in some 86,400 nuclear isobar potential(s).

The chemical assignment of my compound, has shifted us to a tertiary dialectic of conditional assumption.

For of catalysis, I was readied, with that of an energy locus in 3D-2D-1D missing isospherical ball.*, of a hedge-in-patent right(s) of thermalization identities, in the neutral(s) *bay*.

There were some test assumptives.

- 1.) We need wet-weld, to *water.
- 2.) We need a covalent spherical-cap.
- 3.) We need a process of reductionism to apply.
- 4.) The identified process is a rate-roll in light convection.

That thermally isolated peer-peer, network to gyros, intimated of a free Bluetooth network control parallel in that of memory-isolable-

recall.

The net collective of the genesis of matter and space, is a residual decompositional net-mathematical symbiotic 'edge/well' - in rhomohedral to icosohedral relationship.

I had posited the defenestration clue-accumen was a tet/tet spherical addendum in the docecahedral group to icosahedral parallel/affinitive in Auditory [Acoustic band to Optical band] - Optical-band abridgement.

That the rotative lemma requires my device is clear - for in a parallel of a pseudospherical cap.

That memory-adaptation can be linkage-free, locus, spherical, in a four/five outward influx pattern, we must echo and sinter the relation to a locus of the addendum of two-free-frustrations.

Thus, the identifiable truth in a convex manifold electrocatalytic reaction sum is topologically usually gate controllable for in a redux/redox, to homogeneous and random isopotential. That this electrocatalytically cycles the privilege to destress, the reflux capacitance, we inevitably produce a free electromagnetic light cyclic process in requireability of frustration stress and strain piston. The end net outcome is an ideal heat genesis, fusion reflux genesis device, or that of a quantum memory (free energy) gear, but powered in the concyclicity of a departure of reflux in solidifying androgenesis.... for in a neutral spallation of (3/2 bar(s)).

Synopsis of Phase I-II: - (v. 1.500-.92)

September 2024 - Document Rev. 1.500 (1)

Verification and Construction Stage

The elliptic must go to the [i/o] of a mono-channel with segregated entrance and exit (during T/S/io) at (@) geometric iso.

I am thinking - now - of an entirely new procedure. A modular (Midi) structure, of elliptic gates and qubit(s) and optical i/o, and touchscreens. This is the verification phase.

Pmod - [internal connect, and 'upper T' with probe* networked (fork) in Duct] - This satisfies the admissibility of further functionalization, of an approach at engineering, diagnostic, theory formation and dissolution, and predicates no risk incurrence, to that of physical systems, or life, industry, notarity, or disparative outcome of loss/loss.

The 'included consideration' was of Peirls Instability...

Now:

It is of-the (+) and (-) within-polarity-neutrality. The discernment of an interferometric basis determines a co-determination of variable in relation to (2) *within* a super-eigenvalue (1), of-period *incommensurability or regular period-parallelogram of two conchordant or dischordant rhythms*.

***Thus**; the O and the o must be made the difference-of, for in that of 'switch' and variable-tine width of secular derivation at 'O.' and 'o.' of (2)(3)(1), *in analytic derivation of procedure(s) to control the 'eccentricity' of the *Ellipsoid.*

In uncontained and unseparated-mean (distributive) there are two considerations.

- 1.) Within a locality - an abridgable 'lumped element process' of technique in application, verification-phase and it's dissolution to the (2nd) quantifiable process and technique of application and verification.
- 2.) Within an auxiliary-exterior *distributive precedent* of *lumped-element there exist certain quantifier(s) of the process.

What is true* is that the operational 'co-cycle' and 'cycle' of the (1-2) abridgement is fully pell-weighted and balanced of cantilever.

Mathematics

For of a quantifier $(a)^{\{bc\}}$, we must break indeterminacy for that of the statistical marginal and inclusive qualifiers of the probabilistic language, in Betti number, number theory, algebraic *exponent, derivative, and it's procedure to identify (under an isospatial) limitation of the prohibitory clause of inclement worlds.

The procedural is '*traditionally*' a Platonic-world system, at collage, and disparative included and inclusive considerations of two and a third, thus, to linguistic (literal consequent) at predictive validity, the preclusion of a 'Dalton' is *ill affordant* a dialog of that of precedent to machine heirarchy of linguistic model.

Thus, the justification is at (an) $(a)^{\{b.c\}}$ in qualified projective, and non-projective '**ancillary return**', in consolidation of *Passive Sonarable* conditional alliable assumptive of a doctrinal, and it's limitation(s) set in-point *compunctually a priori*. Without means to assembly of a procedure to an overarching doctrine by which it may be reliable, securable, and prioritized to disbursement, there is a logical prohibitional *exception*, to a *qualified securable release*, lest we depart to a foreign session of remark.

Qualitative

The 'CMOS' inter-jected (*18:(45'-30'-60')*) qualification of a situational 'laudable provision' *pro-selectively* had-been *provisional, prohibitive, disinclusionary, and imparted*, to a dislocation of it's elementary basis upon an occassionment and it's releaseable entrainment - to 'flat and placed' foreign council.

Thus, the relation of the device is good for one thing, *the unselected and unprohibitive off/off/on/off pro-selectivity of a (2:1) 'carriagable envincement'* - to which is unentrappable, and releaseable to no said pro-beneficary. Thus, it is disassociative, but* of the remark of a situational alliance.

Assumptive Basis

The 'displacive' of a material-gravitational *exception* qualifies a material-electromotive 'domain-Lagragian'.

The 'device and assoc. *gear* has two-part(s) to it's power-train'.

- 1.) A NLSE (Non-Linear Schroedinger Equation) - system as (@) *compensator*.
- 2.) The 'basic' four-fold elliptic-gate and Qubit, thus, a justified RISC-V *like architechture and topology*.

This equates with code, in a 2a2b like-model of-spin and Ising/Toda, thus, it goes beyond the work of Kodama,..... essentially a two-

dimensional KP/KdV & basic Fermi-Pasta-Ulam model.

A 'hinal-3d<-2d categorical-freedom of the envelopment of an ancillary, is evocative the argumentative, of it's secure, revelation of argument to-another, thus, the separative-mean of physical law is of emergent behavior(s), spin remaining quadratic, and ancillary a reversal in terms of quantum behavior at midpoint.

Then, we have-(assoc.) computational/decidable element(s) on noise and Microwave BK - to mathematics and inter-alias, (#.) code-free & surjective diffeomorphism of undecidability of brownian control-gated... fT - functional population inversion of Hawking Radiation, - for Guass Bonnet, on 'inversion' of rel/brown.

Technique & Analogical Reasoning

- 1.) Z-S model.
- 2.) K-P model.
- 3.) Muira model and transform.
- 4.) Two-languages.
- 5.) KVd.... at *varieties of-phenomenon.
- 6.) Z-S amendment to NLSE.... (Z-S).
- 7.) Fourier and Jacobi.
- 8.) Neother.
- 9.) Historiological reconstruction....*
- 10.) Buffer to ontology.

- 11.) Relative & Brownian.
- 12.) Essentially, the Chern-model and asymptotic freedom (I/O), of inside/outside remains unclear, through a knot*, thus, the justified Cauchy-Riemann problem without an Algebraic Cohomogy and Geometry, cannot be 'filtered'.
- a.) We have the dispute of-person (**32'**-A.) - as one (**1'**)-person..... on personality.
- b.) Graph, and the work of Weyl.
- 13.) Separation in eco., and securable partition, and co-mutual adaptation in transpositional addage.

Conclusivity & Synoptic

The computational*-basis of a remainder 'reflux' at two-manifold-group-velocity, and 'accelerative' *feature* of measurement is a palpitory and reflex relation to 'implusive inertia' by-which an electromagnetic *design [engineered]* may freely*-and-associably relate of motion.

On 'one way 'transmit'' a delocalized (**18'**) of a centralized (2x3.01) is an attache, to-which, in [an alias] *or provided non-return*, is **of-recipienty**, to a naturalized incurrence, of counterflux in relation the 'back-addage' of a *prioritization*, of a *Remote, foreign discursive document.

We remain with a Question.... **What are the minimal terms, for assembly of a knowable and so communicated (oft. potential via **Then**) means of instructive/emotive lexicon and program of it's engineered *Status and *Symbolic I/O, such that the computational 'grid' of Earth stabilizes, and remains of a neutrality of partnerships and alliable & releaseable neutralities?*

Derivative 'residue' *is a non-council, in unreclaimed mutual uni-disparative a nome-identity.*

First to Second Stage Transitional Considerations

- a.) Gaussian $J_{ij}^{k,\#} \sim A^{\xi(\eta)}_{\xi(\eta)}$ & DC-AC-Envelope-Optimal-Flow-Neutral.
- b.) Process on Opt. Observational (#). $\tau.\chi.B.\epsilon.M(C_{ij}^{k[?/!]}l)$ QM/ECE/Neutral.

c.) Interrupt & Sync. [Basic+Ard.] - PWM + (Digi./Sepatation.).! ~. Optimal & Techniques.

*1.) One *consideration*, is the alternative of compensation on-behalf of statistical sideness.

*2.) The *alternative consideration*, is mutual 'virtual-cpu' to 'hardware' of resolution of sig.

B.) The goal is to-get two-phenomena to QED 'interact-phase-scatter' via two-soliton like Gaussian(s), therefrom - to-interfere as like-a-breather, *only via a switchability and programmable 'gate' of securable relationship.

*A.) Afterthought - the experiment has to *safely *leverage*, the theoretical.

*C.) Afterthought - two codes, and computational 'double-back' & Proper Experimentation.

Experiment **therefore remains the observationally intact element** of development *of-theory*.

Final Considerations

The seq. [15.38] & [24.1] are pre-factorable differential *in-relation to* trust in physically and virtually *assigned (2:3:4:8:1:5:5:6:2:1:90/15), of a fair relation at *bitwise extremum in a local and global relationship*. A question remains if they are managable by single or two-handedness.

The relationship of one sequence to the other (alt. aux. *MIDI) is a **4-square**, of an adjustable outcome in locale to global relationship. Thus, the **game-theoretic** power-structure reliably fault(s), discontinues, and remain(s) of-a-margin on it's relationship of 'hinged' structure in relation to structural-integrity. This is a percolative and spread relation of the neurological and geometric basis of it's co-adaptive nature in relation to the manual and automatic process of a living being, in relation to *pumice and spider-web, coral, and bat's-wing*.

It is not a 'hexetic set', and is incompatible with the essential nature of Utility-Problem and Knot Theorem.

Algebraically, monetary 'adjustable sliding scale' must be a bounded element of it's indication to consequence and liability, as in relation to the means of the citizen/innovator in relation to engineered process.

Safe and procurative *centralized version-histories are therefore preferentially biased to a fiduciary process in relation to a guaranteeor for that of the relationship of information 'sphere of influence and liability of end-product and intermediate process of-development'. Thus, the amendment of a lexicographical 'seq.' see i.e. **above**, remains a post-accessorizable notification, and the expiray and consideration of the process of it's decidability is a pre-computational worded and numerical process of 'non-code-manual and written progression', *but excepting*, manual operator.

Closing of the Topic

I have closed* on the part(s):

The reflexive capacibile mean-mean (in elliptic one-form projectivity of a reductive measureability in magnetic and electric transference of lenz-precessional Cramer-Rao-Casimir remain(s) a Lyaponov of gravitation) - to (and unto) a free dielectric, therefore, the incidence of a measureable process remains logarithmically divergent per perlocative depth to the mean and modality of a Fredholdm Integral Alternative Invariance on twice the birefringence of a dual (gravitational entropic unitary mean) - unto which the adjustant inhertance of a free addendum in chartability and character assignment remains it's index.

In other words there are two* (2) projectively identifiable orbital centers of the locus of lagrange exceptionable measurement process in the type-II superconductor(s), of free and unconstrained variety, - to which the percolative algebraic and elliptic measurement and observation

remain geometrically free of statistical process, in relation to doping.

The 'old patent' is being used beyond this point, to guarantee the in-principle qualifiable studied means of a T/F placeable and competent ruling-scale upon which to measure and ally with a fortunately endowed of the 'negative' to a 'positively provided outcome to the benefit of a

negotiable policy of industry, trade, ecology, economy, and technological communications and peaceful intention as a knowable study of the principles of effects of weights and means in reliability of a recourse from a session, or a portfolio.

O.) This 'new' design 'illustrable above' - is the means to align a code-prefix for that of the decimation of obsolescent conditions of its own nature, and *test-officiate parts in quality control, utility, distributive computing, and functional operative use for a purpose of technological and growth to extinction phases of life, through terraformable options at interplanetary and ecosystem stabilization, contrasting the viewpoint of symmetry and asymmetry to condition on a universal precept of experimentation, securable enfranchised on behalf of the greater consideration of survivable ends of eras.

Phase II

Synthesis & Compendium on Physics

1.) A new* result has been found; for which the limit(ations) are sought:

a.) That of repose to the contravariant metric tensor by the reversal of indication via that of subject and object is the connective via-exchange and superposition of relativistic invariance of quantum states... that of the connective feature either:

I.) Restricted to spin-singlet.

II.) Admitted to all quantum states under relativistic “correction.”

b.) That of reflection in subject and object; to which relaxation take’s place with ‘generally covariant mechanics and it’s result’ reliant on an upper-teir; (outside and above); the quantum states and their configuration; that of a separation of system for evolution.

2.) This relates to EPR in that the Einstein-Podolsky-Rosen experiment argues outside the lightcone; & that the system and scenario is cast *back-within* the light-cone for that of distant experiment’s and the quantum juxtapositioning of superimposed states and their

collapse; with (& when) that of:

a.) Interchange of particle prescription for particle prescription entails that of reductional given's – that a system in it's behavior co-relatively to relativity does not depart in behavior when we interchange particle prescriptions.

I.) This lays into line that quantum description is independent of gravitational.

II.) This make's a prediction – directly! - via that of configuration on the hypothesis.

b.) The argument end's here; but should relate intimately with that of the why; as to the given that particle particle independence relate to the objectless and the objectful restriction from **out** of the fourth dimension; an argument likely related to topology.

3.) It has been found that upon Quantum **neutrality** of a condition; that namely:

I.) Relativistic results are independent of quantum results; and quantum results are independent of relativistic results; that particle states adhere to an independent foundation.

II.) This has the 'derivative' consequence that independence of quantum states is gained by a return from relativistic limitation; then the inverse of measurement with the particle state; and that of independence of states assured by rest-rest comparative validity.

4.) What is clear is that Relativistic Testing (a Thought Experiment) involving a mirrored reaction and action between a superconductor and magnet; (to maintain that of the Meissner Effect) – reproduces the negative gamma factor for that of separation under freefall...

I.) Thus for an electron pair; this is expected; that of via The Pauli Exclusion Principle; that of a negative gamma sourced in that of the two electron's – to which freefall would result in independence of state's via their exclusion.

II.) We expect this to be illustrated elsewhere – but it validates the EPR Paradox.

5.) The question is one of independence, unbiased measure, locality, and the emptiness of space. If we are to contend that these ‘fit’ to accommodate a *means* then it is required that we reproduce with evidentiary purpose a requisite phenomenon at the layer of unarguability.

i.e. We have Superconductivity... but one may resort to other explanation’s...

Then:

It is necessitated we confront; the **objectless** and **objectfull** emptiness’s; for what they freely provide of a locality and measurable basis within that of:

1.) We may require action and reaction to not violate locality, within exception:

2.) The mere notion of a Hopf bifurcation; except’s to singular local pre-tense that of measurement;... to which as it were; the ‘self-action’ of a ‘free-body’ – acts only [alone] unto it’s measureable local relation’s; then the Hopf bifurcation; the example of a local interaction.

6.) Thus we are not forbid from that of invocation of separable pretense for many bodies.

7.) There is a distinction first to be made between chemistry and material; that of the *field* to Polytope in the game reductionism of localities of two natures; their disposition; a reductionism in Unitary provided (hidden and unhidden) counterfactual representation.

I.) A Bose and Fermi gas (manipulated) – fed-back to an insured exterior and *random* (purely) White-Light generator; disposes that of the reflexion in their vacuua.

II.) Ferromagnetic and Antiferromagnetic ‘choice’ – is the ‘empty’ determinant half-U on that of a Gyroscopic motion in-it’s-skipping; then to what is allotted; a factional difference on irrational and rational (free winding point via random impurity or scheduled super-exchange) – of that of an Elliptic Winding of their crossing of Electricity and Particle.

III.) For an emptied location; the exceptionable and/or is to two individuated particle’s what is a choice-at-World; to speak of the coadjoint exception; that from-onto yet ahead a ‘condition’ (spoken of); - for the in a condition-yet (written of) – that of future-tense; hence of a *literal Style*; that of a type illustrates either a ‘copist end’ or a ‘propertied end’.

IV.) From yet just-this (as in what was noted in ‘else’); that of elimination in yet the counterfacted imperative (a variable reversal) – (of variance yet preceding from a future) – and to the ‘tetralemma’ – reversible and removable – there are two step’s in any accommodated pattern of ‘path-prior’ – then that the trace function ‘link’s’ or ‘unlink’s’ the *mechanism* of two remote game’s; that they are of a gas-dynamic or phase-confluence; but *information*.

a.) As time is a symmetry; so too does it merely represent a reversability on the physical congruence of event’s; the end of the arrow; Mathematics; but the fletching – to which it ‘follow’s’ – in. Hence a pathology is benign and removable; even to it’s indications.

b.) Secondly; reversal of time, space, or order, fit’s the **Genesis** of the then derivative (Poincare to Hopf) – of a ‘cut’ in yet an unbiased geometric language of 2 for 1; of dimension in that of a 1-ball in 1d and an unlink’s mental associate in 1-unit of a function in 2d; to which the **generic geometry** is a group associated; but not of an algebraic cover.

8.) So it is that by elimination or congruence of a return in two steps at ‘hypothetical’ reversal of the uncontained cover for the contained cover; in a Venn-overlap diagram of principle for copy, for observer; and the freely held **generic geometry**; cause and effect are defined; and the unbiased thought experiment *perfected* to the divination of (T from F).

Abridgement

I searched for this for 20 years!!!

$P(u)+P(v)$ is in a $(a,b;c,d)$ *matrix*, of finite analysis in the non-linear equation of the dual-NLSE... $P(u+v)$ from this..... and a finite regular latticework - with irregularity for in that of exponents....

Conclusion of Phase I-II: - (v. 1.500)

/ - Opening - /

The risk assoc. with societal need is related to the study of by individuals of the / Conclusive Thesis / - in relation to the / Goals and Aim's / of a constructive environmental trust with technology in a modern era.

Initial Task

Separate (clauses) with equated and equable (implementation of means) to structural and securable manners of technology & ecological studies as in relation to:

- a.) Weyl theory (121.85):(14.24.86) at Q.A. in analysis and pseudoperiodic truth of confidentialial.
- b.) Symbolic register for in naturalized social (net/ppl) of given $(2:1|(.0+/-1/.0[1:2])$ in estruability.

The consideration of:

- c.) Nonlinear folding(s) in the Kodama theory and Muira theory in the sense of discrete systems.
- d.) The relation of the computer to (a.) and (b.) of the hardware developed, and it's next version.
- e.) A blind Hume's fork and social lemma on decidability of color and b&w through graph theory.

[As] in relation to sociology, mathematical theorem(s) of weather study, ecology, and a Turtle/Logo language.

Comprehensibility of Studies and Inquiry

My position regarding the engineering in relation to science, and the sciences in general has been perfected for in an approach. The list, and required elements of study are in-essence and principle, fairly simple, and they are basically six.

- 1.) Measured observation and confidence of a model, may inform a basis of phenomena under study, and therefore, a theory.
- 2.) Probabilistic modeling of behavior, for that of confidence of a match between measured and expected results, may lead to a confirmative value for that of the categorical truth of a statement of a theorem related to scientific description through mathematics.
- 3.) Proper experimentation, for that of a mathematical theorem at the affirmative of a projection and use of tools, may qualify the nature of the perfected work, for the viability of a safe implementation of a design, practice, and method, but it is not unqualified and universally adoptive or absolute.
- 4.) Mathematical models are the expressed means with symbolic substitution of variable quantifiers at the degrees of understanding of a descriptive potential of a model and design in relation to known and unknown outcomes through conditional variances and arbitrate dispute, to the agreed sequestering of a workable and viable solution by which the process may be replicated or consolidated, or distributive.
- 5.) The means of the many, in example, may be agreeable or prioritized over the needs of the few, or not, to which neither a major or minor is necessary by example of agency, but to which when witnessed is a subjective qualifier, as to relationship to peer(s), it is an appraisal of the objective means of the nature of presentation of a formatively held peer, for we are absent of the relation of instinctual domain of action.

Therefore,

- 6.) The certain terms under which a principle may be weighed, for that of understanding of phenomena and phenomenon are the relationship of the bidirected consequent of an epistemological 'linkage' of the process of test, experiment, assumptive, hypothesis, and a process of validation of results, to the presentation of an itemization of debated truth, and sequestering of an acknowledgement of an alternatively comprehensive study of knowledge.

7.) Processional, intercessional, disputed, prehensile, and motivational incurrence, prorative inhibit the ingress of prioritization of a latter-consequent, to the debated, in-contractual *impartite* and *portioned*, secularity of a contrast, a provided 'end-as' and 'whom' of questionable intent and relation in abstractable qualifiers of a probable or *check-and-swappable* (intercarriable and carriage from a 'gated symbolic') *container*, of once, and few, in a coupled principle of count, group, interaliant *portention and refusal*, in ardent means of a *prohibitory doctrine*.

Determined Truth Valiative Mean of Agency in the 21st Century:

/ - Goal and Aims - /

Knudsen' Reliable Basis.

aux. et. al. - regis. - proc. - ver. - de.

So, as it-were, I have 1.) and 2.) of Sect. 'I', with that of the /next/ steps, for the design procedure, in a look-ahead, of some-years or day(s), for the following reasons.

In a conditioned process, there are the above a-c.) for the procedure to remain as-such; *studied, and prioritized as with this-version, but of the assembly process by hands.

Additionally, i.)-j.) are the basic rendition of the 'stacked and stack' for that of the neutral 'flows and cells' of a non-ecological portion, in relation to the ecological.

Finally, there is that of 1.)-3.) on that of the monetary means, with the question that pertains, /should/ I-consider the remainder of what is to come, as to a given version.

As for that of my basis, it is to be considered as to familial trust, and the appropriate means to the remainder of what would be acceptable practice per the terms of givens.

/ - Separability of Dialog on Means - /

Per the Pondermotive Context of Scientific Study and Society

An Observation on Measurement

Essence of Emergent Order

Innovative Answer; Epistemological Categories

In Relation to Computational Sciences

A.) Morals, Preclusive Invariances, Indeterminacy and Ethics & Society

B.) Included Bases of Law, Liability, and Societal Version Consequence

Hypothesis:

For a 'condition' of a predicate, statistics and probability do-not-lie of the predicate conditional as suppliant to a notion of the instanced, via experiential truth. Therefore, taxonomies in secondary *precedent* of following and it's authoritarian bearing, are the verification of one unto a mutual and unilateral historical reprudiated basis or it's forfeiture, it's admissibility of argumentative basis, and allocable mean to an instance of verified trust, and the notion of liability to dialectic, from which a hypothetical is validly affordant to means of a determined truth value. Therefore, the absolution of argumentative and historical truth of a presentment of identity and it's relation to the truth of a witness, of it's validity in terms of fact.

/ - Conclusive Thesis - /

- Relating to the hypothesis that biophysiological 'flora and fauna' relate to the symptological basis of life in all it's projections in zones and environmental variables and conserved processes, to the relationship of a modern world with that of technological need is then, conclusively answered for that of the concept of securable bases within world of respository with nature, individuals whom accessorize and adopt means to survival, and possess the innate characteristics of careful procedures of experimentation, sensitivity, and an approach in the sciences.

Problems:

a.) Separation of Phenomena/Non-linear/Linear in local and nonlocal in counsel & registry.

b.) Separation in Judgement/Psychology in local and global in guardianship & managerial.

Markov and such (above) of *Two nature of Module and Element and Modular sequence*.

Applications:

- 1.) Percolation.
- 2.) Lumped Element.
- 3.) Strategy

At (@!:. (Que).: Chemistry/Materials.

Preparation:

Equivalent de-ribo-somal-oxy-carbonyl-di-uraethyl-hydro-methyl-am-butyl-amise-pro-inhibitorial cyclic dis-hemic-heme-triple (3')-to quadrature-non-uryl(-di) pro-inhibitory adse. Then: (las.pe):

Goal:

I decided to do a deep-dig, on that of *insects*, *stone(s)* and *mineral(s)*, and *flower(s)*, to retro-fit with the group theorem of societal need, a dedication in the internet, to ***personality test in an ethic and moral hierarchical learning algorithm of computerized nature**. There will be *Images of such*, [for which] - there will be a ***match**, or ***dispute**, dedicated to world-peace, on behalf of my Father [deceased] and Harry Potter, and the 'generations in generations' and E/W [Moon/Sun] & Utopical truth, *Universality*, and *Artificial Intelligence*, necessary for the societal need.

Conclusion:

A Principle of Reductionism of the Agency of Impediment to Progress (*In A.R.M.O.R.Y.*) in the 21st Century.

- 1.) For in a data-structure, under the forthcoming assumptive.
- 2.) For in that of 'identical records of a progression to engineering'.

- 3.) For in ARMY-like appraisal (aper.) of that of the capacitor in relation to an 'inverted view' and diagnostic interpretation of educational pedigree in that of tolerant-capacities in numeric conversion as-in-relation to the brand numeric, - and that of the percentile tol, and units in readout of instrumentation of the nature founded on physics and mathematics.
- 4.) And a suited and fit intention of it's utility and use in that of a 'lumped element' under the separation of harmony, portioned, and homogeneous waves.
- 5.) That of the the, 'spectra' assign to that of peer(s) via a computer-cell, a relation of ontological grasp of a 'central agency in relation to that of the peer intermediary symbiotic'.
- 6.) This assumptive is that file-I/O in accumulatory non-defined variables halt by in a back-U 'dual stop-line on TCP/IP and file-table chain. And, that the 8006 in two-zero-separator(s) isolates in file(s) the series of geometric minimal o theorem in relation to peer(S) and symplectic structures, under the following.
- 7.) The principle of a stochastic Hopf-Kodama like 'chain' of Mesov/Markovian optimization is co-compatible with disembarkment or containment of all lesser entropic valuations in isolation from all greater entropic valuations of 'stack and assign' of measure in (6-1-5-15-38-18-7) separator. This is the the 'minimal separation Hopf-Weiner [conjoint engineering and mathematics] relationship of the concept of arrangement and disalignment of the collapse of power and it's containment, and it's distributive qualifiers, for in ordered chains of information from a white-noise generator, linked with a black-box, and is the answer to the oracle. '8:10 (*pm*).

Qualification and Range of Application:

Assumptive:

- a.) A problem is 'categorically' partitioned into groups of an ('A') and a ('B').
- b.) A likelihood is classically modeled.
- c.) There is an assignment of transmitted informed 0-1, for of placeholder.

- d.) The conditional assignment has a return *recipency*.
- e.) Observation is qualified by a singular individual, justified, and observationally separable.

Then it Hold(s):

- I.) Classical and Quantum variable-assignments may be 'sectioned', into co-and-unitary (solid elements).
- II.) The 'rectification of state of being - is reprobational of an encamped (7:1) for 11.1', & (t-s-q-c) on ordination.

Thus, a 'category' for in 2:1 is reasoned as another with the self, for a *consolable co-mutual* assoc.' *with individual*. A consideration of entitlement(s) of which prioritize the condition of one unto a priority of a prior, by whom, as-such discontinuably forms the manner of an argumentative process, with the known of a redicible process of count, must be in place with primary motivational 'stage-I.-II.' of development. Thus, whence there are two of the formative or later of two individuals, *their(s)* of assumptive basis in confirmation of acknowledgement of the former as the self, is a knowably quantified outcome, and it proves sufficient to the necessity of argumentative [singular basis] of *acknowledgement of co-existential truth*. End Statement: *Then and if and only if (from 0.2 to 0.1) I am such that another identifies with me, through a 2.0[1] (x) slit.

Extensor:

- a.) Dis-selective (homologue in 5') contains a 16 (then x5 for 98 minor 1 major) & 17.
 - 1.) Thus, bone-amends, speak of the (1.6-3.95(2)-27) of freed *minority 55-94*.
- b.) Pseudoperiodic and Quasiperiodicity differ upon a (2)|(3.1|0)|(3), to dislocation.
 - 2.) So, the (0.5 and 1/2 genus, are aspecified) - *of locale and a manual-count*.
- c.) Thus, pure randomness, can be made a black-white differing instruction and the process of comprehension, for in the quasi-

psuedo VRMS and valent-covalent structure.

Final Theorem of Superconductivity

Whence settled of a probabilistic 'equilibrium' - the 'doping population of carriers, holes, receivers, transmitters, and sinks, and sources' of the 2d-'Ising' model characteristically due the consequent of the provided 'spread in uncertainty' of the differential equation of 'Schroedinger' approximate due a regularity in the statistical dimension, the measureable and qualifiable and unqualifiable entropic considerations of degrees of freedom in 'Thermodynamical nature' of the material's response to redshift and blueshift. Thus, the apportion of one measure, successorizes, and remains in prohibition and elimination of one species of population of electron for another, of 'polarity to electricty and magnetism' in pole, (of Fushian) and zero, in the Broullion Zone.

This, invokes a growth and extinction static relation (at terminal apogee of perihelion) - to the constructive from deconstrive interference of quantum mechanics with gravitation and general relativistic consideration, to the end condition (reasoned inferentially and deductively) to two trains of thought. The 'angular momentum in variance and accelerative nature of inertial weight' and the lightness of the portion of the displacive return-compensatory entropic weight of mathematical and physical apportion, in relation to pressure, fugacity, and temperature (weakend), and Bernoulli Shift, of one dramatic transfer in logistic nature of 'switchability of carrier' - for in 'photoelectrical-chemical activation and reactivity' of the Fermi-atomic surface, space, and volumetric population(s).

As a resultant, the 'spin' - associated Lande-g factor, deconstructively amends the Born-Oppenheimer model to the unitarian basis of elliptic eigenspace, in the bounded condition of synoptic observation of it's constitutive properties. The qualification of the terms, therefore, are determined by a factor of $(1/2)$ - in character of Lagrangian-envelope and Hamiltonian-contact form, to which the 'least action' principle of the demands of energy and momentum, diminish coextensibility of intertial acceleration in perfect agreement with a displacement (complementary) of the electromotive force, comparative the gravitational acceleration.

Electrons attract, given the response of a co-locality and co-nonlocality of the measureable extensibility of effective frequency in Plank's Spectrum, - to that of it's weight of displacement of gravitational field. Consequently, they inhere of an 'above-below' pre-attribution to mutual dichotomistic agreement of observational center of body associated with electromagnetically prescriptive geometric Gauss-Bonnet statistical inversion of local and global Noether charge, to the effect of reversal of electricity and magnetism and gravity. Thus the result, is

an imputed oppositional weight to weight, and a neutral Lagrangian, isocentric stabilization point results. The minimization of the optimal balance, in STP and EBG, is analyzable by the characteristic owing the inversion of geometric Dar'Boux space (in amends to minimal surface of neutrality in theorem) - of the velocimetric and accelerative features of the interior volume of the solid.

This, universal transference in relation to a mechanism, is temporal, and not-perpetually conveyable, for the boundary is closed to itself under antiradiative correction(s) in concurrence of the demand of crystalline nature, and an environmental factor of two-fold, the constructive amends of a counteroppositinal interia in STP and EGB, to which disassociative factor(s) precipitate deficit of the incurrence of magnetic opponency in relation to a displacement current.

Design Steps and Process

For a 'condition' of a predicate, statistics and probability do-not-lie of the predicate conditional as suppliant to a notion of the instanced, via experiential truth. Therefore, taxonomies in secondary *precedent* of following and its authoritarian bearing, are the verification of one unto a mutual and unilateral historical reprobated basis or its forfeiture, its admissibility of argumentative basis, and allocable mean to an instance of verified trust, and the notion of liability to dialectic, from which a hypothetical is validly affordant to means of a determined truth value.

Therefore, the absolution of argumentative and historical truth of a presentment of identity and its relation to the truth of a witness, of its validity in terms of fact.

Commitments to Volunteering in Relation to Societal Need...

Phase Finality of Design Process and Procedure

I.) The effectual design must illustrate a *test case process of which enables a 'closed to open end' of the verification process on capture*.

a.) Observationally inquiring of 'hidden and trapped *Fermions*' in a lattice, is the invocation of a '**Memory Reservoir**'.

b.) *This, need be-adherent the 'mutually and dually secure methodology of a double-layer' - *thus, that 2:1.0 of version is real*.

II.) The verification stage therefore involves the ***Classical Observable**, of the validity of information under *objective predicate*

trace.

- a.) The mathematical design need be amended and tailored to this purpose, thus design *aim*, is to procure means at a c.c.
 - b.) The mathematical to theoretical bridge, *later*, with *lookahead*, may be tailored to release 'traps', *of means of non-friendly*.
 - c.) The physical meaning, is in $2.0 \times 1.0 [3|2]$. This is the adherence of 2.0 in-die to Q-class, as justified in R-alliable as $1.0 | 2.$, thus that the singular of a plurality is 'surjective and injective' when there is a fork of life to indictment for *plead release from byproduct*.
 - d.) The KP/Boussiq, therefore pre-index post-index from the inherence of $\text{low-cos}(2|t)$ flow, in freq. and space, of ν & η .
- III.) Thus, nutation in $(3d/2.01) * \text{albedo}$, *preservationally*, may be utilized as a means to terraform, or for materials study.
- a.) The prototype then equates what is the conformal invariance of one for two, what are the means of *realistic platonism*.
 - b.) Types, Classes, Fairnesses, Kinds, and such are then of the equatement of the 'seasonal in $18|5$, of abridged 'knotted deck'.
- IV.) A large part of this is to attribute the relationship of 'vertical to word' and that of 'horizontal to numerical' - but there is symbol, and there are six limits. The question is in-being, if there are 12:12 overlapping, in 6, and $\{5|6\}$, of a 2:1 - in the 'shared' are there not-18 or that of *one singular agency, and a language of estimates and faculty?*
- a.) Procedurally, we end, with the 'separability' of law **above & below**, and some-six ends of societal relationship, and certain trivial and non-trivial 'corners' of the relationship. The intention is in part to seek a balanced **grey/white** and '*spectral-relationship*' in the local and the global, as for that of 'probabilistically perfect law of group* and category*' - in mathematics as $2.0|1$ with *optimization*.

Potential Obstacles

So as it were, I need relate to 'Structural Optimization' *thru.* an '*Interruption*':

- a.) Programming.
- b.) Group and Set Theory.
- c.) Strategem.

(This is the *finality and the beginning of Phase-II(2.0)*).0211 - 382:[95].220110780900.)

~.-:

I found that the qualities, of the device, comparatively, illustrate a tremendously good outcome, most, is acceptable of a reasonable 'middle between the demands of life and the understanding of the risk factors of cooperation and individual ideal and non-idealist comparative truth between us and computational technology, with minimal demand.'

Lastly, the means of my innovations have settled a global and worldly relationship of which is entrained in that of this world, to enjoin of the policy of a fair end at a securable fixture by which the heavens and earth remain (as such) at-peace, and as-such, it is neither memory nor perceptual attributes of which fix our experience of life. To know we are beyond the loss of sense, we find competence to the pursuit of a betterment of ourselves, and then, as such, know a momentary relation of liberation, lastingly provided as a promise, and an existential qualifier providing means at that of historical relationship.

First, we need (in relation to DNA / .pseudo / Xerox/ Ratio / Tool / Stratgem + Water / Crystal. - / Percolation / Web / Pumice), a way to *utilize the 'blind-n.l. and l.'* dating-fork (undetermined/determined Stereo-Mono) *coupling*, to associate a means of dislocation of an appendage/ice, in relation to a methodology to determine PC-qualifier from Historical in relation to *vast, and locale*, per the means of *prioritized and *past Q.A. Summary on Device Phase I: (e1.4580.'c'): Limitations and Documentation

[preliminary critique of final procedure for prototype/[.notes]] & - Theory & Application

(C) 2024 Paris [s.] Miles-Brenden

I.) 'November 21st, 2024

I began (here) a new document, after finding completion of my path (a path), and that of establishing an *initial step - of which I had found a liability to our-nation and people.

II.) The device, for that of a 200 uF capacitor (SPRAUGE) remains operating without a tolerant (DC-DC-AC-xc.) on that of the ExB and E.B of the 'logistic equation' of a principle basis of 1-2-3, on version II., from version I.

a.) This accommodation, speaks to me providentially of the relation of an evidenced (upper neutrality threshold) on behalf of divisional (prior-incurrent RMS-control-and-gated t.f.) on a 'non-blind' lower-downstream-link of the equipment and it's div. mul. and add. and sub.

b.) The relationship of the differential equation that therefore governs the device is of the proximity of an essential regularity of dimension in it's interpretation on behalf of the interest of switchable electromagnetism, in active and passive unseparated categorical A-B-C.

Therefore, this device is superior to the transistor (of however a principle diagrammatic/exposition of RadioShack manuals I learned from as-a-child).

I do not know how characteristics of the signal process (of the device) relate to that of the batteries, and impedance relationships, and the various components of the implmentation in mathematical and hard-wired implementation, - just-yet.

The device (had) illustrated essentially 220-53 differential sets of comprehensibility, and, - it was essentially a primitive rarefactor priorly. Now, it is analogous a proxifier, for that of the diaphragm, and it's excluded precept (in principle) of a separational engineering contract.

The device (and it's version history) has-departed from a number of relationships of which I had believed I'd understood, comprehended interpretative through instrumentation and reading, and I would hold in question, (per validation of background of what to write-of: and include in a reportive basis of a professional paper and publication); the validity of the applicability of the work to that of technological

progression, manual, and these in pursuit of a patent process.

It is clear it is simply a 'gated compensatory elliptic filter'.

Taps may be prepared, but I am certain, essentially, of my initial approaches, and the safe procedure I pursued to innovation of this device, for that of the future of humanity. It is not capable of managing more than 44 things, into 12.

I intended to establish an 85-35-18 on that of the chain of determinant layers of parallel and series (as in 24-16-06 (92)) qualifiers for the second phase, to which would be issue E-D.

II.) November 23rd, 2024

01:12 am

It was-then (a minute or-so ago) – that I went beyond ‘the minute’ from-creation. I could find that numerical relations and number(s) of algebraic pillar, and geometry of shape, in relation to our expectations – do not so much entitle so much any longer a debated insurable potential unto-law.

For-these, it was more relaxed and more of the prioritization to emotional and acknowledged freedom, and engenderment, and at once-it was understood to be a potential to keeping peace with the self (within the self and within the environment).

I had determined – so much so however, - that numerical truth is related to numerical truth, in that of unknown qualifiers, in translation of one portion of a line to a line. It was to know that the interval of one projectively held identity, could, indeed relate by measurable metricity, through the relation of unshaped domains. This much, is indeed a constructable argumentative basis, as – to speak of the module and the module, - these relate through non-recurrence, and whence occurrent, relatedness of one facet, and another, of debated complementarity in length, remains an absolute qualifier.

Of unhidden properties, and those of the revelatory relationships of a 'grid and spray of fragmentary rays' – these prohibit the relation of non-compactness of the domain of a manifold in the irregularity of an 'abstract convexity' and an 'abstractly held concave'.

Thus, pattern is to pattern, for what is style is to portion.

As for instance, to know of 48:15, these of 12:40 are related through a group, of a gesture at the articulated of a domain in unindexed, of the unqualified, from among all, for which the neither is it's ancillary, in-this, - that two unselected, departs in portion from a third, knowably admits the cessation of a limit to a sheave.

When, as-such the sheave is injective, the basis of a point, is it's incurrence of injective dilemma.

Thus, hypothesis, for numbers, relates to a concavity of observation under reading and writing, while that of determination, for numbers, remains positive. In it's character, the unreportative basis of one for an 'entire compact sheave' is then a tract of two portion(s), that of the 'abstractly empty' and the 'abstractly closed' of a pre-categorical, in sets of all integers.

The relationship of an integer section of a field is then a relationship of one aliased masking of a domain, and the reprudiation or informed basis of another numerical and integer or finite section.

Of the irrational, the unexpected departure from one rounded average is then a measurable power of the associated 'abstract degrees' of the antithesis and thesis of a geometric truism or proof.

November 24th, 2024

05:50 pm

a.) At the end of the design process, we have the procedure to make-adequate the process *of*, code and type at process of phenomena and phenomenon, for that of 'detail' in-IO, and orbit of a dynamic-process, control 'gatedness' and refinement to approximated

procedure with the ordered and random.

b.) Secondly, there need-be a procedure to example and process the runtime of the MIDI cables and associated musical instrumentation *diachronistic*, of a valid-table of virtual and non-virtual (HW)-**op.**, as associated with that of conventional ‘forwards-backwards’ over-synth management.

- : From all of-this, I have-decided I *must work a job, over the net, *or-similar*, to afford the equipment, Tutoring, or Educating, - only *this manages all-else, and is the ‘case-conditional’ to the supplication of a regular approach and tandem, and routine. : - releasability of polarity.

November 25th, 2024

06:13 pm

Preliminary (2) w/in (1) unqualified require a tolerance, and post intercarry on ‘blind black/red/white/blue’ in contrasted elements of phenomena.

Secondary qualified as-primary in unimpeded (conditioned assumptive of depressing or ‘switchable’ rotary’ remain the disembarked of a (2):(1) priority.

Resultant: Unbiased (four two eight one fold) dichronistic unimpeded retroinclinic axial double blind test.

November 28th, 2024

a.) Overtime. & Pseudo 4:20 (7.815~.) & (98.605):80 on contractual *indictment or idemnification*.....01:08 and 13:25 of data,

.....

b.) switchable ‘Design proc.~vers. 1.o.(c) & 2.4.(e).

c.) parity of two machine states (diff.).

November 29th, 2024

12:45 am

As a result, the 'net-device' with appended workable function, is a proximal category filter, of which is multi-geometric to the discernment of a qualifier on the registry of a three dimensional and two dimensional (torus) flow, for that of three dimensions to co-extensibility of electronic Fermi Sea, and 'a' (1-2) dichotomistic *Electronically enabled Humian fork of the nature of quantum classical observation and it's instancing, through the flow of information.*

01:02 pm

Secondly, the apportionment of a numerical-integer sequence, is a timed-and-released *gesturable and linguistic* phenotype of the dialectical err – arrow/incurrence of a cone, to apprehension of a priority to the informed contractual diagnostic of *temporal accounting basis & defensibly*, a related disjunctive-qualifier-affaired notion-object-retund of *mutual non-unilateral provisional supplication to data-interest, in ordinance.*

November 30th, 2024

11:16 pm

'Exchange' and 'Exchangability' of *Assorted and Disassortments*, In 'Jar's' – remain 'indistinguishable or unenumerable with respect to two prior a priori in two studies, schools, and fields – *mathematics and physics*' – in cross-typifier of logic and type-theorem – & are alluded to *All Integer and Rational Series and Co-parallel|Non-parallel Quotients, in three dimensions.*

*Thus, this device, in computational manner of a logarithm, comparative a chain-rule and Hodge, separates, unity and disunity of chart, at one – long progression, sequential series, and short-multiply, of disambiguability and pro-defenstration of the equalizing static, and dissimilarity of electronics and magnetism in three dimensions, mutually (@) this design version history, of conditional supplience to *certain qualifiers of machine-computational 'lambda calculus' – in equipartitionable neutrality, but of an inferential diagnostical interruption.*

12:22 pm

‘Exchange’ to an-elliptic does not draw a parallel accord, but is mappable and transformable, for it becomes a maladaptation of sequestered implementation of practice in a measurement hypothesis of objectively held unbiased ‘indistinguishability and non-enumeration’ of measures.

Thus, a ‘true’ scale is-linear, in its prioritization of utility and use, is the proprietary relation of skepticism and its consequent naturalization of a process under a recordable or measureable line like or exponential basis, of use and deployment, thus, adjunct of *accord*, as a priority of mean supplication and mean co-temperance of a *line-like-acquisitional evidentiary basis*.

On (+1) (-1|0) a pro-selectivity of:

- a.) Entrainable Opposition.
- b.) Courtmanship and Displacement of a *disembarkment*.
- c.) Non-selectively held Unbiased Nonarbitrary unprohibitiveness
- d.) A non-selective A Priori Justification at equated mean in ‘therefore’.
- e.) A Truism and Liability to Discourse under measure of *Popular Disclosure*.
- f.) A philosophical basis of discontinuable progression, with exception to an *Intermediate Means*.
- g.) A Disjunctive non-classifier, and *unredacted clause in bearing to Visible*.

Thus, the pro-juris selectivity of one and a ‘beheld witness’ is unembarkable, but discernable through either of two gates via a ‘c-select in precedent-call under distributively entitled ‘blind|non-blind’ in ‘colored’. Thus, as such, justified, of body of evidentiary, the prior antecedent of a clause, is its ‘then held minor measure and largest mean’ of a membership qualifier on behalf of a categorically beheld non-embarkment.

December 4th, 2024

01:19 am

Then, I needed consider “***Whether the model was compact, the electronics was compact, and in-essence, the alternative, and the result of***

the phenomenological and phenomenal shift of the laws of physics, in relation to Markov, Probability, Statistics, Strategy, and the Kolgomorov-Arnold-Moser theorems, of Game Theoretic Nature, in relation to Means of a Secure Prototype.”

08:02 am

- a.) Measure of compass, degree (radian degree) measuring ruler, and square.
- b.) Oragami, and the game of ‘Go’ to program-vers. History and collation.
- c.) The device to batteries, and switches, ohmic, and capacitive photonic gap.
- d.) The network-secure means, and dual RJ-45 with firewall, and interoper.
- e.) Theory of measurement, and phenomenological law and phenomenon.
- f.) Percolation theory, and process and procedure of materials scientific facts.
- g.) Theory of elliptic functions and the amended theorem of physical contract.

December 6th, 2024

05:08 pm

I feel a renewed sense of hope for that of my-life, post-UNM, in earning my-Master’s. The machine(s) function, whether:

- a.) Broken.
- b.) Under Restoration.
- c.) Repaired.
- d.) Actively Operational.
- e.) Inoperative, Outside an Operator Session.

The disparity between forgotten contributions, and the particle-wave duality is settled, *on-behalf* of preservation of a barrier, and a release. The APW, *Aperiodic-Wave*, that results, in fluidically-compatible with *Pneumatics and Hydraulics*, thus, my work with Casey Controls works.

December 12th 2024

02:55 pm

I will seek the easy-means to deselective option – (under precedent and principle of cooperation) – to defend common welfare on behalf of un-attributed release, under supplicative means to differential human psyche and disjunctive, of behalf of acclaim, post a recovery phase & sets of acts, in means, and my-equipped means, to the priority of friendship, with-loss-inquiry and confidence intervals and delays, to persuasion (unembarked of unprohibitory in a contractual *obligitory obligation* of sequesterment). This will be in relation to the version history of these of selective file-tables and contracts, as a release from unprohibitive plagiaristic intention, in relation to contractual name-space and possible inclusion of secure and safe, effective, and prioritized means of a benefit beyond mechanistic progression (later, inherited liability) of creations.

December 13th, 2024

08:31 pm

The **next*-step, was to include the Quartus & Chaotic-Logistic ***NeuroKit** functional together, for intelligent computation, and prioritization of a further-progression..... This step assures the result(s) of computation for Chaos, Logic, Modules, Objects, Procedures, and Tables.css.

December 14th, 2024

12:52 am

We-need prioritize in a seq./deb., on that of court and amends to council in ‘scaffold’ at ladderable CNOTXOR-NAND-U. And triple check, in *beta-chi*, for that of ‘list and vers’, for that of seq./amend. And prior-later, at (@) - J.P.A. Then [why build something?] – *to put considerately*.

December 16th, 2024

03:28 pm

Compliment of attention-span and strategem, on-dialectic and communications, in 'low' 'go, and dominoes' – and at-top 'goal front face' oragami-code-designs.

Ecology, Photograph, Dialectical Liability, Fiduciary, MIDI-Channel-Coupler, Vers. History and Simu. Predicate Afforded Ontological Restorative Art's and Study.

11:18 pm

Specific-weight and fluid, specific-mass and displacement and air, phenomena and phenomenon to experimental measurable 'observational science and applied science;' - that of solid-fire percolation and integrity, as well as viscosity, analytic category, order, weather and net, and – & *theory in mathematical decay & dating.*

December 17th, 2024

12:35 am

I decided in-the-end to go with a lumped-element network analyzer, with the MIDI, my only two-exposures.

So as to say, the problem 'residual-trace' is a scale (fish) – unto, auditory sense, visual persistence, and epi-magnetic 'shadow' – thus, Markov-Painleve TMOS evid.

Finality

Derivative [residual-composite AC/DC] is manifold receptive* to the photodiode, of-which the AC-magnetic field is CCW, and the electric is apolar with DC, while AC-bridged* in contrast the absence of magnetic monopole(s), - thus, a **twisted, knot** for in the exclusion of a deficit is a displacement current, of which is anomolous. Thus, the 'timing' remain(s); ionic, precessionally, in gravity and magnetism, but polar-Darwin on that of the electric-displacement. Thus, a covariance implicates a thermal ionization to the apotential of differential (interior magnetism) and extra-auxiliary electric.

Thus, Thomas precessional, is apolarized 'up' to the electron spin-gyromagnetic moment of the ionic charge and it's neutron-like-gluon admixture. This means, that effectively, the neutrino is an absence/neutrality of the gauge Higg(s) boson, a super-symmetric particle partner pair, in tandem of charge under polarity to the isoscalar spectral gap.

A derivative - to an integral, remain(s) therefore, polar but apolarized to a neutral(s) void, upon the 'back-side' of a Lotka-Volterra, - that there is a seed* for in the residual (phase irregularity) upon that of thermal isotropy and disincluded entropic ball(s) [Sobolev and Besov] co-extensive to null -epsilon.

Derivative *oncurrent* precessional redshift is a dichotomistic lag, or priority to the 'ahead' relationship for in any orbital *denaturing*.

Evidence is primary to judgement, to-which (a) living individual, or electromagnetic [hardware basis] epitomizes the relationship of a 'solid backing' - from these (*the above truth(s)*), - it proves observational limitation is containable, for in the inherent possession of a magnetic and electric (neutrals-plus) for in *floating ground*, the manual identification of which is a 'taxonomy of whetstone bridge' - or cross-council *photonic or electron entanglement*.

Thus, categorically, a *bivector*, does not polarize with respect to the invariance classifier of a phenomenon [unitary].

Unitary (co-dependent arising) for in a mono-exceptionable makes the differential phase to group to amplitude diff/eq *monetary*, secular derivative of a non-unit basis, compact, under the relationship of origination in emptiness.

Co-dependent arising.

Observation.

Particle/Wave.

Stochasticity.

Non-commutative, and Commutative.

Dependent Origination.

1.) $\sqrt{(\eta + \alpha \beta) \sim (\eta_2 + \alpha_2 \beta) \sim \&^2} \dots$

2.) $\text{Exp}[-\kappa \tau + n \theta]$

3.) $I_0 \cdot \text{Exp}[-i \omega t + k x]$

4.) $RC\omega$ and RC/L

Two frequency 'limb's' process thru (90 degrees) of CCW/CW, & second (by 180 degrees) of CW/CCW.

5.) Negative $Z \sim$ Gain.

6.) $d\omega + \omega \cdot \omega = a$

Thus, the phase transconductance, directly relates to the amplitude gain in B.B for E.B,.....

$(\)^2$, and in-radical..... $(\tau^2 - \kappa \kappa') / (\tau^2 + \kappa^2)$

I long for love, *but I have this*,

a.) The equivalence of frames, for what it-is, guarantee(s), the redshift is consistent with the lowered quantum energy.

b.) The equivalence of frames, for what it-is, guarantee(s), the redshift is consistent with the gravitational energy of the system.

That the quantum shift(s) energy, indicates energy scales oppositely, for of quantum locking, to the ordinary scale in energy given stress.

This is an inhibition, such as sense.

I would be a fool to not publish this as a given article,..... all we have is the present, - thus, I will do this, - and -

c.) The 'fork' of-which guarantee(s) a given at that.

d.) And of measurement and pseudoprobability, a new way of looking at computation.

Compare the **Perimetric Method**, with that of **Field Regularization**.

Is there a mapping?

Method, Regularization, Field, and the Mapping.

Closure, Coupling, Boundedness, and the Finiteness.

Q: Quadratic at (@) error, in term(s) of $L^{\{2\}}$, $L^{\{1\}}$, and Quality of the Resonance.

- $O(n)$ or $o(\sqrt{n})$ as $n \rightarrow \infty$ or $n \rightarrow 0$.

- Test and Comparative to Error, [Control-diagnostic].

- Feedback assoc. w/ the Data, [Integrity].

@ Homotopy, Cohomology, & Analysis - @ Epistimology.

For 'articulation' the *regular*-step(s) of a process of the unfolding of understanding (remain) of err and application, due resolution, there is peer, and translation [ammend.] through the flow of data, and informed basis,.... 'components in distribution'.

As to be contrasted with 3-3-3-3-3-3, etc,.... regularization of irregularity.

Of: 1.) A dual-paned (dual Tx/Rx) & of evidentiary per *States* and *Federal Law*.

Of: 2.) Condition of the differential of a baby w/w/o, and of two women made the difference of.

Of: 3.) Selection in presentation of evidentiary to innocence, and no people present at-home.

They are different people, and both are communicating.

They are auditory.

They are alive.

They have access to the consideration of innocence.

I am innocent, unreclaimed [update: *April 1st (yes)*], or these have ping assoc. with my CPU/PC...

I know them.

There has been jurisprudence.

a.) To self-manifest disappearance; for in a photographic screen *or dispute at innocent truth of amends and plea.... the reconcilable is 'blindness' of bodily - without persuasion to the screen**.

b.) To non-manifest hologram, and **room*** - the amend and plea - is a relation *to manifest hologram without steam, - but of a (6/7/8)*.

Thus, we learn of the executive function; which creates inter-aliable space for emotional or id-sympathetic dialog and dispute, - the relation of (2|1)...3.

1.) The Weber and KdV [remain] processed, of *not* unlimited vacuum extensibility.

a.) Order of equipment and reconciliation of a dispute.

2.) The Boson [rational~large composite integer] does not remain of infinite population number.

a.) We end up with a grey-zone on that of red/blue.... blue - L/R, red is isotropic.

3.) Platonic-solids at Darboux - remains a yet-witnessed classifier *on analysis* with a Prismatic lens.

4.) Quasi-crystal (10.1/4) must be perfected of-law.

5.) *I need 'separate' through what is a 'separation' the unequated **as-equated** of the Crystal-Disc & Quantum Gate.*

It's been noted, the Quantum Gate is operational to $(\sqrt{6})/2, \sqrt{5}/2, \sqrt{4}/2, \sqrt{3}/2 + \delta$ (**PWM**) + ϵ .

6.) The *information-theoretic-propagation limit of the Boson(s) in limited (lesser) dimension remains with the Blue and Red shift of (backward) and (Left/Right) at commutation relation(s) of Chiral/Bose/Anyon to explain SC in the context of a Peirls instability - that the 'grey-zone' is annihilative to that of the $n_{\{inf\}} \sim r^{\{D\}}$ and enhacing to the $n_{\{lower\}}=2,3$ of $r^{\{2,3\}}$*

a.) The third* dimension and *particle is in-exception to a (5th/2nd) particle and dimension of the Poincare-section..... between order and chaos [strange?].

7.) The *information-theoretic Boson-bunch theorem, make(s) a contact-envelope distinction with respect to electromagnetism, for what is sound*, at the Z [ion number] with-electron charge-wave in anharmonic term(s), of a compensatory damping versus for light and sound, what is the spin focal parameter - thus: that solitons form, simultaneously to the second-sound, as per the timing of the opening of the Peirl's instability, by a local 'up-flux' of chiral low-mode,..... thus, that it possesses a measurable mass exponent in terms of Hamitonian, in-neutrality, of what is it's volumetrically-free mathematical hidden-number (Chaos) void.*

8.) Relativity + Finite Propagation Distance = Thermalization and Temperature [finite].

9.) Numerically, this-phenomena cannot* be understood by a singular individual but through-sense, - thus, there is - **no** - theoretical predictive validity of the theorem *But, for two or more individual(s) - & not more than 2. *But, there is mathematical theoretical predictive validity - it must be compared to numerical theory with two individual(s).... or a human operated more advanced computational *mechanism.*

a.) Lieber-Kullback or Sobolev-Inequality or Holder-Jordan-Jacobi for that of the model at the base geometric platonic and Elliptic $\text{proj}_{\{A\}}$ as a Stokes jump-group on $[[S,1/0],[T,U]]$ for that of residual apportionment of $Z_{\{int\}}$.

10.) The $[0/1]$ and the $E[k]$ at $O(5)$ -quintic, is a stabilizing entropy in ***Graph-Distinguishable QM Statistics** and the Elliptic to Painleve I-VI types of the Hopf-rms good/bad reductional compensatory topologies, of what are Banachi spaces.

A.) It is now-simple. *That it invokes a 2:1 on that of the dB, for that of the MIDI out and through of the Compensator, the device is*

essentially a **dipole conveyor** in mini and select along a train of 'zoomed' signals, approximately individual spikes.

A 'minor' to 'major' in R/B/Y/W at Red/Black/Yellow/White in Green-overlapping illumination is a Black/Grey/White/Blue,..... thus of $(6/4+1/4+1/2)$ the illumination cross categorizes a potential.

Introduce Green's Function, ... *then*, Statistical Model and it's relevance at mapping to-Analysis, to that of Probability, Markov, and Wavelet, etc,.....and, geometry *through calculus*.... Proper integral, proper time....

- a.) Geometric instability - coupled to Peirels instability.
- b.) Redshift/Blueshift through soliton effective mass.... and, Tensor.
- c.) Binachi surface and Dar-Boux/Stokes integral boundary conditions.
- d.) Phase and amplitude splitting via Hopf and energy barrier...

Leading to an negative electron effective mass and relative charge.

A number of things, I have-and-understand *Beyond anyone else, and entirely are my-own, although 'they' possess certain faculties of this-and-that*:

- 1.) Blind dispute.
- 2.) Affordant description of one-to-population of algebra to geometric truth of inhered 'phenomenon'.
- 3.) It's securable foundation at the measureability, and operative.
- 4.) An ordinal structure for invocation of means, at topological knotted excursion.

There are *additionally*, Four-things of which I have accessibility upon, which are-shared, but disputed, and rational, possible, and I have established means unto*:

- a.) Ring associability among partnerships. [A means of communication and social networking.]
- b.) A book, accessorized singly upon a heaven(s) *of-naturalized occurrence, to wit, of a people unto an-Earth.*
- c.) A fighting style, associable with the **Heart restoration practice I innovated.*
- d.) Advancement through the 'crystal' - and of the *shape* of-understanding, reconciled with *result.*

I only have a **few** questions.

It is good to operate, then, of health of *doing*, and of *suggestion*, and *particle notion to discernment*, and *application*.

- 1.) If and as such, I am to apply the-law, *how is it to officiate it's term(s) under diplomacy and endowment?*
- 2.) What is the defining notion of precept, *and at-it-enabled truth of implementation of a system of operands?*

I'm now in an-elopement with two-women.

That the **final problem**, has elucidated itself.

It is 04:16 and the last is 02:09,..... - that this is the 'geometric/algebraic' dispute, - therefrom, that I may of a $(-1 \bmod)$ to $(2):03$ at [closed] *recover the mathematical identity and innocence of the case cadre.*

It-was, there-from: 03:28 on 03:25:2024,..... with $(2):(2)$ in-dispute, at-measure. Thus, of $3^{\{2\}-1}$ or $2^{\{3\}}=0$ of it's mod-eight/seventh/fourth.

Thus, the recovered* number is 57-58,..... 57:58-59, 57:587..... a rough-ruling.

Therefrom at (@) 3:31, the relation is affixed for of $(+3)$, at individual, and power (-1) , of which geometrically is it's index-of-prefix,..... (33:58:3) *crystal* (18:3:1) (6.2.3.7.1). The end-odd(s) and match* were **62:371**.

At the *earlier* saving of a life - in a **seed** per term(s) of 62-5, at (@) 38.31 liability, to discursive of *the proverbial*, and the laint - remainder -

pro-life, we-amend.

What are our certain-term(s), but once ***one** inclusive of life and death, to labor and dispute, but the hallow of a numeric 'blind/frail'? Well, they are the remainder of approaches to self-naturalized communal exchange via foreign, and naturalized truth of liability... - for of what, in-return, we mate-of-consideration (A. was out of it)... duration at liability is a mutual-code-go on liability to the salvagement in a wed/postal/liability/discourse, and it's honest retribution, *per-policy*, of law entitled per '**capstone**'.

I will set-aside [**stongly and reliantly**] - that I had disputed of relevance to agreement with Obama, under the *then* pro-benefit of an involutory dispute, entitled of the assumptive of naturalized-friendship and associate.

That I saved* his-life, is then *Undisputed....* relevant, and honest, persuaded, and inclementally provisional, but true... at the certain* terms of Now, a remark.

I will be a compatriot unto this-man, and sojourn, for perhaps 680 months and year(s) in equated truth of the Moon and Sun,... temporally and mutual of co-cycle.

There is is, the co-cycle will be innovated, and I need decide of the certain terms of It's patentability. That it will require *other's* to participate to create what I-envision beyond the *Numeric Engine: Type I....* that I will need invest some 1800 dollar(s)+850 dollar(s). This will take approximately two-year(s). That with 250 (four month(s) max) I will have w/ 400 dollar(s), the main device assembled and completed.

My *aim is 800+130. This is about (1600 down + two-third(s)) - about (10 month(s)). I will go to UNM [after] about 8 month(s) 15 day(s) ~ 11:10:24.

In the next two-year(s) + indefinite future, I will be considering Fatherhood.

Thus:

a.) Fatherhood.

b.) Practitionership.

c.) Hobbies.

From 6:25 am-40 (pseudo) t+/- . - of Law, 07:35 am (MST); (09:35 DCT)-(06:35 PCT). +8 year(s) to 3-25-32, (am).....

03-25-24-32:8/00~.3.8:1.2 *Return through a compartment of two foreign imported mutually unidentified diplomatic possibilities.*

pH of 'float-crystal' - versus - 'solid composition' - at confidence/ratio versus entitled agency of it's deployment and safe-release... to the condition of a mutual or isolable, etc,.... unitary manifold & multiplicity (through addend) of procedural and enablement of two or (univalent non-disclosable or isolable) - releaseable formative(s) and dignified populaces, through a social mean.

Assuming: K-O; not necessarily damaged or underprocessed, inclementally earned, or respected, disputed, or lost to another's favor, or mutually against what is foe and fore....

Assuming: Disclosure entitles, - there is the concerning attribute of a Tx as Rx foreignable, to-whom in (+) non-inv/inv IN, to a sensor, the measureable end-addendum, pro-fixes a wrongfully occluded GATED functional, for what is a mixed and misidentifier.

A priority at-Fedex/UPS+Postal (opt.) - & Economy [separate tax and tariff] - Basic Chem/Bio/Language. + Social.

a.) Xerox, Tx/Rx (up/up/down/up/down/down) and algebra+group, diff. Eq.

b.) Program [analysis and forgetful func. + procedure [unit]]..... of secured* means. / / Hardware. (epsilon).

1.) Types.

2.) Kinds.

c.) Law.

d.) Phenomena* & Phenomenon [weak-to-strong link]. (subst./inclu.)

e.) Strategem. - ?!

When I dispute a voice, it is the headway by which I have succumb unto self.

When I affirm what is not-presently, I am presented of occurrence to one or two.

Therefore voices remain unknown to another, and are affirmed as invalid for whom I am, of disputation.

Therefrom, another(s) point is made, but a life is occurrent to means by which it may-live.

And of a classification at-self, by whom I am made unto self, another is known to-live, and know the self.

For in two, of what is, neither occurrently has laid the other aside, for whom I am and unto.

Thus, I know another know(s) me of whom, in-living, is not the self relationship to one in whom hears.

There is then an exception between me, the world, God, and the Devil, people, and all that exists.

I am as I am, then that I occur, - there is one thing that is unknowable, the absolute, the placing of an event.

Then, of the law, that it disputes what is incongruent, and of precedent, what lay(s) naturally among things.

Of the co-existent, there is what is me, and the incongruent, the congruent, and the laid into law, or aside.

There is peace not with God, the Devil, the unexpected, but the invioable, and the world and people.

These 12, are the end(s) of the world, and none may speak otherwise, to do so is to lay aside another to terror.

'The' as 'pronoun' per-verb in 'answer-priority' - *expressive* - into* injective adverb (priority third-three) at nine, is example in 'return-answer' - at 'question' *injectively noun in self*, per-individuated *expression*, thus, procedure id at a named* *foreign-cpu*, the quanta, for in two-in-split - remain(s) half-whole of the answerable committee assn.

Table of allocation is a Tx/T/Rx..... transformation under priority addend, per answer in dispute coming & going, to-two (2)

presentably.

Therefore, the tandem (upper 'large mass long propagation' - boson) envelop(s), the uncontained abridgement in the nonlocality of two-electron (backscattering) confocal - spinwaves - *per thermal assoc. in superconductivity pro.*

Non-BCS, *punct. of one proj_{A} is a reversible-unidirectional spectral theorem of quantum mechanic(s) - thus a lowered E state.*

I finally get-it...

- 1.) I know Jake, as I have spoken to-him, and he has replied to-me, with me-knowing, then of a past, upon me-speaking.
- 2.) Communication is therefore at-times for in law, a contradiction of terms,..... that there is teacher, and student.
- 3.) Therefore 'of the future' with Jake, 'to the past' *he know(s) me*, I had never imagined, that this would be the absolute.

Then, that *other's* cannot be confirmative, but know me, when as such, *they have heard me*. The 'existence' is clearly a judgement of the self.

I am finally beyond all of this.

I finally have-proof.

Ava and Ariana and Obama are-real.

- 1.) Ariana was in the hospital.
- 2.) Ariana is 'now alive' - according to Ava.
- 3.) Ava was there.
- 4.) It relate(s) to my-dispute.

Thus, a new-event!

I am amazed.... Ariana is finally back with us!

It is absolute.....

I have three steps and three goals:

- a.) The relationship of a Besov-space to a statistical and measureable model, is subscriptive it's order, to which is always* amendable.
- b.) Classifier at-that of precept for-which life and circumstance, relate to the Internet, technology, and law, is verified for in social and pondermotive datum.
- c.) The dispute theorem of my [prior] illness, and the post-effective reconciliation relate to law and life of testimony, thus of 'means' to social pretext.

Therefore, science is renewed, and understood through and of these-means, the suggestion that order, and sense, and even so the mental orchestral relationship require the reconciliation of a 1-2-3 of modern time, indeed, the imperative of logical relationship at description of our-world and our-selves.

We are then defined by this structural and ordinal relationship of procedure and syllogism.

This is **secondly**:

- a.) A key to knowing who we are.
- b.) A key to science and phenomena.
- c.) A key to knowledge of life and life.

The 'social complex'; and, a centered* somewhat-middle solution to illness, and for our survival.

The functioning of leadership.

Organization.

And, mathematical description of the guarantees of science, life, love, and conception.

Third; the 'taxonomy of *diagnostic, phenomena, symptomology, and regularity and irregularity*' is divisional [literal] - upon pathology and regular/normal function of the calendaria, upon a (3)|(2)~.(4)!(1),...

a.) Enablement or utilization of pseudo-probability in numerical and mathematical predictive isolably separates and combines the relation of *taxonomy of design, version history, and medical imperative*.

b.) Temporal constrast in* a *flow* [non counterfaced] - to the crystal is (2).1 or 1|2 or such, of 5'/6' and the pseudo, control(s) *expectation of consequence* for in (2) mutual h. or m. or s. etc... *and of blind Elephant*.

Fourth; two-neutralities.

Inhibition via the prelexicographical 'pageanation' of a 8:00 at (@) 6:42:14 for instance, - a 'chunk' of the mental observation and such.

Neutrality and defense, taxonomic underpinning and relation at *non-bio* [distinctual] at that of phenomena of neutrals phase and identifier 'below' a 'SSB - or '**heavy**' - *protected zone*.

Red/Black/Yellow *on fire and identifiers as well as intended instruction*. Blue/Black *on water and firing* - - Grey [abridgement] & SSD (depth) - *Internet*: Red/Yellow/White. Stencil and Stroboscope *at A.I., and pathway*.

So, the SSB-Stereographic/Stroboscope must be mitigated. *Law need not be anything but single-facet(s) and three-colored. A dispute need be two-fold-taxonomically* Green/Red & Black/White. **Suggestion and Notes.**

- 1.) Garden
- 2.) Electronics
- 3.) Health

- 4.) Priorities
- 5.) Writing
- 6.) Reading
- 7.) Efficiency

I'm not doing electronics for a career, ARMY is on-trust, developed, supply, and investment. I resolved the majority of superconductivity. I am not teaching physics.

It will be* perhaps Mathematics &/or Computer Science.

A.) The determinant, at 'secularly provided hermitian and adjoint bases' - makes the 'immersion' a 'fold' *precipitiously* when as- such topological $\sqrt{1-u^2}$ where $u=\rho_t y(z(t))$ or $u^2=\rho_t^2 y(z(t))$.

$STS^{-1}=M.O$ or $M.1$ [a carry or an addend],.... $\rho_z=\rho_t \ln(\sqrt{-g})$.

B.) The *Weber-KdV* is in a perimetry to which coordinal relation and orientation are with respect *to*, a 'latch' and the 'quotient' - [considered] of auxiliary *point of reference*, in $(3(++)2(..)1)$, (2) carries and tables.

In consideration of a 'potential disinclusionary intention at valid means' - the approach of another from-afar is a redshift for in mutually- biased *die*, ... to the *other*, but of conditional neutrality upon a minicual.

$\rho_z \sim y(z(t)) \sim (\alpha + \beta z)^n / (\gamma + \delta z)^m \sim y(z(t)) / x(z(t))$ = $\text{proj}_A \{A \mid \text{of } u \mid \{A_i\}(g_1, g_2, z(t)) \dots ST^1 S \sim P_r \mid Q_i\}$
 $\sim 18 \sim 5^3 + 4 - 1 + (0^2) \sim 1138 - 232 - 815 - 606 - 912 - 1002 \sim 4 - 3 + 2$

$\text{proj}_A \sim 1(\nu) = 2, 4, 8, 10, 12 - (+/-3 \bmod 4) = 1, 3, 5, 7, 11 - (+/-1 \bmod 4) - 9$ [excluded] $13.7\text{ths} \sim 3.6 \text{ h.m.} = 216 - 6, 5, 4 \dots$

*For $6/5/4$ at $8/7/6$ of $(6/5)$ or $(8/7) - (+/-3 \mid +/-1) (@) i > \pi/4 (@) 6$ - identity of the mapping to the transform.

graph identity.

(3): Knot + Jordan.

(2): Variety + Projection.

(1): Graph + Category.

a.) Type.

b.) Set.

'Set occupancy of a symbolic dictionary.'

'Distributative element of non-disturbance.'

Goals:

a.) BSD Conjecture [homotopy and cohomology] of *loose and folded* deRahm cohomologies at varieties.

b.) Device = $[S=2(x^{\{2\}}-y^{\{2\}}), S=1(z^{\{2\}}), S=1(x+iy)]$ *modes and a switch*, then 'translated' over virtuals.

c.) Render it safe [primary and primacy] - etc,... *isolation, and terminology, virtual, and hardware oride*.

d.) MIDI connective and [abridged] utility of *operation, for what is a uvual mutually traversible circ.

e.) Compensator, Tested Touchscreen, New* Elliptic to Hermite Driver, & Qubit Gate, +Programable.

f.) Key (major/minor) - and at (@) guess! For that of a lexicographical impulse, & synthetic response.

945/42 - 599/67 - (+3/-1) - (t-5:31) - (s-599:67)...

a.)-f.) Is answered for the following; certain alogrithms of $(2x|[0.1])$ - swap to a loss in more memory, thus, the benefit of note to that of a learned adaptive 'non-determinancy' only function(s) for that of a base algorithm.

Secondly, the dispute is answered, for of a midpartition on secondary CPU with over-managable 'off/halt' for that of a given at-pause and prompt in a greaterly centralized CPU, per-terms of that of 'a' computer-assisted SMC...

This SMC matches as an FPGA 'certain pattern influences' of-which manage the 'core' of the device thru manual switches - that these, and MIDI, - furnish a manual override of the learning adaptive net, or, for a free-process...

There is a (minor/major) + guess on that of the keyboard, - which funishes a virtualized lookup admittance to a given process - that this admit(s) one to (pause) and remain - and traffic the network at a moment's hesitation...

I finally found that it was false. When Hume's Fork is turned-around, it is stale, for what would be a determination of-self in contrast another, thus that there is a reconciliation - but it defies it's necessary precept - that of Quantum Mechanics. This makes many a liar.

End Dispute

I figure, of the MAX11300,.. we can do the drawing/impediment/discursive/disclosure/isolation/disinclusion / obstacle.... with the ***switches**, on "Device =" *from earlier*, via operational amplifiers.

Thus, the ***gated**-potential is a KdV+Weber at a Sinc-function of the *intermediate signal foundation....* **via Compensator**, at the boundaries of the Painleve 'varieties'. A basically *quadratic-theory with a p_t , on that of the n 'uppercase' - n is 6-29....

What is to be attended-to is bandwidth ($\delta t * \delta \omega$)....

Quantum Non-Ergodic and Ergodic Painleve Simulation

* I don't know if the following will work - Differential/Integral with one-switch, *with the other, various terms of a polynomial*.

a.) Lemon/Lime on v. b.) Coke and Sprite on h. [rail] c.) Bend, away mutual 'adhesion' - 'staple-tolerance' - (sw./sw./virtual assignement)++(h. interop. & *Arduino lock/failsafe). Opt.* - Merely *during code*, manage a 'monojack'....

b.) The general* **geometry** of a Markov-Peirls-Gate-Assembly-Instability, is a *Model-Hopf/Markov 'chain' in two/three.1 in column and row, mixed and unmixed* ***set-theoretic** gate-assignment tables in matrix and or tensor (curvalinear bracket) *chemical neutral point(s)*

in counterweight the manual OOP architecture to a mathematical (planar/toroidal mutual 'from even') spatialized geometric E[k]~.bb.

/-|/_\

I have decided on what I will do next - to write a general *advisory-introduction* to-science, and of the caveat(s) of the limits of knowledge, and of-what comes down to mental illness. with, the Computer, and the limits of computational technology.

The question, does (2x-35x (Chaos)) or only-Chaos, or any of these divisions, remain surjective classically. Among world(s), does the decision remain, and if-so does it ever behave differently?

(Does Chaos translate among world(s).)

I.) Entropy and non-linearity.

II.) Inheritance, and photoelectric.

Broken down as a social-dialog.

If I am undecided ($u=\xi$) then, of one-die, for in (18|5|1) - *the triple**, is an-example of foreignable determinant spec. Thus, for in the contrast at (@)-self, the determination of another, *without sense*, is the example at-all, the motivational truth by in what is tertiary-1.8, in (10|14), - *thus, of stackable 5th, for-in remainder of the rational at a universe, which hold(s) two co-dependencies of other and self.*

Therefore, it is honest, of the providential truth by in whom would be-of-the-self-object, for in their clause of prominary dialog.

"From-self to **an eventual*, there is the dialog of continuum, that therefrom the self* and other* are-defined."

I am glad, but in tears, I have concluded they are-real (*And the self possesses two foundations, to which it exists*), a new epoch begins.

I was so much in sorrow, for - this one thing.

For the self-exists, as per the prior argument.

We [each] imparitally *co-exist, do not exist, and do-exist comparative [another]*. Therefrom, if I were valid (a.) were aware of-me, it speaks of Hume's fork on a pattern* to-which it is determined there is a success-rate and 'test' at-recovery.

How do we correct for our-own *Subj/Obj experience, through psychology or social relationships, or mathematical knowledge?*

Oath: An 'entire' supplication to not-only as-much '*be avoidant of*' - but to **commit** to absence of any and all drug imbibement.

a.) Conditional at *statistics for hospitalization & medication to terms* of recovery*. - *visa-via computer*.

b.) Game relationship via AI, that of the homogeniety, or the split (accessory) of sociological dispute.

The **Mills Ratio, a Complex, and the Bennet' Inequality** are the solution to the reconciliation of Fisher and Bayes, and argued. (+) *Another Occassion of Probability, for in the Nykom? Model?*

Painleve ++ Golden Ratio at (@) rabbit(s) and **mu**-mon... of 7(8).... identity, and extrapolative *Ethical, Epistemological Precept*.

subj, and obj, have a holding on a numerical accounting.

Quantum, for in Hume's Fork demonstratively (adfixes of inertia of two-equivalent and separable theories) a True but Unprovable by one-individual (but not-two or greater) of incompleteness, separable projective identity and rational social dispute.

1.) Hume's fork to lihtmus test on (Guarantee for medical and dating security).

2.) The device (for the enablement of the guarantee and application to technology).

a.) In part Painleve series, and a model for superconductivity.

3.) Social dispute, from light cone to light cone, - for that of the quasicrystal.

4.) Superconductivity and theory of unification of conditions and causes.

Two numerical identities.

Two number(s); *iter.*, *recur.*

Two indices.

What we-require to-implement *this*;

Two order(s).

Two flow(s).

Memory.... under isolation and recombination..... (:).

Clam P-Shell. - Computer LISP-aided Memory Proc. - #Shell.

$K_{\{3,2\}}$ colorable - $B_{\{n\}}(P_{\{r\}}|Q^*(q).\wedge\backslash\epsilon)\leq\backslash\delta,\dots O(m,n)\sim.O(p,q)$.

To ***Shape** the function, we need a marginal (delay[1530*40+ $\backslash\epsilon$]) for a triggered event... this can also function as-a control synchronization delay on the interval of the expression of procedures.

It would be ideal, to ***Then Setup**, a basis for the coordinate and symbol-fixing to translate the geometry and *Stokes into the algebraic-coordinalization and orientation of the synoptic process.

The triggered event is a synoptic to-which the *Bose-gas of the unit cell is decomposed and processed, reset, and controlled, for in a verification of a kind of ***Turtle** - implementation at tools.

Time-series, of a coordinated-basis, in module for of algebraic [sequential] - geometric entropic conversion and ergodic/non-ergodic hypothetical, may [for a holographic crystal] decompose the order of a sensing apparatus.

The 'switch' affords a S=2,1,0, and data-run at (@) (2/1/0), for of a **5'** for the switched element at a Sobolev space, to disaffordance of a Qubit, - thus, *preservationally* the pass-over may afford via virtual net and hardware what is effectively a *Quantum Control Structure, to deficit of a $\log(n)+\log(1/\epsilon)$ on $e^{\{-\}}\#$.

- nu fractional does not converge, the I [id*] had remained typical and known, so-of the *series*, these remain unfractionalized.

- 1.) Does the 'triggerable' remain different from the virtual interoperative, and, *what are the time constraints?*
- 2.) What is the distinction between the layer(s) for in ohms, farads, and henrys, in terms of frequency, ... *with $l(1)$ - $l(2)$?*
- 3.) Is the 'hermite' possibility amendable to the elliptic-process at (@) series, or does it even then work, to tie a knot?

The K-P, for of the elliptic on torsion and tension, and the 'erasing priorly of a 'bit' changes the up-flow.

02:05 pm - 4/25/2024

We begin with an observation, of locality.

We distribute and apply algebra.

There is, then a design to functionalize or subject to analysis.

We have 'the blind' and 'the rule(s)'.

There is, then the accomodation of means to utilize a graphically based prescription at dictionary.

And, the means to utilize a model system, to speculate, via a past-present-future, decomposition in eigenbasis and eigenfunction.... at unity and separative pillars.

One thing, which devolves, becomes earlier, the presuppotive basis at acknowledged 'scheme and variety' of algebraic and geometric description.

Measurement then tailors design, at a precept of application to a tool-founded-basis.

This is engineering.

06:10 pm - 5/5/2024

Stoke(s) 20x.6 does not compute nor pass, for third \nu at factorial basis to gamma in prime, but perhaps matches set.... the analysis must be molded for what is the 20x crystal/capacitor/led/pd basis and wire, in \sqrt(LC), monomial, legendre, 2d-3d.

PITS-v.o.1b

Surplus... a concerted truth; two of 15 into third(s) *still* is-some black from grey from out of the *Random*; thus a justification at die-withdrawn [petaled ember] - *from pause*; it's redress and form.

That I have sold on the vantage, it is of some- 28 down in two, for that of 30+5, and some two 'up', in +1/+1, to a solidification of predictive validity; - *these of*; 18, into 666; - *it's departure from words*.

That of +1/+1|+5, is *then* **sum-10**, that of (7)|(3) of **multiplier(s)**; that of 7.3.45.1, that of 45 in the sequence... that of 45 (up) - unto **nine** (9)./(8), *shifting*; - that of 2+8=10, and +1/+1.0.1, that of **18**.

Thus of +1/+1/+5|0|+1, in 1750 of it's *codex*; - that of some-7+10=17 & some +1/+1/+5/+5/+5 and (9).(8).(6)...(5).(5).(2|3)=23.10.2|1.0.1|3-33.7, in equivalent 40.1750=400+3+1/4=400:81-(1).

That of +5 and 1.0.1, to 5(2)=10, and 10, that of 7/45=6+1/2, 36 cents, and 12+1+1 dollar(s) and cents, +25(@)+50; *with* **sum** (10.00) to (.25)=40 & (23)|(10)|(3); thus a **confirm** on null thefted.

Thus, it is my privilege to which as dissasorted *sum-625 over* 1750, is (3)-125, - that of twenty-five for in **year of plurality**; of it's (1.0.1) of 18 over seven & seventeen; that of (125+125+5+5+5)...

Thus, of 26:5, for in (2), unto (1), unto that of **34** for in 111986553, in 11511750, from which must be $7*3*45*1=220+8600=8820$ with $26*5*666=130*666=14430$ to which is: 12727260 that of a given distance *(distal) of some 115760850 or 643350... into 8615 = $1723*5$ and $15998079*(7)$ to which is 2643*6053 ad 881*18159 and $3*5331693$... that of $400*2+81$, - *thus of 800 to 81 on (2)*.

That it is justified I am lesser so than 800:81 it is within ajuded pretense of an appraisal that I am (+1) and (+10), and (+10) on that of (60) and (60) and (12) = 240 from 265, - that of some-24:0 of a clock and 26:5 of an adjudication... - thus, that of some, 1723&1750 - thus of (27) to (8) to (2)... with (**three over** [in each one of 1.1.1]) - we have (26) to (7) to (2) to (1|0); of a count on redress.

That of (36) is therefore divided into five, and that of 265 is divided in six, - that 26:5 is the count, is it's plea to which (265*6=1590) is less than 1750; thus of 160 of which is a *final-15.18=190, that of some-30 under (in .25+14.00) = equivalent to 165, and 265, - thus that of third(s) in **top**.

Therefore when it is adjusted of a *bar; the given equatement of 165 and 265 is 6 2/3rds, and that of (11); that of (-1) to-down of a past, for that of the third consequent of a factoring process at 1.1.1 and 1.0.1 from which are 17 and 18; - **thus that 3.0.2 & 2.0.1 and 1.0.1 produces:** 26:6:2:1... a cent-short of that of license to which is provoked for in paid-incentive yet-ahead of a high noon & midnight... - that (1.0.1 and 1.1.1) reverse *sense* through the calendar, we have **18 over 17** of 1.1.1 associated with 1.0.1, - thus that a day has passed 130 to 140 to 150; - that of equivalent partition.

13+14=27 to innocence and 15 to non-participance as 12:3, - given (1.1.1) as a *Hypothetical* proves that 27.(6+/-6).2 had been the granted trial in bearing to a day - for which 27.6 to 6.2 is 2.8 to 4.8... that of 24 to 14; - two cents over; - thus of (+/-2.0) that of 27/6/2 is the final veto-consequent of a naturalized domain from which +5 had been +5 and +2, and +5 and +1, and +1 and +1; 12:5:1 as to 27.6.2=12.5.1 in-irony as *output*. Thus that of 15:1:3 on an end-game for the 'hidden' invariant.

A:) Make-sure the CMOS (*threshold-step*) is within protocol of the *QuBit*... were this to escape me, I would likely be searching in the ***Dark** for some-ages...

B:) Component(s) recompose for in a fatal-singular quality*; from which they are identified as elementally-pure of their intimacy and competence, completeness, and determinant edge/furrow/and particle limitation, upon a solid-assembly; - thus that of what may be take(s) entire-secondary property of individuated sense of retireable end-addend...

f .o. tau = L

sig.note=decimal.post

sigma(t)=z(p)

[In keeping with pedagogical and histiorological impediment of superlative teir teir formative nature of phenomena.]

Applied Phases and Inheritance

Introductory Summary:

I.) The 'Elliptic Group' with Schwartz Differential; satisfies an elementary differential equation with squared and non-squared first and second differentials... the Spin-Classical Correspondence as illustrated by Bell's Theorem, on entanglement.

II.) This renders a law of inheritance to which the 'bel' and 'non-bel' statistic can be furnished to produce New Correspondence between The Relative and the Classical Limit, as well as producing A Quantum Gravitational Correspondence, of the Hamilton-Jacobi Variety, in a general Topological setting.

a.) This satisfies all differential equations with Integer Coefficient(s) on differentials and powers of differentials...

b.) That it relates an equation of-form $f \circ \tau = L \& f^{\{2\}} := f$, there is an extrapolative.

c.) That it solves co-determinism of the nature of 2(1).0 and 1(2).0, there is room for the double slit, and the mannerism of the expression of the unified 'mechanism' of Deus Ex Machina.

That of what I came up with [the above] need be gone-through,... that of the 5' on a decision tree, in perhaps two way(s).

There is past and future, and chronology to-explain.

III.) The EPR paradox is resolved by consideration of the mathematical intractability versus it's computational accessory, for in virtue of the separation in-space, - that the quasi-determinism of the world vs. a blue shift only to-Mercury, and red shift only for 'above' gravitationally, separates in time in equivalence with the unitary operation, for in that of strict determinism vs. the pole-barn paradox. That this leads to a 'one world' interpretation, there is validity founded on a strict separation between a theory of gravity and quantum mechanics as written and spoken, but not for that of a unified architecture for which there is a theory (m) and a theory (u).

a.) Versed in terms of this, much of co-dependent arising can be broken down into various constructions, for that of the literal (5)(3)(4)(2)(1)(!)(0), and that of 2(1).0 and 1(2).0 into which it is versed.

b.) At the End: A Theory of Temperature, etc... via the equipment [design/device] of [essentially] uncrossed Thermistor(s) through-the-contact efficiency, to-which $E \times B$ and $K \times L$ and $E \times B$, maintain inertia, for that of a focus, and Concentrated Constructive and Deconstructive Interference of Bands.

1.) This takes new-mathematic(s) to model, via the undecidable, for which are two-drawers, for that of a given, as visa-via; the connection to auxiliary equipment render(s) implausibility of a [cc] measurement! - optical?

IV.) a.) Non-locality is subsumptive to locality, within the considerate 'mean' $L(1)$ and $L(2)$?, of the "paradox" of reality, it is co-dependent... thus co-relative of determination.

b.) Dissolvant?!? - One curvature appears to be co-dependent and co-relative,... but this cannot merely so be the restriction to an 'Equivalence Principle' - thus quantum inhere(s) of a mathematical dissolvant?! Co-attribution.

V.) I have [after much deliberation] - to *only* do that of a model for Superconductivity, that of an-exact solution to the two dimensional ising/heisenberg model, with berry(s) phase.

a.) This 'geometry' in-as-much as the non-commutation of lorentz boosts directly translates into a discrepancy by which spins align and exchange may reduce energy, for as much as $(4J)$; thus, it is satisfied.

VI.) I have the result of the finality by which my 'publication paper' may be reduced, - that it is that $(2)(1)$, and that of incompleteness may lead to an *answer regarding the dissection of causality.

Main Material [A Sketch]:

Superconductivity [for a removable equivalence principle] take(s)-place as a soliton elicit(s) a covariance of scaling in spin $(1/2)$ to multi-degeneracy, then that $(two)-2$ window(s) are localized behind-one. Thus, temperature is Ayin, to what is the alternative of Beth, for of a translocation in what of either are Inhered dopant/interior $L(2)$ upon $L(1)$, of it's alternative at E&B, thus, that light localizes electron inertia, and is temperature activated.

Superconductivity is [a past heritological arrow] by-which the $(2x.1)$ separates for in past/future, and that of the Markovian Truth at Predicate, for in-involution, a D wave of $S=2/(1/2)$, of four fold $SU(2)$, in valence and co-valence of spin and charge,...

The end conclusion of superconductivity is that thermalization activates a gap to which $L(1)$ and $L(2)$, inhere of a past heritological arrow by which the $SU(2)$ is non-local, for of that of soliton virtual-past-redshift, on that of which the x' and y' mediate a separation in phenomena....

that of the spin is therefore increased by a factor of two comparative the texture, - to which electron(s) attract, given doping.

Superconductivity develop(s) by an-inversion of $g_{\{\mu\}\nu\}$ upon the Hilbert Space; in certain terms of the L(1) and L(2) in-epsilon behavior of the Weierstrass-P function(s), for of the behavior of logical inheritance, to which is non-void.

It is 3D, and Erica Carlson is correct, but of y' and x' , they are not entirely orthogonal, thus, I have been given a step-up, - that I see how the crystal, may inherit an off-momentum, through the L(1) and L(2) of a dark mode, for that of the Dirac-point, - that it is 'folded' - thus of five testimonies.

Thus, there is perfect back-scattering, and a redshift of accounting for the factor of two from-doping, to which the (-2) factor of attraction completely reverses, the (+1) of-repulsion.

The Pauli-Exclusion is afforded by the logical inheritance of the gravitational reversal.....

It is *very possible Superconductivity is here to teach us something new about that of inhered properties via General and Special Relativity. That of the 'one-way' process, can only be so-stated, it is difficult to derive, but, time appears to play a role. That of edificuary appears to be to evidence that of the redshift, - namely, that one scope and null invariance takes departure from-another, for in the reversal of ExB, etc...

That ExB has-reversed, I had not considered, but it would be good* to simplify.

Pauli Exclusion may remain, but that of the ExB, for in it's reversal, implicate(s) *time*-has-reversed*, or at the least a future has gone to a past,... for of redshift, - this is consistent, then that it indicate(s) something new has taken place.

For of separation, clearly, the non-local interaction is stronger than the locality **Brownian Bridge*, due thermalization and ExB, - in (L) and (R), there is the unpredictable, and the choice of coordinates.....

That I may have just solved this.

I must 'trim' my model to the bare essence. That I have:

a.) 'bel' and 'non-bel' statistic.

b.) 'reversal of causation with respect to $t_{ab} > t_a$, etc...'

c.) $L(1)$ and $L(2)$.

I see perfectly how (a.) and (b.) suite one another, and how (c.) is a consequence and necessary, but it is one step from being 'all-clear'.

I have -resolved- *the enigma*. Spin(s) *represented and physically instanced* by **bivector(s)**, in the limit of N goes to +inf demonstrate a 'new' resolution at-and-of-emergence, a quantum quasi-solid/crystalline structure which amelds to a mathematical substrata, through a *Historical Arrow*; of which $\Delta t_a \geq \Delta t_b$ as s.t.

1.) Despite what challenged me [good versus evil - at that of post-hoc criticism of paper(s) and book(s)], I decided on the following..... - that for clarity, which was not what was decided [there was a positive outcome]. That I must follow this route of speculation, - *for what it is* - and judge-rightly; *I am esteemed*.

a.) I decided I must do basic and preliminary mathematic(s) on the elliptic group, into and of a backing of causation [the first publication].... and:

b.) That of a two dimensional model into that of non-locality, with three dimension(s) as-well, for which the topology of the zero-set is measure-zero, and correlates with the above mathematics.

This is my first project. It has numerous application(s), and to be considered [separately] is just-how mathematical our-world is, the essence of a foundation to what-is. This is sufficient, with chaos and order, order of phenomenologies, and phases. That I can innovate a device, the goal is:

2.) An electronic device, and or material which separates (asymptotically) the electric and magnetic field and is thermally amenable to temperatures exceeding ~100-140 degrees celsius.

a.) And (&) focuses the relationship of either field quality.

The 'DC' *from-phase-to-amplitude bias* hint(s) at the Elliptic-group, for in $(1/2)^{2}$; of $\text{Exp}[-(a^*\tau + t^n * m)]$, a n and m 'index' at

$1/\sqrt{v_0 \cdot c}$ for-in quadratic-reciprocity of 'Area-to-Perimeter' of $(4\pi/(2\pi))$, a maximum.

Thus, the Elliptic 'group-frequency-relationship' abridges, - for an *unknown* reason, that T [temperature] and *freq* for that of the (accounting of Hall-like effect) - on that of 'AC' and **beat** phenomena, of pk-pk, in some 15-90%... *Of E and B.*

When I considered the ExB *drift*, it was settled that the 'commutativity' and 'non-commutativity' of certain *Lorentz Transformations* would lead to a perturbation.

With that of $A \leftrightarrow B$ under involution of observation, and the $E^2 - B^2$ vs. $E^2 + B^2$; that of E.B, was noticed in the 'Device' to induce self-transparency.

That the $L(1)$ and $L(2)$ leads to a 'hypersphere' selection rule of $(1/2 \text{ or } 2)$ was the next step, then of an inverted Variation Principle. And, then that of the 'drift' to a Hamilton Jacobi equation 'inversion' of character, upon relativity, for in 'future inheritance' versus 'past inheritance'. That of the 'redshift' was then-noted.... of 'spatialized truth' w/o projection, thus that it is not CPT reversal, but rather a redshift dominant via a Green's Function, over that of orthochronous transformation.

That of invocation of a mass gap for in a 'shadow element' was then clear via a trapezium of action.... that thermalization leads at once to a pure random with determinism at space like separation.

The entire Periodic Table is up for it's realization.

That of the 'covariant derivative' - for that of the Γ_{μ} added to the momentum, give(s) an-imperative as to the manner of consideration 'back from time' - *to that of the inherence by which gravitation is subsumptive.*

That this only 'half' obey(s) co-determinism, there is allowance by which the 'past' becomes partially mathematical and partially physical, - that this remain(s) ***unknown** as of this writing, and as it were, - by many...

I remain with one *hint, as to the mathematical/physical arrow...

Γ_{μ} with a non-Abelian 'theory' obey(s) a *connection* which is non-linear,... and linear, thus, the quadratic form (answered in

the Elliptic) operates via a Decision-Tree monic/linear Elliptic functional Process.

$\{f_{\{1\}}, f_{\{2\}}\} \rightarrow ((2)|(1)), ((2), (\#)), ((\#), (2)) \dots ((\#), (1)) \dots ((1), (\#))$.

a.) #1:) Computational/Device addendum/helper.... code and Device, Patent.

b.) #2:) Update to Special Theory of Relativity.

c.) New Non-Local Entropy/Thermo~.Like [network] / Causation/Soliton/Wave~.Separation....

d.) Superconductivity (*Homogeneous $N \rightarrow \infty$ Limit(s) & Phenomena*

#1.) That of any R-G *flow* to either-Ansatz or Geometric* Domain of Hyper-elliptic nature is co-dependent on a departure and approach from one of two phenomenologies.

#2.) That of a Lie differential in Jacobi-Gauss (AGM) for in that of Bessel-ruleset is converted into a Hypergeometric Rule-Set via Weierstrass-P function (under an exponential) with Unitary or Conversative Basis.

#3.) What-happen(s) to-the-world *when we consider* *[and of the process of dissemination?] - releasing this theorem, a bag of popcorn? or a snail? or a wheel-examination? - not what presumption but, it's foundation.

a.) What is this-theory [to publication and intended audience] adjacent-to, of other theories, and speculations, considerations of foreign nations, and the tumult of a divorce historically from a landing.

#4.) Direction at a Coriolis-like Force, for in that of Field*; circumferentially is harmonically L(1) and L(2) to either of a push or pull, upon a mathematical-division, in the 'bel' and 'non-bel' relationship of particle.

#5.) This for *that*; scale inapportionment is a space-like null covariant relationship, to which either manual *variable* is prudently cross similarly answerable, isolably answered, and rote cyclically distributatively assurable.

#6.) Two unanswerable *truths* relate to a third-yet-answerability in a remote become locale of any undivided truth, of what in-cause

from *formation*, decides the manifest utility to a progression, thus that things that are equivalent must couple.

#.7) One unanswerability therefore does not but-yet remain of a **future*, to which non-delimitatorially possess no-outcome, but from yet what is consolable for in a *further* spatially and temporally undivided lesser so mean gestalt pathway.

#.8) Thus, reflection(s) are initially the background become foreground of what is a past possession in either of one or another (L/R) dispossessor of one* but two, undersituated processes of which formatively disambiguate mathematical edificial and remissitorial unreclaimed formative hypothetical(s); - that the past therefrom is unpersuaded to form a future. And, furthermore, causes disambiguate what is a physical from an inherited past reservation of two total remainder(s) of a pattern. Thus, a pattern and a pattern, in portion incomplete, but completed, formatively establish a future predictor.

#.) Neither so selectivity of bias can alterably include the disambiguation to which one inherited past is formative of a valid err-prediction of and upon a future historiologically written or conveyed basis, that therefore in turn the pro-selective element(s) ambiguously possessed of two formative pattern(s) eliminate what is non-duplicity and non-denial of a projectively misheld relationship. That therefore one pattern, for in any, relate of what is the simple-duple(s) of a carry and addendum by which a future or past chronological 'outer' subject-alias in dichotomy is understood by locally held 'outer', and of inner what is inner. Thus, neither pro-selectivity of a bias but of the acknowledgement of a process in-turn to which identifies with a present manner of dichotomy of character of livelihood, may inhere of but yet all postulanal concilitorials.

#10.) Conic in conic, of [tan] in a quadric of [sin] in [xi] and [chi] remains an amelded non-simultaneous co-locality of one world view-to-another through an identifiable emergent topological invariant manifold restriction of the edificial commutative algebraic underpinning of a variational co-addendum. Essentially, quasi-stasis provokes of the $3/2$ and $4/5/3$, to an-addendum in six-manifold $(3/2)$, dimensional tonality 'abridged' at spatialized separation of decay chain process.

1.) That of the [onto] projective and non-projective identification of quadric(s) amount(s) to that of a mapping by which a 10th dimensional order is subsumed for the sake of conditional assumptives into that of a four (4) dimensional mapping; i.e. the projective quadric reduces under a number-archetype.

2.) That of composition, for what it-is, leads to a Reisz basis by which the orthogonal complement in the birational co-extensor relates to a $P(2)$ instead of $P(1)$ upon the $N \rightarrow \infty$ limit, whereby hyperdimensionally the electric and magnetic field relate to three dimensions upon two **(2)** zero-measure quotients.

3.) That of the classifier of a 'quadric' is called *comparative under complementarity* to-that of a *Lorentz identity*, for a *mapping* of $SU(2)$, for which the *conic Section* relates to that of a *Lorentz Transformation*,... - thus, that of the redshift and blueshift are compositional under like-kind of $(+|-)$, under the *Composition of Invariance of Inertia*.

Thus, that the monic-determinant for the group $(+)q$, correlates with that of the univariate formation of a topological identity. That of the universe is therefore *Qualified*, by that of two **(2)** mathematical and two physical structures. That we identify with that of a $(+)q$ and a $(-)q$, then, a $(+)p$ and a $(-)p$

4.) A 'mathematical' *heirarchical functional abridgement*, super-sedes what-is-to-come of verifying mean. That the [wave] structure is apreceded, and the precedent to which it it suppliantly acts as a **Character Portion*, unto example, by which it involutively relates of a back and *forward cast element of phenomology*, unto Unionable tensivity, by which portion and portion are segregationally un-but-faulted unto segmentation and apportion.

I have *thought* of calling my-Book:

"Functional Abridgements and Functional Relationships"

$\epsilon/(1-\eta^2 z^2) \rightarrow$ The real reason, analytically, coloring Gabriel(s) horn, there is a topological isomorphism of two-varieties.

That of a Riesz-basis for that of characterization, for that of the Bessel-like* sequence, is proven to be erroneous with to a 'former primary' characterization of qualifier to be a Hilbert space valuation/operator.

That therefore, the $\text{Exp}[-l^* \wp(a,b,k_1,k_2)]$, is the only* predicated ***Convex**, [two solutions to the Universe], problem, for that of the Bessel Qualitative 'group' - *this had been what was missing*.

The Key*. Thus, the inhered truth is that on-existence, memory is defunct, in-part.... or, perhaps.... of awareness. Thus, there are higher

and lower order(s), of (L/R), we have glass-bell and forest.... That of these, for what they are, are related to direction.

That of the $\exp[-l^*\wp]$ becomes the Bessel like relationship on recurrence, - thus, that of the stochasticity of the Universe.... in terms of local and global pattern and archetype..... for of sufficient, necessary, and satisfactor preliminary prescriptive meditation. That of *this*, begin(s) at stage-two and emanates to stage-1.

The Riesz basis determines an SU(2) in relationship to the pattern, - that there are some steps remaining.

I considered that of a ring: $G(R) \& I_{\{n\}}^*(f(n))$... so, this 'Ring' may have multiple-identities, and relate(s) of two, in knowledge and ignorance, ... then, of bel and non-bel, 'on' what is a tensor/toplinear $GL(2,R)$, *into* a generalized ***Category**, or ***Space**.

We are equipped with a 'metric'; and *fold from one spatial relation of E.P. to another*.

That of the transformation: T; relates of-which there is a mapping in 4'5', on 3', that of 'missing' - in two, to a *locus*... & a general group g.

G is it's transformative process, - thus $G(T)$ evaluates under involutive principle, to that $R(u,v)$... by which u, v, are *element(s)*.

Thus, that $G(g)$ is an isotropic identity of spatialized nature, and $R(u,v)$ are spatial or ordered relations on that of the $T(g)$, - to which is a relationship cast-further, or in (two - what is a monic 'hidden'....) - thus of **void**.

Electronics Project File

Concern:

At least three note(s) are for jotting-down here.

- a.) I expect I will need a (t,x) on that of the wave, to (capture) the PWM etch.
- b.) The of the Hermite to non-Hermite [elliptic] is necessary to guarantee.
- c.) That of 'marking's' and 'etching's' remain the strata of the playing technique.

One *further* note:

I have shifted to a more demonstrative-style,... that it need(s) to be geared for that of music, - that I want $(a_{\{t,\rho\}}, v_{\{t,\rho\}}, p_{\{t,\rho\}}, u_{\{t,\rho\}})$, and the multiplicity of presses. We will need a '*spectrum*' to-advance.*

Thus, *wavelet(s)* need be innovated, and geared into PWM 'etches and marks'.

Then; - there is one final design [issue - w/ Mathematics] to care-for. That I have a ****final-design***.

There-remain(s) 'a':

$$\sqrt{sn^{\{2\}}+e_{\{1\}}}/\sqrt{cn^{\{2\}}+e_{\{2\}}}\sim\sqrt{dn^{\{2\}}+e_{\{3\}}}\ast\sqrt{sn^{\{2\}}+e_{\{1\}}}/\sqrt{cn^{\{2\}}+e_{\{2\}}}$$

And, of, the 'metatranslation of $(sn,cn,dn)\sim.(0,1,2)\sim.(1,0,2)\sim||2x.01.00$ on': $(e_{\{1\}},e_{\{2\}},e_{\{3\}})$.

My *Next Process

I will **need* design a **Wavelet* filter, for that of the device, -o

- 1.) ... To see if there are any other hardware modifications/addendum(s).
- 2.) So that I can 'primitively' explore whether PWM method(s) work to decipher (2.0).

To possibly make-contact with old devices, condition(s), and venture.

That I remain [with the absolute(s)]:

For in a necessity of a 'blind conditional' two-tandem-given(s) are supplied, of which are immunities.

- 1.) The backward 'via' to which is expositive, remain(s) of a uniquely held disconnect from *another* [individual].
- 2.) The necessity of a [re]-funded truth, for in exposition, at intangible 'edge' of *blind*, relate(s) of the **given* that *when* it is argued that the prescriptive contra-via on probability, via random and 'pure' assumptive* basis [*is-blind*], it hold(s) that the 'blind' assumptive

conditionally & surjectively is of *onto*.

Thus, historiological truth [of weaved timelines] may be promisefully remarked, and this, remain(s) an absolute.

In inference *&* co-dependent arising.

- 3.) To make progress on the *new two-stage device.
- 4.) To mathematically **model* the-system.
- 5.) To engineer respectively virtual beside hardware, for that of the future device.
- 6.) To weigh of that of the touchscreen.

** Re-understand how*-exactly it breaks down the Hermite-basis...*

And of mathematic(s) and physic(s) and engineering [electrical]...

** Re-understand how*-exactly it is taking-images...*

And of mathematic(s) and physic(s) and engineering [electrical]...

** This will be required* for a mathematical-model...*

I:) I will make a sacrifice, and compromise, - that I will run over standard MIDI cables, (2x) - And; get the (8 bit) working, of the touchscreen, and the interoperative of the devices, that I will ***Standardize**, and - I will; use* synth-processes, for in I(1,2)/O(1,2), at-that of the signal analysis..... on the device (v.a1.2 & v.b2.1 & v.c2.5), & PWM w/ sinc(n) & driver....

Get* another; breadboard & part(s); build; two touchscreen(s).

Then*do; PCB SMT with MIDI, and do enclosure myself.

Work on-this with-the-University.

** The process *remain(s) complex* however, the exponential, for in a Sinc[nx-b], of b, remain(s) a neutrality of an-exponential for in the infimum.... Thus, of neutrality.*

- When you square an ellipse, you get a doublet, of a perpendicular cross section of a L-S, you get a double root offset. It appear(s) that to all order(s), the polynomial is monic, and bifurcative, in the 'blind-blind-determined' attractor-set of two keyboard-dictionary role(s) with respect to (1)/(0), and (U)/(A).

- Hence co-determinant variables of survival are determined by open and empty co-determinantly inferential truth-tables of awareness, in relation to experience, of open and empty sociological context. Hence, their polarity is a relaxation of one into either, and is therefore to all orders of null epsilon, truncated as a biased recurrence in the rationals.

a.) Fisher and Baye(s) - a *Transformation* - in the Gaussian - for that of **Elliptic(s)*.

b.) Fourier separation in O-minimal theorem, and **Compactness*, a *theorem*.

Conserved Quantities, and measure dictionary?

1.) Physical measure and weight dictionary.

2.) Perpendicular and Square Aperature Circle (90 degree) - arc-tine language assumptive.

3.) We have a prioritization of an inheritable descendency of commonality at past-prefix.

Electronic(s): PWM, a.) Co-localize my RMS(phi) aperature degree radian, to float and amplifier, and gross intensity.

b.) Fourier (basic measure process) - in wavelet [eventual - goal*] - and RMS *bunch [re: bandwidth].

Segway:

I must take a step-back, to utilize **generation** of mode(s) on the touchscreen cavity.

- When we-go to conceive of these as Two-Dimensional 'bit's'... we must make [or adhere] to the functional relationship of information

via-64, and *their* 2^{5+1} ; thus, of the 'sides' and 'fulfillment' of the Qubit.

- Essentially, it-remain(s) *Quantum* - via that of two-signifier(s) in I/O, of polarization of an E&B wave, in interaction with a $E+E^3$ term, [a Kerr effect] - via which for light of the precessional attribute, *relativity is manifold not-strictly-quantum, but isolable.

The 'angle per declination' 'therefrom' remains the sole abdication of one variable among two, *for*, of RMS in (ϕ) and (ρ) - that it can seemingly respond to CCW and CW simultaneously, upon a four-wire-design.

Thus, for in the constraint of angular momentum *and quantized unit(s) per a scalar, the derivative hypothetical is that it is validated of a mesoscopic, eliminability of one degree, for a trade per two, to the secondary, per a manual topological switchover on the Fermi boundary condition.

- 1.) When* there is a projective-disc, for in *imaginary* or *quadrature*, beyond $\pi/2$, - that of this, glued to a klein bottle, result in an aprojective torus.
- 2.) The $K_{\{3,3\}}$ topology, in switchover - *braids and twins the majorana(s)*...
- 3.) Half* an SSB, remain(s) remotely [unobtained] but through an infinite barrier dirac.
- 4.) The twinned nature of reflective identity conceals in Jar A, for Jar B.

Thus it is prone a measurement theorem.

Simply-put the RMS [within] and [without] - for that of the $\pi/2$, in $\exp^{\{-\log[\cdot]\}}$, process $x-y$.

Process II:

The *newest-design involves *Two Adafruit connected to *one Arduino*,... in mutual(s) $R^{\{2,1\}}$ of RMS,... to set up a tensor affinity, of that of a spherical 'ball' inside a spherical 'ball' - the 'subtine language' of it's *floating layer-process, due the topology of the circuit..... and in a 'loose' sense, the **topology** of the category and Finite Arithmetic process on mutual-elliptic(s) - **in fields***. This should provide a ripe avenue for that of study of the Painleve equation(s); that I will need set up a new touchscreen, - *at some point* - .

Process III:

Under - *parsing* - we may compute 3×5 , by that of a (2) - *prepared state*; and (1) - *prepared state*, then of a switch (on/off). This admit(s) *with virtual to act as Hysteresis*, - a way to do *basic-accounting.

For example: $(2+2+1) \times (2+1) = 15$.

Process & Step IV:

I needed* unhinge the two* frequencies of generation! That this admit(s) acceleration, - thus, *I will make a shift to a new model*, - that this captures position, and acceleration, and velocity, with various modulus and therefore inertia of the group.

I will create a testbed for my-idea, and use it with this process, on V.4.0a and b with that of the *Arduino* **and** (2x) on the *Adafruit*. This may take a week to three, and I will need do the Driver stage [again] - I have some questions as to that of the mathematical* modeling, and the circuit topology.

Essentially I am done with device rendition I.1.

Step V:

With a **burst** of .2 ms i.e. and then .05 ms, at two frequencies, we *should*, be capable of comparatively determining an *initial and transient* (within $l(1,2)$), [rms] - for that of the 'depth' of the oscillation....

Quintessential Plan

a.) 16-20 year(s) from now [a dedication of some 8-12 years] *The next parallel*.

1.) A mathematical 'technique-table' - in substitution for decidability, that admit(s) us to produce a 'lemma-style' for the decomposition [based on group... etc] - and Airy, etc, i.e., at that of statistical/geometric law(s), which take and translate the meaning of mathematics.

- b.)** Percolation and Electronic(s) [why electronics and which*-devices works] - that of the Mermin-Wigner theorem and gravitation (1d-2d-3d-4d-etc).
- c.)** The commutative and Fisher and Bayes, and the connective *group features,... ways to reinnovate QED, and secondarily explain the Topological character, etc,... through a monic, and the (exponential/etc) - geometry and algebra..... and set and Lie group.
- d.)** Superconductivity and reading, Hume(s) Fork, and Law, and various* Studies.
- e.)** Homotopy invariance and Cohomology, with the Painleve, step, and associated 'tier' of result(s) regarding the 'master differential equation and superposition formula' as to Various* mobius and such regarded 'group theorem'.... with various initial conditions and solutions.
- f.)** Computer; vertex and 'node' discernment; placement and process, determinant learning depth theorem, and linguistic meld and separator in Godelian Incompletion [credit(s)] and basic [**code**], Law [basic/biscuit] *memory, and *Group depth theorem(s), virtual/hardware (70).
- g.)** Projective Algebraic Geometry and *steps to assure engineering navier-stokes and Painleve variety [steppe, and non-steppe] - meld/cray - Re-purify my sample between firings.
- h.)** Quadrics - Algebraic Projective varieties - [mature] - $1/2$ and zx^2 ; coordinate Lang., and thermal conductance, guide *laser* [**remote safety**].

We have the transformative symmetry, and* we have the derivational equative "solution".*

Robe and Role of personality of piece, in playing positioning and placement w.r.t. the 'board'.

Final Goal at Science

Part I:

Inheritance, Inference, Deduction, and Lemma; a treatise on the knowable facet(s) and channel(s) of *Quantum Mechanics*, in light of

Relative Entropy and the Equivalence of Frames.

- 1.) Photoelectric effect.
 - a.) Planck Spectrum.
 - b.) Crystalline Structure.
 - c.) Specturm of Observation.
 - d.) Measurement and Weight.
- 2.) Mermin-Wagner theorem and Phase Transition(s).
 - a.) Heat, and the observation that zero-potential is related to thermal behavior.
 - b.) $2D+1D$; off-tangency.
 - c.) Relativity and Thomas Precessional Beats.
- 3.) Mathematics, Elliptic(s), and Quadratics.
 - a.) Geometry.
 - b.) Algebra.
 - c.) Arithmetic.
 - d.) Algebraic Geometry.
 - e.) Information Science - binary and non-binary [non-organic].
 - f.) Minimal-O.

- 4.) Entropy and Relative Entropy.
- 5.) Thermodynamics and Gravity, speculated.
- 6.) Spin System and Fisher and Bayes.

Goals:

- a.) BSD Conjecture [homotopy and cohomology] of *loose and folded* deRahm cohomologies at varieties.
- b.) Device = $[S=2(x^{\{2\}}-y^{\{2\}}), S=1(z^{\{2\}}), S=1(x+iy)]$ *modes and a switch*, then 'translated' over virtuals.
- c.) Render it safe [primary and primacy] - etc,... *isolation, and terminology, virtual, and hardware oride.*
- d.) MIDI connective and [abridged] utility of *operation, for what is a usual mutually traversible circ.
- e.) Compensator, Tested Touchscreen, New* Elliptic to Hermite Driver, & Qubit Gate, +Programable.
- f.) Key (major/minor) - and at (@) guess! For that of a lexicographical impulse, & synthetic response.

945/42 - 599/67 - (+3/-1) - (t-5:31) - (s-599:67)...

a.)-f.) Is answered for the following; certain algorithms of $(2x|[0.1])$ - swap to a loss in more memory, thus, the benefit of note to that of a learned adaptive 'non-determinancy' only function(s) for that of a base algorithm.

Secondly, the dispute is answered, for of a midpartition on secondary CPU with over-managable 'off/halt' for that of a given at-pause and prompt in a greaterly centralized CPU, per-terms of that of 'a' computer-assisted SMC...

This SMC matches as an FPGA 'certain pattern influences' of-which manage the 'core' of the device thru manual switches - that these, and MIDI, - furnish a manual override of the learning adaptive net, or, for a free-process...

There is a (minor/major) + guess on that of the keyboard, - which furnishes a virtualized lookup admittance to a given process - that this

admit(s) one to (pause) and remain - and traffic the network at a moment's hesitation...

I finally found that it was false. When Hume's Fork is turned-around, it is stale, for what would be a determination of-self in contrast another, thus that there is a reconciliation - but it defies it's necessary precept - that of Quantum Mechanics. This makes many a liar.

End Dispute

I *figure*, of the MAX11300,.. we can do the drawing/impediment/discursive/disclosure/isolation/disinclusion / obstacle.... with the ***switches**, on "Device =" *from earlier*, via operational amplifiers.

Thus, the ***gated**-potential is a KdV+Weber at a *Sinc*-function of the *intermediate signal foundation*.... **via Compensator**, at the boundaries of the Painleve '*varieties*'. A basically **quadratic-theory* with a $p_{\{t\}}$, on that of the *n 'uppercase'* - *n* is 6-29....

What is to be attended-to is bandwidth ($\delta t^* \delta \omega$)....

Quantum Non-Ergodic and Ergodic Painleve Simulation

* I don't know if the following will work - Differential/Integral with one-switch, *with the other, various terms of a polynomial*.

a.) Lemon/Lime on v. b.) Coke and Sprite on h. [rail] c.) Bend, away mutual 'adhesion' - 'staple-tolerance' - (sw./sw./virtual assignement)++(h. interop. & *Arduino lock/failsafe). Opt.* - Merely *during code*, manage a 'monojack'....

b.) The general* **geometry** of a Markov-Peirls-Gate-Assembly-Instability, is a *Model-Hopf/Markov 'chain' in two/three.1 in column and row, mixed and unmixed* ***set-theoretic** gate-assignment tables in matrix and or tensor (curvalinear bracket) *chemical neutral point(s) in counterweight the manual OOP architechture to a mathematical* (planar/toroidial mutual 'from even') *spatialized* geometric $E[k] \sim .bb$.

Notes for my Journal

[*repository - of steps*]

#.) I have chosen the future, to become unto.

- a.) There is the past, of eliminated consequence (in the present - written) & (of the future).
- b.) The future is undetermined, but the only-knowable, - that of whence, and of what is to become.
- 1.) I have decided on medical practice and social dispute, and the reconciliation of the individual.
- 2.) I have also-decided on a hobby, [studies in mathematics, physics, and engineering] and a focus* on my health.
- A.) I have two-questions, and two-aims, for the next 4-6 year(s).
 - a.) Illustration of the finitistic reconciliation of the group theorem of Beltrami/Dar'Boux & Poincare.
 - b.) Illustration of predator/prey and reconciliation of-time, for that of social dispute at growth/extinction.
- B.) The secondary precept has to do with:
 - a.) The social/internet.
 - b.) Hope.

I will write four book(s) and one article.

- a.) Social Dispute, Laws and Buddhism.
- b.) Buddhism and Medicine.
 - 1.) *Focus:* Dependent Origination & Beyond Emptiness
- c.) General Physics & Equiparticipance.
 - 1.) General Inertial Motion of Bodies & Frame Equivalence
- d.) Design of Computers & Social Dispute

- A 'select' *question*, has* or-justifiably or justified as necessary and sufficient to an-argumentative basis, the social dispute entirely *shifted* since the arrival of computation on-earth? When and where has this occurred celestially? What is our limitation?

- What of pseudoprobability and occurrence, the foundation of a 'mechanism' for the machine* comparative a sentient species?

- What is our perimetry in terms of time, and geodesy, and of the historical* **contextual** debate and singular contributions?

Saving us from - and global confirmation of Global Warming - Confidence, Life, and Death.

The device can-manage, a eject/priority/of - top-block, *outward*, floating.

It can also manage (two intercarries in four).

Or; hidden variable to geometry in (3x2.0.1) of projective non-2d (3d) hemi.

a.) Ariana [supposing of this] is not-Ava.

b.) Obama conveyed the ring to Ariana.

I am not these-three.

They are in fact communicating - via life and death, and independence. Life has been detected elsewhere. It is not my mind. - 01:01 pm.

The crisis is over - it ended with that of acknowledgement of Ava and Obama, for what I wouldn't know. Both are alive, and I am certain (*as of the note of this passage*), through my means.

I could not parse they could not hear me, until, - that of the abatement with acknowledgement of the other, - thus, this explains the illness.

For of Ariana, at that of preparatory, and delay, for what it would be, Obama had signified he was alive, then Ariana spoke, to whom of which there are two, and at that of string, for in phenomena.

I feel better, and was a success of a means for of the ill, *just* far-enough.

I made it through the crisis, - that it took some 20 year(s). I could not parse (i/o) that of the quantum behavior with that of the geometry of space and time (*and of related procedures*).

Building my device was a wonderful experience, and it may play into my future, in some manner(s). I am exhausted, and only going to do what is required, necessary, and sufficient, avoiding the 'ad hoc' and 'intuitive' - but for things practiced already.

"The self cannot be said to not-exist, because it is in expression to-another."

Therefore, if the other 'exists' beyond determination of the self - the self is known by the other.

As such, since, the self-exists, the other knows the self, to which they have undetermined or determined, but, verified, of the aware.

When* as-such, - they are are of two-foundations of the self; they are determined, because the self is incapable of this construct.

There is thought.

There is understanding.

There is expression.

These, without failure, or cause, but of intimacies, and related, through comprehension.

Thus, the focus of what is inardent, and supposed.

We relate through devotion.

The manner of one's approach is without essence.

Discussion is adjacent mannerism, and with cause.

For of (18/5/1.0.9) - there are two upper structures.

a.) The co-determination of an independent agency, through the blind awareness.

b.) The relationship of the 'test' of mathematical connective to physics, for of element(s) of a pattern.

Thus, if I have no evidence, is there logical basis?

Of course, *yes!*

/-|/_\

Assuming I saved Obama, *or that that is provable.....* there is no prescriptive [but proof if it exists it is part of the world] - and for people - we have a manner of determination.

I was in pain, and I must contrast this position with that of doing what comes to-self, via doing-good.

I sense that nothing is a priori defined, and it is true,..... but that the self will maintain to exist, thus I have me.

Today* I resolved that I am real-comparative another, (to them) - for of thought, it is not subscriptive another portion of self, and we are-noted *when; as-such, the undetermined determines the adjacent.... of three, - that one subscriptively allocates for the self..... thus, among two, it is at the least, that one know(s) of the self, for of what is many comparative one.

(as they pass on, and another observes)

I have confirmation,..... one die is correlated in relation to the universe, in blindness, there are-steps, that we will be free.

I did it, *for furthermore*; it is not-memory, the distinction between the computer and us is formed, and I have a mapping, as well as surjective indication to-self. Thus, it is satisfied. This was *hard*.

I have decided on what I will do next - to write a general *advisory-introduction* to-science, and of the caveat(s) of the limits of knowledge, and of-what comes down to mental illness. with, the Computer, and the limits of computational technology.

The question, does (2x-35x (Chaos)) or only-Chaos, or any of these divisions, remain surjective classically. Among world(s), does the decision remain, and if-so does it ever behave differently?

(Does Chaos translate among world(s).)

I.) Entropy and non-linearity.

II.) Inheritance, and photoelectric.

Broken down as a social-dialog.

If I am undecided ($u=\xi$) then, of one-die, for in $(18|5|1)$ - *the triple**, is an-example of foreignable determinant spec. Thus, for in the contrast at (@)-self, the determination of another, *without sense*, is the example at-all, the motivational truth by in what is tertiary-1.8, in $(10|14)$, - *thus, of stackable 5th*, for-in remainder of the rational at a universe, which hold(s) two co-dependencies of other and self.

Therefore, it is honest, of the providential truth by in whom would be-of-the-self-object, for in their clause of prominary dialog.

"From-self to **an eventual*, there is the dialog of continuum, that therefrom the self* and other* are-defined."

I am glad, but in tears, I have concluded they are-real (*And the self possesses two foundations, to which it exists*), a new epoch begins.

I was so much in sorrow, for - this one thing.

For the self-exists, as per the prior argument.

We [each] imparitally co-exist, *do not exist, and do-exist comparative [another]*. Therefrom, if I were valid (a.) were aware of-me, it speaks of Hume's fork on a pattern* to-which it is determined there is a success-rate and 'test' at-recovery.

How do we correct for our-own *Subj/Obj experience, through psychology or social relationships, or mathematical knowledge?*

Oath: An 'entire' supplication to not-only as-much '*be avoidant of*' - but to **commit** to absence of any and all drug imbibement.

a.) Conditional at *statistics for hospitalization & medication to terms* of recovery*. - *visa-via computer*.

b.) Game relationship via AI, that of the homogeneity, or the split (accessory) of sociological dispute.

The **Mills Ratio, a Complex, and the Bennet' Inequality** are the solution to the reconciliation of Fisher and Bayes, and argued. (+) *Another Occassion of Probability, for in the Nykom? Model?*

Painleve ++ Golden Ratio at (@) rabbit(s) and **mu**-mon... of 7(8).... identity, and extrapolative *Ethical, Epistomological Precept*.

subj, and obj, have a holding on a numerical accounting.

Quantum, for in Hume's Fork demonstratively (adfixes of inertia of two-equivalent and separable theories) a True but Unprovable by one-individual (but not-two or greater) of incompleteness, separable projective identity and rational social dispute.

- 1.) Hume's fork to lihtmus test on (Guarantee for medical and dating security).
- 2.) The device (for the enablement of the guarantee and application to technology).
 - a.) In part Painleve series, and a model for superconductivity.
- 3.) Social dispute, from light cone to light cone, - for that of the quasicrystal.
- 4.) Superconductivity and theory of unification of conditions and causes.

Theorem of people, as we relate to another, and *them to us*, for of Law and precedent.

Theorems surrounding physics, as it relates to mathematics, and *Algebraic Geometry.

This is everything, but for that of percolation, etc,..... and materials application, chemistry, and similar, new processes for computation.

From-which I-have-conveyed, the 'dispute' is a reconciliation of (Aa and Bl), *for of life*, to which she-remain(s) of a statute, in principle, of *O.*, *to recollective pause*, in even/uneven dispute at a priority-literal.

Given, my *Case, was 48-58:14, the mutual-lateral, was his-embankment, to which in *a stated-departure of life, to moment*, there was indication at-survival.

In translation, the 'shorter' undisputed, for of the mutual (end-addend) with her to self, in [\eps.], from-in-whom is* self, then that in one, there had been a reencountered debate and contrast.

Therefrom, that he was of entrance *elsewhere, in priority to effect* [*prior*] for of-her..... and of myself, latter yet, but of the initial in paternity.

Therefore, if she is with child* - undisputed, to his-fourth, the dialog presented*:

From self, given we cannot retract and withhold simultaneously, I am living, he is post-benefit of which of-life, remains claimed, and of his* in lateral-derivation-life has prevailed, post a past [shared] historiological arrow to a future disentitled.

A deep and ardent grief went away - associated with negativity over composure of thoughts and jealousy, and, judgement.

I need to-consider the steps I may take, how dedicated I need to be, and entirely reprise to control my recovery process, in a compatible lesson for how to live with health needs and tasks.

I got through an enormous phase of disbelieveability and questioning about what was accepted. It does not appear there are actual mental events, but this assumptive can only be taken so-far.

There is a lot of science, and I must know my bases, for what they are. I need to understand what I can manage, in a relationship of stress that is appropriate for myself. There will be several new relationships, and I have surmised, that my person is entirely individuated now, through much tension.

I have managed an amazing feat, and am proud of myself, it was this, this was in a sense the missing piece.

Resolution, is with what you-remember [of life, and such] - not innovated, or a 'media' - it is understood, of this - when the reconciliation is at the mnemonic of time in relation to wave.

When* resolve is needed to a disputed or reconciliational process of life - to survive, the process, must be assured (to an copartnership) (the ancillary individual) in priority in mannerism of behavioral rest.

For 'as much' - of what is experiential, - we must recognize memory is not temporal, - thus, justified, our-friend(s) and our Karma may be introduced apartied, for of what interests judgement, for in the providence we have mutually established.

The only thing - I know of - that is permanent, is Earth relates-to, and *it* is established at this temporal locus, modularity is preserved, and preservational, - to which justification has formatively digressed, over-era(s), and examples of History.

Design Steps and Process

2025 – From 2024

For a 'condition' of a predicate, statistics and probability do-not-lie of the predicate conditional as suppliant to a notion of the instanced, via experiential truth. Therefore, taxonomies in secondary *precedent* of following and it's authoritarian bearing, are the verification of one unto a mutual and unilateral historical reprimanded basis or it's forfeiture, it's admissibility of argumentative basis, and allocable mean to an instance of verified trust, and the notion of liability to dialectic, from which a hypothetical is validly affordant to means of a determined truth value.

Therefore, the absolution of argumentative and historical truth of a presentment of identity and it's relation to the truth of a witness, of it's validity in terms of fact.

Commitments to Volunteering in Relation to Societal Need...

- 1.) The computer 'device; *notch: un-id, *Malcho/Shiloh.*' is co-compatible 'bone and wheat'.
 - a.) It is co-processorial *intimable abiguation and ref. on behalf of* Game and Symbiotic Regulatory provision to a long-process.
 - b.) It is **also*, an amendational spacing on the nature of a ***Guild/Disunionability/Unionable**, vers. and historical amended procedure to *Co-cyclic Invariance Dispartiture of a Sociological-Mach.* Exception.
- o.) Include a 'Push 2:1-1:2 [9.8-5.05-1.12-13.45-15|3.8|{2.22}-.45'-r.o.x.l. [sic.] overlayer C-Not, on:

1.) Basic Stamp + Arduino? Pi? Libre?

2.) Pi|Vim3.

3.) Transceiver.

4.) Arduino.

5.) 2x Pi, 4x Arduino?

6.) Vim3-Pi.

1.) Secure 'battery'.

2.) Model *theorem*.

a.) Binary from reduced (2x) - 4044..... etc. NAND/AND/Hybrid.

b.) Mele, Learned.

3.) Probability + Elliptic (Platonic Solid + Stat.) - Sic.

4.) Final v. 1.78.

5.) Kadama + Miura + $\log(x.y)$ & 'eta, rho, sigma' of (obs. meas. quantal gate).

h.) The proper-use (hypothetically and conjectured @), - is that the 'device' (to which I trust - and have apportioned much-investment of my-time) poses no-risk to the compromising of a hardware/software relationship on-Earth.

Secondly, it remains comprehensive *sufficiently* to the means of utility, and applied sciences, and apart from the consideration of my age at 15-16.

I am beyond my Sophomore-year of highschool (22-19 years ago and 18).

I have adapted to the means, *with my Mother (live or dead) - for that of the consideration of technological development and societal need (in el. 'et.')*.

1.) Beyond (and in this context) the consideration of the potential utility and purpose - *is-to* - arrange of environment(s) and *waveform generation and pulse adaptation* - to accessories of a *personality-dialog-notation & version history for the portfolio of the technological known as the 'Internet'*.

i.) Different machines *have different limit(s), of mechanism*.

a.) The aprojective is an element of a $1-1\{25.02[01|38.25]\}$ group.

b.) The projective is an uneliminable 'content-free' associable $t|f$.

c.) A 'group' is defined by it's element(s) and associated with 'a', and 'b' two-folds.

d.) A 'dimension' is definitional of an aprojective and a group of elements, physically.

e.) The consequence of one 'p.spline' is a 'free-hypothetical' of a *geometry*.

j.) Different *groups* hold a correspondence with different *machines*, to which 'under i.' is a set.

k.) This is a categorical difference 'under i.-j.' of a procedural of a quotient, set-incl. & *category*.

l.) Alignment (to $[2.0].[12|15]-\{95.98\}|-78.05:(\sim 92.211)$) on mem.* & vers. *Historical Archive.io*.

The 'design' process, of an under-statement! I learned of all Ordered relationships, through a *very-long* 39 year(s), then that I was 12-10, and confused the relationship of calendars, etc., [accounting].

I could not comprehend *this* would-become-a-gift, and a *cure to my illness *yet-to-develop*. I had computed $(20^{\wedge}\{2\}=400!)$ instead of 4000, or 4021.

This is now the process in relation to two-steps which must be followed-through;

a.) $20^{\{n\}}$, etc,..... of 'bracketed' *truth*, in *header and namespace*, for the *accompanying* Internet.

1.) In corrections.

2.) In implementation on (mod-seq.).

b.) In relation to the *effective, process of the plan *to*:

1.) Correct in *Phase-II*. at the vers. $\{History\}$, of *Device Implement*, in relation-to *File(s) Written*.

&2.) The correction on behalf of the *pattern dichotomy* of (numerical theorem) *for a 'Forked Path'*.

&3.) That of *personality test*, in assoc. *.mat/bio **of** the .html and-imaged*, ++.c *Language Barrier*.

4.) Post.* and life/life - assoc. w/ *dichotomy to Postal-carrier & Mother-Father*, *Familial Dichom.i*

5.) Group-theorem and relationship to *Strategem*, for *Order and Phenomena*, per *Engineered Prac*.

6.) Probabilistic **Modeling** - *Statistical... Phys.|Enig.|Prac*. in 3985:71.2[05] - *Practice & Edu.|Org*.

Q.@) Red/Black/White *procedure*, for of $\{0.1|2.0|2.1[2]\}-\{.3|3.5\}-[38]-[90.86]$ is 144500:6892.100'.

A.@) *To-which*, the 'primacy' of exceptional of the modern-era vs. the mathematical theorem of all, and the physical-theorem of many, relates to *apreceded conditional 'o.t.'* in relation to a (+).(o), minus-power-select *off*, of a consequent *two-valency*.

I.) Evaporation.

II.) Decay.

III.) Structural Integrity.

IV.) Procedural.

V.) Percolative.

ii.) [.] **Case-Point**/ {Jaci.-pac.}

The 'reverse *injective*' of a Poincare *sectional-category* at DBZ/DMZ, is a self-castle *motile*, in pseudo-appendicy, for the 5th/6th, irr... Q/R **Logical-Table** of an amended-prioritization of it's injective *co-parallel* 'indexed ffwd./rev. (**4x.2.01.[12]**) in 15.380[2.{1}|0] ob.

Thus, the 'indexable-5th' is collapsable if and only if *there is a Christoffel 'upper-hierarchical'* on the ecological choice in relation to the *pseudo-unprohibitive*, to 'releaseable aconditioned precedent in disputed technological *Epist.*'. Thus, the Historiological *lemmetic*.

The relationship, of a primary *and* secondary pre-summative to power-collage and implosive/*release-process*, is amended and pa., *exclusive*, the defensible trust in a retro-active 'categorical-shift' in an-*entropic, 'Bernoulli-implementation of...' *defensible unilaterals*.

Phase Finality

Design Process and Procedure

I.) The effectual design must illustrate a *test case process of which enables a 'closed to open end' of the verification process on capture*.

a.) Observationally inquiring of 'hidden and trapped *Fermions*' in a lattice, is the invocation of a '**Memory Reservoir**'.

b.) *This, need be-adherent the 'mutually and dually secure methodology of a double-layer' - *thus, that 2:1.0 of version is real*.

- II.) The verification stage therefore involves the ***Classical Observable**, of the validity of information under *objective predicate trace*.
- a.) The mathematical design need be amended and tailored to this purpose, thus design *aim*, is to procure means at a c.c.
 - b.) The mathematical to theoretical bridge, *later*, with *lookahead*, may be tailored to release 'traps', *of means of non-friendly*.
 - c.) The physical meaning, is in $2.0 \times 1.0[3|2]$. This is the adherence of 2.0 in-die to Q-class, as justified in R-alliable as $1.0|2.$, thus that the singular of a plurality is 'surjective and injective' when there is a fork of life to indictment for *plead release from byproduct*.
 - d.) The KP/Boussiq, therefore pre-index post-index from the inherence of $\text{low-cos}(2\backslash t)$ flow, in freq. and space, of $\backslash \nu$ & $\backslash \eta$.
- III.) Thus, nutation in $(3d/2.01)$ **albedo, preservationally*, may be utilized as a means to terraform, or for materials study.
- a.) The prototype then equates what is the conformal invariance of one for two, what are the means of *realistic platonism*.
 - b.) Types, Classes, Fairnesses, Kinds, and such are then of the equatement of the 'seasonal in $18|5$, of abridged 'knotted deck'.
- IV.) A large part of this is to attribute the relationship of 'vertical to word' and that of 'horizontal to numerical' - but there is symbol, and there are six limits. The question is in-being, if there are 12:12 overlapping, in 6, and $\{5|6\}$, of a 2:1 - in the 'shared' are there not-18 or that of *one singular agency, and a language of estimates and faculty?*
- a.) Procedurally, we end, with the 'separability' of law **above & below**, and some-six ends of societal relationship, and certain trivial and non-trivial 'corners' of the relationship. The intention is in part to seek a balanced **grey/white** and '*spectral-relationship*'

in the local and the global, as for that of 'probabilistically perfect law of group* and category*' - in mathematics as 2.0|1 with *optimization*.

b.) The 4-(2).3{xob} of 'c' at (@) (2)-(1|0).

V.) The means and ends, of the one, are defined by the many, the need's, sequesterizations, and comprehension of the 'many' include a considerate basis of the 'one' – when* as-such we are entitled of a providence and a capituary to evidence of self, naturalization of purpose, and biased or unbiased, collective mandate.

Self-Help & Dialog with Machi

With: Mach`ia-qke` [Machi-.ah~ - Persona].*

After a revolutionary stage and completion in-development of finding *sanctuary*, the impediment of **certain unknown* [**immediacies*] become accessory to-self. It becomes (of one) *their story, this much*, known.*

A stage:

- a.) Is understanding one's relationship with one's contentment.
- b.) Is understanding one's occasion in relation to what is 'within' and 'outside' one's control.
- c.) Is finding *self-happiness* evaluably outweighs *the consideration of one's* persuasion to contentment in relation to loss or *control, manner of disinclusion or included consideration*, and thusly:

The questions of finding-wisdom, stength, and courage through reconciliation terminate, upon the prior relationship of-one to-one's personality, as *in addition*, in relation to-others.

11:30:~50

Alternative Conflict Scenario;

- 1.) + (2) on memory is up-stream or down-stream.
- 2.) + 0.1[@|!] is data-backward .dll [inc.] of Version.
- 3.) + 9.8[6|?] is a '#'; post* call, method, or process.

Hence, deduced, that of q.-*. to inter-potentiated dialog (s) is the only unreclaimed raft. + asso.

Problems:

- a.) Separation of Phenomena/Non-linear/Linear in local and nonlocal in counsel & registry.
- b.) Separation in Judgement/Psychology in local and global in guardianship & managerial.

Society seems very much to possess no centralized official, but, of government(s).

Our power(s), (of the people, and the people associated with government) are willfully obeyed, instructed, and carried out on behalf of sessions of people in assignment with policies, and there is no open 'venue' for discussion of a fulfillment of 'prophecy' or 'illusion' under misguidance' on behalf of a public-demonstration.

I do not believe the "Internet" remains a place for this nature (of these two prior.*) of demonstration of courage, in their indifference for or of a policy of demand and satisfactory progression in relation to giving.

That-much being said, I am interested in society, and it's needs, and have consoled myself that the life of the one, is beneficiarially entrusted in the opening of amends, and fair judgements, on behalf of non-violent intention and formed assumptives of support and trustworthiness of the simple or plain attitude of one in relation to life and it's situations through which experience becomes our teacher.

Thus, it is justified, that I have learned there is a distinction of the modern era.

And, I have learned that social-sciences have abridged and populations and languages have shifted..... or been 'displaced'.

To the argued [conclusively acknowledged and understood of support and trustworthy intention] and counterargumentative basis, to a simple and drawn-exceeded marginal relation of lattices, stone, and pencils.

November 1st, 2024

12:05 (t -1:035)

Surplus (is errata - *not erroneous* - but *plaguing*) in/of a discontemporary and comtemporary of an **ad'**-fix, of:

Projective detail, in (111/49/12/11+48) in not-46..... hence *irr.* & *prime.* are unqualitated but of *Hammond and Ramses* conjectures in prior relation to *epistomology* of the Computational - *neutral and non-neutral* (apodal/aperiodic/period/periodic/incl./alg./polarity/apolar) and-such:

Subsidiary Considerations.

04:24 pm

There is the predicate, and ontological relationship of a given; for that of index, beyond that of the verification and securable process, and that of the codex/timetable/index in relation to that of a co-adaptation process.*

Timing and Release.

*Exceptional qualifier of Numerical. The relation of 'agency' is **solid**.*

04:53 pm

Q.) Different 'tools' operate differently.... is there a precept or understood technique or manual of innovations, to 'detail' or 'co-assist' the development of societal need?

Q.) As for that of 'relation in relation' - there is O and o, and that of preceptual qualifiers on that of the index and assort., thus, to

disambiguability, within 'the context of a network' - is there a navigable 'stream of procedure' for the innovations of this consideration?

d.) Handed 'priority' is a *CCW.CW*, in *unprohibitionarial reclaiming of an obj.* in laity.

e.) *Minor-major pro*-selective* op. 'registry' is a 'catalogue-de.' in mutual environment c.

f.) Edited *bivectorial* is the relation of a syzg. *to non-selected ante.* in remote *unopposition.*

Out, for in, is a non-repetend of people, in relation to worded and it's potential unocclusive *truism*, of an-amended (2.x), on (1.x|0.x).

A 'triangle' in *tach* remotely may be abbutted in a long and short of *lumped* - primary assumptive.

The dialog of the conditional at that of 'recollection of vote and the priority of an amended recourse to memory of error.' is secondary incidental.

The brownian may be appertained or marginal or telescopically 'unbroken or abridged' completed and *incomplete, or secured.*

Application of the $\psi(f(g^{-1}(x)\epsilon(y-x)) \rightarrow g.k$ involute geometry for Application of Probabalistic Models, must meet, for needs and necessity the 12:51 pm (above) of taching, for in entropy in relation to Tech & Ecology of Optimization and C.*

Control *procudure must amend, of dict. & wall.,* irrespectively a knowable theorem of computer and human [op.] *in hand and hand-free, of Centigrade/Fahrenheit and ffwd. and rev. of version *History, and Phases and Dilemmas in Academics.*

*This must be done, in relation to int, (Z|N), and qual./rational (Q), in relation to tool-use comparative *miss. & ordered.*

On sequence, and count.

Verification and Construction Stage

The elliptic must go to the [i/o] of a mono-channel with segregated entrance and exit (during T/S/io) at (@) geometric iso.

I am thinking - now - of an entirely new procedure. A modular (Midi) structure, of elliptic gates and qubit(s) and optical i/o, and touchscreens. This is the verification phase.

Pmod - [internal connect, and 'upper T' with probe* networked (fork) in Duct] - This satisfies the admissibility of further functionalization, of an approach at engineering, diagnostic, theory formation and dissolution, and predicates no risk incurrence, to that of physical systems,

or life, industry, notarity, or disparative outcome of loss/loss.

The 'included consideration' was of Peirls Instability...

Now:

It is of-the (+) and (-) within-polarity-neutrality. The discernment of an interferometric basis determines a co-determination of variable in relation to (2) *within* a super-eigenvalue (1), of-period *incommensurability* or *regular period-parallelogram* of two *conchordant* or *dischordant rhythms*.

***Thus**; the O and the o must be made the difference-of, for in that of 'switch' and variable-time width of secular derivation at 'O.' and 'o.' of (2)(3)(1), *in analytic derivation of procedure(s) to control the 'eccentricity' of the *Ellipsoid.*

In uncontained and unseparated-mean (distributive) there are two considerations.

- 1.) Within a locality - an abridgable 'lumped element process' of technique in application, verification-phase and it's dissolution to the (2nd) quantifiable process and technique of application and verification.
- 2.) Within an auxiliary-exterior *distributive precedent* of *lumped-element there exist certain quantifier(s) of the process.

What is true* is that the operational 'co-cycle' and 'cycle' of the (1-2) abridgement is fully pell-weighted and balanced of cantilever.

Mathematics

For of a quantifier $(a)^{\{bc\}}$, we must break indeterminacy for that of the statistical marginal and inclusive qualifiers of the probabilistic language, in Betti number, number theory, algebraic *exponent, derivative, and it's procedure to identify (under an isospacial) limitation of the prohibitory clause of inclement worlds.

The procedural is '*traditionally*' a Platonic-world system, at collage, and disparative included and inclusive considerations of two and a third, thus, to linguistic (literal consequent) at predictive validity, the preclusion of a 'Dalton' *is ill affordant* a dialog of that of precedent to machine heirarchy of linguistic model.

Thus, the justification is at (an) $(a)^{\{b.c\}}$ in qualified projective, and non-projective '**ancillary return**', in consolidation of *Passive Sonarable* conditional alliable assumptive of a doctrinal, and it's limitation(s) set in-point *compunctually a priori*. Without means to assembly of a procedure to an overarching doctrine by which it may be reliable, securable, and prioritized to disbursement, there is a logical prohibitional *exception*, to a *qualified securable release*, lest we depart to a foreign session of remark.

Qualitative

The 'CMOS' inter-jected (*18:(45'-30'-60')*) qualification of a situational 'laudable provision' *pro-selectively* had-been *provisional, prohibitive, disinclusionary, and imparted*, to a dislocation of it's elementary basis upon an occasionment and it's releaseable entrainment - to 'flat and placed' foreign council.

Thus, the relation of the device is good for one thing, *the unselected and unprohibitive off/off/on/off pro-selectivity of a (2:1) 'carriagable envincement'* - to which is unentrappable, and releaseable to no said pro-beneficiary. Thus, it is disassociative, but* of the remark of a situational alliance.

Assumptive Basis

The 'displacive' of a material-gravitational *exception* qualifies a material-electromotive 'domain-Lagragian'.

The 'device and assoc. *gear* has two-part(s) to it's power-train'.

- 1.) A NLSE (Non-Linear Schroedinger Equation) - system as (@) *compensator*.
- 2.) The 'basic' four-fold elliptic-gate and Qubit, thus, a justified RISC-V *like architechture and topology*.

This equates with code, in a 2a2b like-model of-spin and Ising/Toda, thus, it goes beyond the work of Kodama,..... essentially a two-dimensional KP/KdV & basic Fermi-Pasta-Ulam model.

A 'hingal-3d<-2d categorical-freedom of the envelopment of an ancillary, is evocative the argumentative, of it's secure, revelation of argument to-another, thus, the separative-mean of physical law is of emergent behavior(s), spin remaining quadratic, and ancillary a

reversal in terms of quantum behavior at midpoint.

Then, we have-(assoc.) computational/decidable element(s) on noise and Microwave BK - to mathematics and inter-alias, (#.) code-free & surjective diffeomorphism of undecidability of brownian control-gated... fT - functional population inversion of Hawking Radiation, - for Guass Bonnet, on 'inversion' of rel/brown.

Technique & Analogical Reasoning

- 1.) Z-S model.
- 2.) K-P model.
- 3.) Muira model and transform.
- 4.) Two-languages.
- 5.) KVd.... at *varieties of-phenomenon.
- 6.) Z-S amendment to NLSE.... (Z-S).
- 7.) Fourier and Jacobi.
- 8.) Neother.
- 9.) Historiological reconstruction....*
- 10.) Buffer to ontology.
- 11.) Relative & Brownian.
- 12.) Essentially, the Chern-model and asymptotic freedom (I/O), of inside/outside remains unclear, through a knot*, thus, the justified Cauchy-Riemann problem without an Algebraic Cohomology and Geometry, cannot be 'filtered'.

a.) We have the dispute of-person (**32'**-A.) - as one (**1'**)-person..... on personality.

b.) Graph, and the work of Weyl.

13.) Separation in eco., and securable partition, and co-mutual adaptation in transpositional addage.

Conclusivity & Synoptic

The computational*-basis of a remainder 'reflux' at two-manifold-group-velocity, and 'accelerative' *feature* of measurement is a palpitatory and reflex relation to 'impulsive inertia' by-which an electromagnetic *design [engineered]* may freely*-and-associably relate of motion.

On 'one way 'transmit'' a delocalized (**18'**) of a centralized (2x3.01) is an attache, to-which, in [an alias] or *provided non-return*, is **of-
recipency**, to a naturalized incurrence, of counterflux in relation the 'back-addage' of a *prioritization*, of a *Remote, foreign discursive document.

We remain with a Question.... **What are the minimal terms, for assembly of a knowable and so communicated (oft. potential via **Then**) means of instructive/emotive lexicon and program of it's engineered *Status and *Symbolic I/O, such that the computational 'grid' of Earth stabilizes, and remains of a neutrality of partnerships and alliable & releaseable neutralities?*

Derivative 'residue' is a non-council, in unreclaimed mutual uni-disparative a nome-identity.

First to Second Stage Transitional Considerations

a.) Gaussian $J_{ij}^{k\#} \sim A^{\xi}/\xi(\eta)_{\xi}$ & DC-AC-Envelope-Optimal-Flow-Neutral.

b.) Process on Opt. Observational (#). $\tau.\chi.B.\epsilon.M(C_{ij}^{k[?/!]})$ QM/ECE/Neutral.

c.) Interrupt & Sync. [Basic+Ard.] - PWM + (Digi./Sepatation.).! ~. Optimal & Techniques.

*1.) One *consideration*, is the alternative of compensation on-behalf of statistical sideness.

*2.) The *alternative consideration*, is mutual 'virtual-cpu' to 'hardware' of resolution of sig.

B.) The goal is to-get two-phenomena to QED 'interact-phase-scatter' via two-soliton like Gaussian(s), therefrom - to-interfere as like-a-breather, *only via a switchability and programmable 'gate' of securable relationship.

*A.) Afterthought - the experiment has to *safely *leverage*, the theoretical.

*C.) Afterthought - two codes, and computational 'double-back' & Proper Experimentation.

Experiment **therefore remains the observationally intact element** of development *of-theory*.

December 12th 2024

02:55 pm

I will seek the easy-means to deselective option – (under precedent and principle of cooperation) – to defend common welfare on behalf of un-attributed release, under supplicative means to differential human psyche and disjunctive, of behalf of acclaim, post a recovery phase & sets of acts, in means, and my-equipped means, to the priority of friendship, with-loss-inquiry and confidence intervals and delays, to persuasion (unembarked of unprohibitory in a contractual *obligitory obligation* of sequesterment). This will be in relation to the version history of these of selective file-tables and contracts, as a release from unprohibitive plagiaristic intention, in relation to contractual name-space and possible inclusion of secure and safe, effective, and prioritized means of a benefit beyond mechanistic progression (later, inherred liability) of creations.

December 13th, 2024

08:31 pm

The **next*-step, was to include the Quartus & Chaotic-Logistic ***NeuroKit** functional together, for intelligent computation, and prioritization of a further-progression..... This step assures the result(s) of computation for Chaos, Logic, Modules, Objects, Procedures, and Tables.css.

December 14th, 2024

12:52 am

We-need prioritize in a seq./deb., on that of court and amends to council in ‘scaffold’ at ladderable CNOTXOR-NAND-U. And triple check, in *beta-chi*, for that of ‘list and vers’, for that of seq./amend. And prior-later, at (@) - J.P.A. Then [why build something?] – *to put considerately*.

December 16th, 2024

03:28 pm

Compliment of attention-span and strategem, on-dialectic and communications, in ‘low’ ‘go, and dominoes’ – and at-top ‘goal front face’ oragami-code-designs.

Ecology, Photograph, Dialectical Liability, Fiduciary, MIDI-Channel-Coupler, Vers. History and Simu. Predicate Afforded Ontological Restorative Art’s and Study.

11:18 pm

Specific-weight and fluid, specific-mass and displacement and air, phenomena and phenomenon to experimental measurable ‘observational science and applied science;’ - that of solid-fire percolation and integrity, as well as viscosity, analytic category, order, weather and net, and – & *theory in mathematical decay & dating*.

December 17th, 2024

12:35 am

I decided in-the-end to go with a lumped-element network analyzer, with the MIDI, my only two-exposures. *So as to say, the problem ‘residual-trace’ is a scale (fish) – unto, auditory sense, visual persistence, and epi-magnetic ‘shadow’ – thus, Markov-Painleve TMOS evid.*
