I have-now (*only*) three (**3**)-considerations for that of the 'study'.

- a.) Chaos in Nature, of which I-know much-about.
- b.) Chemistry, Percolation, and Neutral/Quantities & Measure.
- c.) Secure means, the Device & Electronics and designs (@).

Beyond this, with the-'net The **vers**. And **cat.{g}**. on Date/Regis/Pub.

Then, around-now [for what is so-always a few moment(s) ago.]

I found '**the-answer**' I sought.

It is:

To:

- 1.) Have a two-fold relationship with items and friends.
- 2.) To admit I would return to consideration.
- 3.) To concern myself with two-fold(s) of defense.
- 4.) To contractually relate, admit, and survey.
- 5.) To relieve, the admitted contract(s) to mutual(s).
- 6.) To sequester, then, as to apportion what so-is-being.
- 7.) To know, as to associate, by peer(s) per inimitable end.
- 8.) To defensibly trust, in-'either', of family and homestead.
- 9.) To equably welcome **then*, as to plan, via association.
- 10.) With what is 'amended' set to portion and the answerable.

Thus, to trust that I would amend, I must preliminarily orchestrate *from*- the sided contrast of another's certain trust, with the welcoming of any defensible trust, or offense, or portrayal, via associated agreement.
