The fundamental truth is that there is separation in-law between people, and in-phenomena.

For me - the question had been of enlightenment, and actualization of potential.

I went through a spiritual death, so, please pray for me.

I found that we exist to our own side, but the annihilative 'in-extinction' unto this separation in-law, entitles that another likewise exists, and thusly, for of love (kindness, fairness, strength, judgement, care, patience, wisdom, courage, and loyalty), itemize and relate of the eight and ten, of that of a relation by-which the Q and the P, of a mutual proof (in three and two) fundamentally provide for a rationale that there is a world-beyond.

This - considered - it is worded that there is essentially no-God or Devil, - but there is a unitary principle to our world, - and furthermore that death to life, may be motioned beyond, - for that of the relation inclusive of this-life, for of the living, - thusly, that in the prohibitive, we-die, and may continue, - or decide in death!

Thus, it is all given, and founded, and for what was an-experiment (a lit match, of which I had flicker via magic and telekinesis) I only was aware of my own provision and awareness, and it was unnoted and unnoticed by someone of an independent perception, - thus, through a study of quantum mechanics, logic, and comprehension, and gravitation, I found the key to the path, and the common strain to medicine.

I have adopted new-means, the choice is finally mine, and I lead our people, eventually saving humanity!!!

Thank you, and bless you for listening and reading,

Sincerely,

A friend and brother of Buddhism. My final request is to practice in a setting in Santa Fe. Act!
