

Contributory two sessions intermederarial of one's appraisal of court martial and services rendered *preformatively in evaluation of a declarative standard of politic and aggrandizational capital* [with as it is then understood in disambiguability:

- 1.) A survivor to the relation in witness of an entitlement to declaration in status perveyant the relation of a greater superminority and jurisdictional setting.
- 2.) A cousin, functionally rightful of forbearance to an arrestable offense but freed, and capital notary projection on entitlement of economic visa.
- 3.) A condition of setting of jurisprudence and fair assurity to disambiguation from one's peer's and retentive qualifiers to demonstration and acts of unjurisprudential or regrimonious behaviors.
- 4.) Situational capital and situational economic capital of functional disability and work's of a contributory nature to functional assessment to monetary valuation and written documents.
- 5.) A major apportionate basis of food and stuff, and rightful standing to a claim of clemency [granted purviewable and rightfully administered] and high or mainly functional cognition and comprehensive educational background, contributory to works of demonstration in act's of court.

I would then-ask: "How, demonstrated or rightfully promiseful [entitled, ambiguated, lost, or reorganized and apportionate] *as to state*; for of laws, are we hold that the function of a people is to consider their *potential and possessorship of work's and respectful imbalances and a fair-session to be granted*, if as such~ A people hold the function of a regulative duty to those work's that prescribe them, to uphold their portion of session and reportive basis, whence so the ruling is unambiguated by a formative structure, and those rules of law, entitle the stipulation they suffer, or reproach in entitlement of laws regulatively of holding of one in standing to a greater ruling, persuasion, calling, or work of entitlement beyond their generation or fellow?

The following is unseverent the relation from court in proceeding and following.

First stipulated of the above contingency and hypothesis, the court can (demonstratively rule to accord or disparity of loss in relapse of a major contingency and functional assumptive of the pliant).

Second, it hold(s) of such persuasions, of one (1) entitled or disambiguable additional courtesy of court and additionally non-mandatory but reproved to objection without enumerable uninaminimity that the standing of an individual is to the perveyance of their fifth amendment as understood as forementionably of a discomparable workmanship, but entitled to withheld notion of no qualifiers, for in the situational numerical and binary relationship while standing court in witness to ones own interest. Furthermore, the entitlement of a declaration of (1) **additional** survivor's plea is qualified immomentarily as an act of war in courts and administrative duties of honorable mention to the medal of honor, or dignifying works and catalogs of army representation whence* two and identically two model systems exist.

This dignifies whence* one in standing is reprovant of one disentitlement, one remains bound to the system of court and administrative contributory actionable intention and may lose posterity, without a provided entirely culpable rationale, whence acting outside the disclosure of court session or incapably administring the function of an agent with orders to kill. In this beleaborment, we hold that a society managerial (stip.) of these rulings and actionable work's and positions as a secure defense of a nation entitles the best merit of a people to withstand fascism and authoritarian tendency of the catalog of nationalistic intention, and it furthermore has proven safe, effective, and guided of many people within this nation, the United States of America.

As in following, I had (evid.) taken a yet-proven of hypothesis of conditional and consequential event-action-reaction-cause impromptively produced innovation to the operative status and neutralized a nuclear bomb, in the attempt to persuade some 6.5 billion people to issue a complaint and service the function of administrative action to my success or failure. The warhead had imploded, and neutralized, following a sequence of events involving other alternative memberships of this Earth.

As a consequence, for in the agency of theft by my hands, and the production of equipment capable of this standard of coupment, I would hold I am disavowal of the relation of relief without a dual-session of court martial proceeding to ejection from services administrative or workable to a people on behalf of army or military, or may compunctually argue no fair contest, to which I am not, but require the co-functional assessment (for of vanity in theivery in action, intention, method, task, and decision, willingness, and attempt, and conveyance to means to acquire goods and services illegally (but of no paraphernalia or contraband) to the session of an initial guidance in peer-review, and a judge's ruling, to which I plead no fair contest.

II.)

Of, then, *furthermore*, of what is actionable and contributory, the loss in relation and personal perusal in my function 'executive or otherwise' in-being in question and co-mitigated of actions of return violent actionable decisiveness comparable those stronger and weaker, and the relation of co-mitigated disability under treatment, hold the persuasive element of capital function of one's membership and sophistication of reading, the hearing before us, and it's unitary and non-unitary contributions, but of the relation of *then in finding*, an action of intention to destroy property or lay alliance where it is unforetold of the consequence. One question, before the court proceeding (martial) is if this is indeed an action of war, a retaliatory action of war, or an inspiration of enclave, isolation, or madness in the face of adverse realities given devotion to foreign political agency, or loss of session and intervention comparable interference with a law enforcement proceeding, or an action of infiltration of primary or secondary nature. Third, and final, is the question of whether justifiably there was physical evidence of a demonstratively held and perveyance qualifying and measurable feature of biophysiological and anatomical malformativeness contributory the catalog of offenses, or if this feature, suggestively [herein intended] were a behavioral maladaptation and biological precursor to disease or the means to suggest the *intent was without basis, formative upon the stipulation of being without physical evidentiary means in the catalog of a comparable felony*.

Entitleable provisio for in a nomenative disjunctive sessionable invitation of council, we may provide a four-and fifty to seventy-one propertied dilemma of council [provided] in two, to 16-5 in 38 to 99 and 20, provided no disunitary reprobational entitlement of a licensentor. {Provided no censure and a given at a trustful obligatory reclaimanaitive property of junctionable work of law. Does this [neither consequent disunitary or unrepachable manual labor entitle the provided [of council to their honor] of a juncture in beleabored co-divisional produce and production of works to their defense and livelihood? Then, justified, do we intimately conjecture we have pre-aprehended to a license in a given work of administrative arts or technical catalog {provided a citizen's defense} and of non-capituriurarial rights of forbearance to consenting?

Per my Recollection:

Reasoning [as justified] to suffer honorable ejection from the military-appt and ARMY reserve of 'appointed self-catalog and cache of reasons - for in 'draft consolation and clemency to clement proceeding' for in a session of non-capacitated potential [persuasively malcontentive] self-taken actionable intention to risk a session of war and action to aggrandize power or reservation to entitlement to *serve*, I was taken aback, immomentarily to the *furthered reservation of life, labor, and provision to excellence*.

In learning it was ill-affordant my discontinuation from service culpably associated with non-regulatory function of my worded and listed function in status and appointed non-capacitated standing, I was rectified, to find it beleabored no qualified complete cessation of coterminable and discontinuable oddity in life or labor, in trust to the United States of America, then withstood in capital arts and reclaiminant actionable intention we 'a people' would suffer a severably less non-functional loss in life, and survive, with laws intact, and upright. I would continue to feel my skin, my heart beating, and for the struggle, withstand imprisonment, or a life of freedom, known as a citizen '(recorded)' of the United States. The distinction was laid bare to me, laws would continue to hold. I was finally a free man, and it was understood [furthermore] laws administrate the juror-dutifulness of administrative actions of war in our country. We will not end in slavery, our enslavement, or complete anarchy. However, I feared [greatly] the results of influence upon a people, then learning, speaking, and associating to understand my benefit to assist, for the labor, the abuse, and the trauma I suffered comparable any prophet or leader of peace. I feared a people going unstilled, unsullied, and vindicatively hell bent on a world in torment, infatuate with a design to reinnovate in their image what would be fallacious, by reinnovation of society and law. This became my comfort, imposing cruel actions and choices and decisions upon a people, for no reason that that I came [alteratively] in my own manner to believe cruel and unusual punishment would arraign the disorderly or persuade them to be lawfully abiding, and functionally secure in their comprehension of people's weaknesses and strengths. Then, I believe I understood in part and portion the reason of my entitled entrance and disproportionate skepticism. A people were predictive of being without imbalance and charted reapportionate functional behavioral humanitarian value in the occasion of recovery from conflict and biocontaigen under any (1) or all (A) centralized power structures of modern technology given my empowerment, grief, the loss of all entitled leaderships, a compromised mechanism of mind, feature, or heart valve, - or -, a centralized singularly empowered 'emperor' or modern feature of artificial intelligence, when it is unfortunately set into progression with language sufficient to understand bioproteins and algea, while certain individuals of this given society are rendered comatose or unconscious albeit what are dreams.
